Seaholm Intake Reuse Design Idea Competition

Open to **all** design students, design professionals and artists

Registration Ends: **05/03/13**
Submissions Due: **07/12/13**
Top Three Finalists Revealed: **08/09/13**

Top **three** finalists will be awarded **$5000** each

About

The design challenge is for an adaptive reuse of a power plant intake facility in Austin, TX. The site is on the banks of Lady Bird Lake and within the Park and trail system. From the West the facility is a gateway into downtown Austin.

Entries should reinterpret, envision and create a site and building that is for Park related use and responds to the surrounding changing environment while engaging the trail and park users and the water. Entries will create a vision of the facility as a new community destination.
