

Intergenerational Programming Community Meeting

June 20, 2023 (Virtual)

Notes prepared by Claudia Conner, Parks and Recreation Department

Breakout Room 2 Notes

Notes

Gretchen Flatau:

"I deal with seniors and non profits a lot.

What kind of older adults are we targeting?

What does the seniors look like. The ones I know of are not looking for a place on a daily basis.

Dr. Jacqueline Angel:

Based on age of older adults, very important, 65 and up. Also cognitive disabilities.

Gretchen:

So, there will be a charge, is it every day?

How much does it cost?

Dr. Angel:

It's free. Medicare will cover the cost. They do not need to go everyday.

Children – background checks

Two prong volunteering

Demographics 65 and up, can drop to 62. Health criteria important

Susan Alexander – Run age, not sure who are what referring to.

Nicole Howe – Presenter

Richard Bondi, Comm. On Aging

Space may be too tight for older adults and toddlers Where would middle schoolers go. How will adults be monitored with toddlers and their safety. Not sure who is safer adults or middle schoolers.

Gretchen:

A long time for small kids and terrified of mixing and the space not good. Safety, scary for children.

Do we know how many adults will be served in a year?

Dr. Angel:

Spoke about the pilot and the national information.

Henry Van de Putte:

The liability insurance worked well.

Gretchen:

Does that include small children with middle schoolers?

Henry:

Will check, not sure.

Maltsberger's presentation

Gretchen:

How many spots available?

Maltsberger:

10 per 100 kids – referred to Texas Rising Star

Henry:

What is the trigger for cold weather/warming stations

Maltsberger explained:

Henry:

Most places work it simultaneously

Maltsberger asked Henry to provide information for above statement.

Room 2 ended, general session returned
