

# Policy Revision Request

Requestor Name Lee Rodgers Emp # 4697

This revision applies to Existing Policy

If new, recommended section \_\_\_\_\_

This revision is necessary to comply with Best Practices

Whom does this revision affect? Department

This revision has an unbudgeted financial impact of \$ N/A

## **Brief reason for the revision:**

Using the body worn camera, Axon Respond provides officers, supervisors, and communications with the ability to view officer locations on a map, similar to how you can currently see vehicle locations in CAD.

---

## **304 LIVESTREAMING**

### **304.1 PURPOSE AND SCOPE**

#### 304.1.2 OFFICERS

The department recognizes that officers on scene may find it beneficial to utilize the 'View Location' function when setting a perimeter, conducting an open field search, or other incidents in which officers may be away from their patrol cars. However, the ability to livestream Axon® devices is reserved for supervisors with direct command and control over an incident or call for service and the employees who are actively working on the incident or call for service. Officers have 'View Location' privileges and cannot live stream.

#### ~~304.1.2~~ 304.1.3 COMMUNICATIONS

The Department recognizes that the Communications Team plays a vital role in the safety of the public, officer safety, and the overall resolution of incidents or calls for service. However, the ability to livestream Axon® devices is reserved for ~~those~~ supervisors ~~that have~~ with direct command and control over an incident or call for service and the employees who are actively working on the incident or call for service.

Dispatchers and communication supervisors have 'View Location' privileges and cannot livestream.
