EAST RIVERSIDE/OLTORF COMBINED NEIGHBORHOOD PLAN Future Land Use Map: Staff Recommendation

This map has been produced by the City of Austin Neighborhood Planning & Zoning Department for the sole purpose of facilitating neighborhood planning. It should not be referred to as an official map of the City of Austin, nor should it be used for any other purpose. No warranty is made regarding its accuracy or completeness.

September 14, 2006

STAFF RECOMMENDATION

Staff recommends denial of the zoning request.

BASIS FOR RECOMMENDATION

This Riverside neighborhood plan was recently presented to Council. In this plan, this tract is designated for single-family use. This designation was supported by the neighborhood, staff and the Planning Commission, and by City Council on first reading..

Transportation

No additional right-of-way is needed at this time.

The trip generation under the requested zoning is estimated to be 211 trips per day, assuming that the site develops to the maximum intensity allowed under the zoning classification (without consideration of setbacks, environmental constraints, or other site characteristics).

A traffic impact analysis was not required for this case because the traffic generated by the proposed zoning does not exceed the threshold of 2,000 vehicle trips per day. [LDC, 25-6-113]

Capital Metro bus service is not available within 1/4 mile of this property.

Existing Street Characteristics:

NAME	ROW	PAVEMENT	CLASSIFICATION	BICYCLE PLAN	SIDEWALKS
Parker Lane	70'	40'	Collector	Yes	No

Environmental

The site is not located over the Edwards Aquifer Recharge Zone. The site is located in the Town Lake Watershed of the Colorado River Basin, which is classified as an Urban Watershed by Chapter 25-8 of the City's Land Development Code. It is in the Desired Development Zone.

Impervious cover is not limited in this watershed class; therefore the zoning district impervious cover limits will apply.

This site is required to provide on-site structural water quality controls (or payment in lieu of) for all development and/or redevelopment when 5,000 s.f. cumulative is exceeded, and detention for the two-year storm. At this time, no information has been

provided as to whether this property has any pre-existing approvals which would preempt current water quality or Code requirements.

According to flood plain maps, there is no flood plain within the project area.

At this time, site-specific information is unavailable regarding existing trees and other vegetation, areas of steep slope, or other environmental features such as bluffs, springs, canyon rimrock, caves, sinkholes, and wetlands.

Standard landscaping and tree protection will be required in accordance with LDC 25-2 and 25-8 for all development and/or redevelopment.

Water and Wastewater

The landowner intends to serve the site with City of Austin water and wastewater utilities. The landowner, at own expense, will be responsible for providing the water and wastewater utility improvements, offsite main extension, system upgrades, utility adjustments, and utility relocation. The water and wastewater utility plan must be reviewed and approved by the Austin Water Utility. The plan must be in accordance with the City of Austin design criteria. The water and wastewater utility construction must be inspected by the City. The landowner must pay the associated and applicable City fees.

PUBLIC HEARING INFORMATION

This zoning/rezoning request will be reviewed and acted upon at two public hearings: before the Land Use Commission and the City Council. Although applicants and/or their agent(s) are expected to attend a public hearing, you are not required to attend. However, if you do attend, you have the opportunity to speak FOR or AGAINST the proposed development or change. You may also contact a neighborhood or environmental organization that has expressed an interest in an application affecting your neighborhood.

During its public hearing, the board or commission may postpone or continue an application's hearing to a later date, or may evaluate the City staff's recommendation and public input forwarding its own recommendation to the City Council. If the board or commission announces a specific date and time for a postponement or continuation that is not later than 60 days from the announcement, no further notice is required.

During its public hearing, the City Council may grant or deny a zoning request, or rezone the land to a less intensive zoning than requested but in no case will it grant a more intensive zoning.

However, in order to allow for mixed use development, the Council may add the MIXED USE (MU) COMBINING DISTRICT to certain commercial districts. The MU Combining District simply allows residential uses in addition to those uses already allowed in the seven commercial zoning districts. As a result, the MU Combining District allows the combination of office, retail, commercial, and residential uses within a single development.

For additional information on the City of Austin's land development process, visit our website:

www.ci.austin.tx.us/development

Written comments must be submitted to the board or commission (or the contact person listed on the notice) before or at a public hearing. Your comments should include the board or commission's name, the scheduled date of the public hearing, and the Case Number and the contact person listed on the notice.

Comments: I want no more large or

multi-unit buildings close to my home.

Currently a large ugly building is

being constructed practically in

my backyard. Enough!

Comments: This is a logical rezoning for

this property. It is surrounded on all sides by multi family, and is amply large enough to support a multi unit bldg itself. The current building there ~~are~~ do not use the land well, and are deteriorating with age

To: Austin City Council

We, the undersigned owners of property affected by the requested zoning change described in the referenced file, do hereby protest against any change of the Land Development Code which would zone the property to any classification other than SF-3.

Reasons for opposition include:

- 1.) Any increase in building height would negatively impact the property values and livability of the abutting properties and the single family neighborhood to the west as a whole. Especially hard hit would be the abutting one story properties to the west.
- 2.) An increase in population density, height and impervious cover and a decrease in buffering vegetation does not provide a buffer or transition between the highly-saturated multifamily commercial area to the east and the single story properties and single family neighborhood to the west. In general, more not less vegetation space is needed throughout the entire area.
- 3.) An increase in impervious cover and population density would negatively impact existing noise problems in the area and existing watershed problems to the west and to the north.
- 4.) No more multi-family properties are needed in the area. Any further increase in density would result in more traffic, an increased need for city emergency services and higher noise levels throughout the area.
