The City of Austin is upgrading its wastewater collection system as mandated by the U.S. Environmental Protection Agency's Administrative Order, received April 29, 1999.

In response to the U.S. Environmental Protection Agency's Administrative Order, the City of Austin has assembled the Austin Clean Water Program to plan, design, and construct sustainable wastewater collection system improvements that will result in a collection system free from Sanitary Sewer Overflows.

The design plans for the Austin Clean Water Program: Govalle 1-East of Lamar Project require the temporary acquisition of a staging area and material storage site easement of 2.007 acres of land for a 27 month duration across property located at 2505 Thornton Road, Austin, Travis County, Texas.

An independent third-party appraisal has established the fair-market value of the proposed easement at \$258,750. The owners have agreed to accept the City of Austin's offer for the temporary staging area and material storage site easement.
