The City of Austin is upgrading its wastewater collection system as mandated by the U.S. Environmental Protection Agency’s Administrative Order, received April 29, 1999.

In response to this order, the City has assembled the Austin Clean Water Program to plan, design, and construct sustainable wastewater collection system improvements that will result in a collection system free from Sanitary Sewer Overflows.

The design plans for the Austin Clean Water Program: Govalle 1-East of Lamar Project require the acquisition of a 2,604 square-foot permanent wastewater line easement, a 7,876 square-foot temporary working space easement, a 16,465 square-foot temporary ingress and egress easement, and loss of boat storage income, across property located at 3505 South Lamar Boulevard, Austin, Travis County, Texas.

An independent third-party appraisal has established the fair-market value of the proposed easements at \$132,732. The owners have agreed to accept the City of Austin’s offer for the permanent wastewater easement, the temporary working space easement, the temporary ingress and egress easement, and loss of boat storage income.
