

MEMORANDUM OF UNDERSTANDING

TO: Joe Pantalion M.O.U. # PARD-08-027

Deputy Director, Watershed Protection and Development Review Department

FROM: Stuart Strong

Acting Director, Parks and Recreation Department

SUBJECT: Waller Creek Tunnel Project - Inlet Site

C.I.P. # 4971 8207 7000 Subproject I.D.: 6521.001

DATE: 6/6/2008

The Waller Creek Tunnel Project is a proposed storm water bypass tunnel beginning with an inlet structure in Waterloo Park and an outlet structure at Lady Bird Lake near Waller Beach and the Four Seasons Hotel. The tunnel will be approximately 22-feet in diameter and almost one mile long. The project is expected to reduce the size of the 100 year floodplain of the lower Waller Creek watershed by an estimated 28 acres and allow denser development in a very desirable area of downtown. The pump station at Waterloo Park will maintain constant water flow in the creek during the dry season, thus improving water quality and allowing a creek side atmosphere for public venues or natural settings. Inlet weirs along the creek will increase the ability to maintain storm water levels and water quality by adding stilling ponds and waterfalls along the creek. The project is the first phase of an area master plan to address development, public use, hike/bike access, and aesthetics for the Waller Creek District. The tunnel project will consist of several construction projects being designed until 2009, starting construction in 2009, and planned to be substantially complete in 2014.

The estimated Project Start Date is February, 2011.

The estimated duration of the project is 915 Calendar Days.

Estimated Date of Final Completion (Restoration complete and accepted by Environmental Inspector and PARD; Parkland open for Public Use) is **December, 2014**.

Extension/modification of parkland use must receive prior written approval from PARD.

Watershed Protection and Development Review Department (WPDR) is in agreement to provide the following mitigation in return for use of the parkland:

The mitigation for this area will be for improvements to the Inlet Site at Waterloo Park.

The following improvements will be made to the area:

1.	Site re-grading and landscaping to improve use	\$908,898.00
2.	New ADA Compliant Bridges and Paths	\$219,381.00
3.	New Public Restrooms in Park	\$105,000.00
4.	Hardscape venue area (Accessible load bearing roof)	\$259,589.00
5.	New equipment delivery road to eliminate Park vehicle damage	\$8,275.00
6.	Area irrigation system	\$192,648.00
7.	New Park Scenic overlook with educational signs	\$20,064.00
	Total Mitigation work to be performed	\$1,713,855.00

PARD Calculated Mitigation

\$1,693,480.00

If for some reason, the above mitigation plan cannot be implemented, then WPDR will continue to work with PARD to negotiate an alternate mitigation plan during negotiations for use of the Inlet Site. If the project requires additional time for staging other than the dates stated within this agreement, PARD must agree in writing to such an extension and, if approved, WPDR will be responsible for compensating PARD at the same calculated daily rate as stated within this MOU.

WPDR Point of Contact is: Gary Jackson (512) 974-7115

PARD Point of Contact is: Ricardo Soliz (512) 974-6765

Parks & Recreation Board Approval: June 24, 2008

(Required by Chapter 26, Parks and Wildlife Code)

City Council Approval:

Acting Director, Parks and Recreation Department
