EXHIBIT G

The following calculation is intended to allow the City to collect from the district's utility customers upon annexation of the district, sufficient funds for payment of debt service remaining on certain facilities financed with district bonds. The facilities to which the surcharge applies are described at Article III D. 6 of this agreement.

FORMULA FOR SURCHARGE CALCULATION:

$$1) \quad A = \frac{P i}{1 - (1 + i)^{-n}}$$

$$2) \quad \frac{A}{12 \times \text{ESFCs}} = \text{Monthly Surcharge per ESFC}$$

A = Total annual surcharge to be collected from MUD customers

P = Total bond principal outstanding for bonded facilities to which the surcharge applies, including the pro rata share of non construction costs, see note a.

i = Average annual effective interest rate on the outstanding bonds

n = Number of years remaining in debt retirement period

ESFCs = Total number of equivalent single family customers connected to the district utility system, adjusted as required by note b.

a. P may be reduced by the amount of district funds identified for debt service on bonded facilities to which the surcharge applies if the funds are made available to the City at annexation. No other credits or reductions to P are allowed.

b. If full build out of the district has not been achieved at the time of annexation, the number of ESFCs used in the surcharge calculation should be adjusted in order to estimate a levelized district surcharge that will yield a surcharge revenue stream equal to the present value of the applicable district debt. The adjusted ESFCs may be calculated using an expected annual growth rate to discount the expected total ESFCs, similar to a present value calculation.
