This City of Austin improvement consists of construction of 350 linear feet of 8-inch diameter Ductile Iron Class 250 Pipe, drain valves, wet connections, gate valves, and other apparatus within Texas Department of Transportation (TxDOT) Roadway Construction. All construction dates are dependent upon TxDOT letting which is tentatively schedule for September 2009. Due to the potential for unknown subsurface conditions and utility conflicts, a 25% contingency has been included to allow for the expeditious processing of any change orders.
