

SECOND / THIRD READINGS SUMMARY SHEET

ZONING CASE NUMBER: C14-2008-0115 – William Cannon

REQUEST:

Approve second / third readings of an ordinance amending Chapter 25-2 of the Austin City Code by rezoning property locally known as 4808 West William Cannon Drive (Williamson Creek Watershed – Barton Springs Zone) from single family residence standard lot (SF-2) district zoning to neighborhood commercial – mixed use – conditional overlay – neighborhood plan (LR-MU-CO-NP) combining district zoning with conditions. The Conditional Overlay limits impervious cover to 8.64% (8,100 square feet) which is the amount that presently exists on the property. The Recreation Easement is for a depth of 175 feet from the north property line. Use of the easement is for recreational purposes, including the construction, operation, maintenance, repair, replacement and upgrade of a park, greenbelt, and hike and bike trails.

DEPARTMENT COMMENTS:

On January 15, 2009, the Applicant and the Neighborhood have reached agreement that the following items be placed in a Conditional Overlay:

- Limit the impervious cover to 8,100 square feet (8.64%).
- Prohibit the following uses: consumer convenience services, congregate living, custom manufacturing, financial services, food sales, general retail sales (convenience and general), guidance services, off-site accessory parking, pet services, plant nursery, printing and publishing, restaurant (general and limited), residential treatment and service station.
- The maximum height is 35 feet.
- A 25-foot wide building setback is required along the east property line.
- A 15-foot wide building requirement is required along the west property line, unless the subject property and the adjacent property to the west are developed as a unified development.
- A 25-foot wide vegetative buffer is required along West William Cannon Drive.
- A 50-foot wide building setback is required along West William Cannon Drive.

The Applicant and the Neighborhood have also agreed to a private restrictive covenant that will cover restrictions for a jewelry store use, signage and lighting; require screening for front parking areas and dumpsters; require architectural standards for new buildings; establish business hours of operation; and require screening of a retention/filtration facility.

A valid petition of 74.45% has been filed by the adjacent property owners in opposition to this rezoning request.

The Conditional Overlay and Recreation Easement incorporates the conditions imposed by the City Council at First Reading.

OWNERS: Marcus Whitfield and Eskew Place, Ltd. (Gail and Marcus Whitfield).

AGENT: McClean & Howard, L.L.P (Jeff Howard).

DATE OF FIRST READING: October 23, 2008, approved LO-MU-CO with conditions, on First Reading (5-1, Morrison – nay; Martinez – off the dais).

CITY COUNCIL HEARING DATE: January 29, 2009

CITY COUNCIL ACTION:

ORDINANCE NUMBER:

ASSIGNED STAFF: Wendy Rhoades
e-mail: wendy.rhoades@ci.austin.tx.us

ITEM No. 84
4808 William Cannon

AGREED MOTION ON SECOND READING

LR-MU-CO

1. Conditional Overlays:

- Limit impervious cover to currently existing impervious cover (approx. 8100 sqft)
- Prohibit the following commercial uses: Consumer Convenience Services, Consumer Repair Services (except for locally owned jewelry store with no more than 2 locations), Financial Services, Food Sales, General Retail Sales (Convenience) (except for locally owned jewelry store with no more than 2 locations), Off-Site Accessory Parking, Pet Services, Plant Nursery, Printing and Publishing, Restaurant (Limited), Service Station
- Prohibit all industrial uses
- Prohibit the following civic uses: Congregate Living, Convalescent Services, Group Home I, Group Home II, Guidance Services, Residential Treatment and Telecommunication Tower
- Any new building on the Property replacing the existing building will be located outside of the Critical Water Quality Zone and demolished areas will be revegetated
- Total building square footage not to exceed 5000 square feet
- Max. Height is 35 feet measured from grade to highest point of the roof
- 25 foot building setback from the east property line
- 15 foot building setback from the west property line, unless the property and adjacent property are developed under as a unified development
- 25 foot vegetative buffer from William Cannon (except for driveway, utilities and signage)
- 50 foot building setback from William Cannon

2. Additional Conditions of Zoning

- A. Recreation Easement recorded for trail along Williamson Creek (*NOTE: the easement has been drafted and field notes have been prepared. The Easement will be recorded at 3rd reading*).
- B. Private Restrictive Covenant with Neighborhood with following terms:
- Jewelry Store use (if any) ⁵to be restricted for local store with no more than 2 locations, no other retail uses allowed
 - In the event of major redevelopment, screening of front parking areas will be provided at least 7 feet tall consisting of vegetation and/or stone or brick walls
 - Providing for signage restrictions as follows:
 - i. Main identification sign is to be native stone (limestone) or brick with a maximum height of 6 feet plus an appropriately landscaped 18 inch berm or sign base; sign to be positioned for safe ingress and egress to the site. Additionally the sign is not to be internally illuminated in accordance with City of Austin Code as of November 2008 and is not to contain any changeable letter or electronic message sign. The sign may be ground

illuminated only if landscaping is provided to screen the lighting components from street view.

- ii.* Building signage is to be Class A signage (no painted signboard or plywood; no channel letters or cabinets unless variance granted prior to manufacture and/or installation by Western Oaks Property Owners Association).
 - iii.* Banners are allowed for the first 30 days of occupancy (90 days in the case of a private school advertising enrollment) to announce opening and two ten day periods yearly. No other temporary signage is allowed at any time. Signage advertising the property for sale or lease is excepted from the temporary signage limitation.
- Architectural Standards for new buildings
 - i. 75% of building native stone or brick (not including windows and doors)
 - ii. Earthtone colors
- Business hours of operation to receive customers Monday through Friday 7am-9pm; Saturday through Sunday 9am-6pm
- Any Retention/filtration facility screened to Western Oaks residents and White Elm residents.
- If development is subject to site plan review, all items in this agreement to be included in notes on site plan.
- Lighting to meet dark sky standards as established in other covenants with Western Oaks POA.
- For major redevelopment, dumpster is to be screened and fully enclosed with attractive materials from William Cannon and White Elm residents. Service only between the hours of 8am-6pm.
- Streetscape landscaping is to be maintained as current with minor trimming allowed. If redevelopment occurs, with rear parking, landscaping in front of any new building is to have a residential "look and feel" (trees and shrubs) to make any new building generally consistent landscaping in the Western Oaks neighborhood. If redevelopment occurs with front parking, parking area is to be screened by landscaping and/or stone wall such that vehicles are screened from the street as described above

ZONING CHANGE REVIEW SHEET

CASE: C14-2008-0115 – William Cannon

[M. DEALEY; S. KIRK – 2ND] (7-0) T. ATKINS; C. EWEN – NOT ARRIVED YET

August 12, 2008: *TO DENY THE APPLICANT'S REQUEST FOR LR-MU DISTRICT ZONING.*

[P. HUI; P. CAVAZOS – 2ND] (5-2) C. EWEN; M. DEALEY – NAY; J. REDDY; C. SMALL – ABSENT

ISSUES:

On January 15, 2009, the Applicant and the Neighborhood have reached an agreement that the following items be placed in a Conditional Overlay:

- Limit the impervious cover to 8,100 square feet (8.64%).
- Prohibit the following uses: consumer convenience services, congregate living, custom manufacturing, financial services, food sales, general retail sales (convenience and general), guidance services, off-site accessory parking, pet services, plant nursery, printing and publishing, restaurant (general and limited), residential treatment and service station.
- The maximum height is 35 feet.
- A 25-foot wide building setback is required along the east property line.

- A 15-foot wide building requirement is required along the west property line, unless the subject property and the adjacent property to the west are developed as a unified development.
- A 25-foot wide vegetative buffer is required along West William Cannon Drive.
- A 50-foot wide building setback is required along West William Cannon Drive.

The Applicant and the Neighborhood have also agreed to a private restrictive covenant that will cover restrictions for a jewelry store use, signage and lighting; require screening for front parking areas and dumpsters; require architectural standards for new buildings; establish business hours of operation; and require screening of a retention/filtration facility.

On October 23, 2008, the subject property (designated as Tract AG on the Future Land Use Map) was approved for Neighborhood Mixed Use designation on 1st Reading (5-1, Morrison – Nay; Martinez – off the dais).

A valid petition of 74.45% has been filed by the adjacent property owners in opposition to this rezoning request.

The Oak Hill Combined Neighborhood Plan and associated rezoning cases were approved with conditions at the July 8th Planning Commission meeting and are scheduled for the August 28th City Council meeting. Neither the Neighborhood Planning Contact Team nor the Staff recommended a base district zoning change for the subject property and the recommended Future Land Use Map category was Single Family. However, the property is proposed to receive the –NP, neighborhood plan combining district suffix through the neighborhood plan rezonings.

The Applicant has met with the Western Oaks Property Owners Association and the Westcreek Ranch Homeowners Association to discuss the zoning change, and would like to discuss the Staff recommendation.

The Hill Country Conservancy and the Austin Parks Foundation have each provided a letter of support for a conservation easement along Williamson Creek, which extends through the rear of the property.

DEPARTMENT COMMENTS:

The subject unplatted tract contains one single family residence, has driveway access to West William Cannon Drive and is zoned single family residence standard lot (SF-2) district. The tract is situated between a condominium development to the east (SF-6) and single family residences on large platted tracts to the west (SF-2). Williamson Creek flows through the property on its north side and forms the southern boundary of the Westcreek subdivision. Western Oaks subdivision is to the south (SF-2). Please refer to Exhibits A (Zoning Map), A-1 (Aerial View) and A-2 (100-year floodplain).

The Applicant proposes to rezone the tract to the neighborhood commercial – mixed use (LR-MU) district and convert the existing residence to either an office use or a personal

improvement services use, and potentially develop a retail sales use along the William Cannon frontage.

Although the property is situated on a major arterial roadway, commercial development and zoning along this segment of William Cannon is generally reserved for sites located at intersections. A rezoning to a non-residential district would be inconsistent with the neighborhood plan rezonings and would set precedent for office or commercial use in similar locations. In addition, the Critical Water Quality Zone and the Water Quality Transition Zone (CWQZ and WQTZ, measured from the centerline of Williamson Creek) occupies a significant portion of the site, thereby constraining site development. As the property is unplatted, impervious cover is limited to 15 percent of the net site area (the area outside of the CWQZ and the WQTZ). Due to the environmental constraints and the residential character of this portion of William Cannon Drive, the Staff is recommending that the SF-2 zoning be maintained.

EXISTING ZONING AND LAND USES:

	ZONING	LAND USES
<i>Site</i>	SF-2	One single family residence
<i>North</i>	SF-2	Single family residences within the Westcreek subdivision
<i>South</i>	SF-2	Single family residences within the Western Oaks subdivision
<i>East</i>	SF-2; SF-6	Williamson Creek; Condominiums of Westcreek Ranch
<i>West</i>	SF-2	Single family residences on large lots within the Bridle Path Estates subdivision

WEST WILLIAM CANNON DRIVE

EXHIBIT A

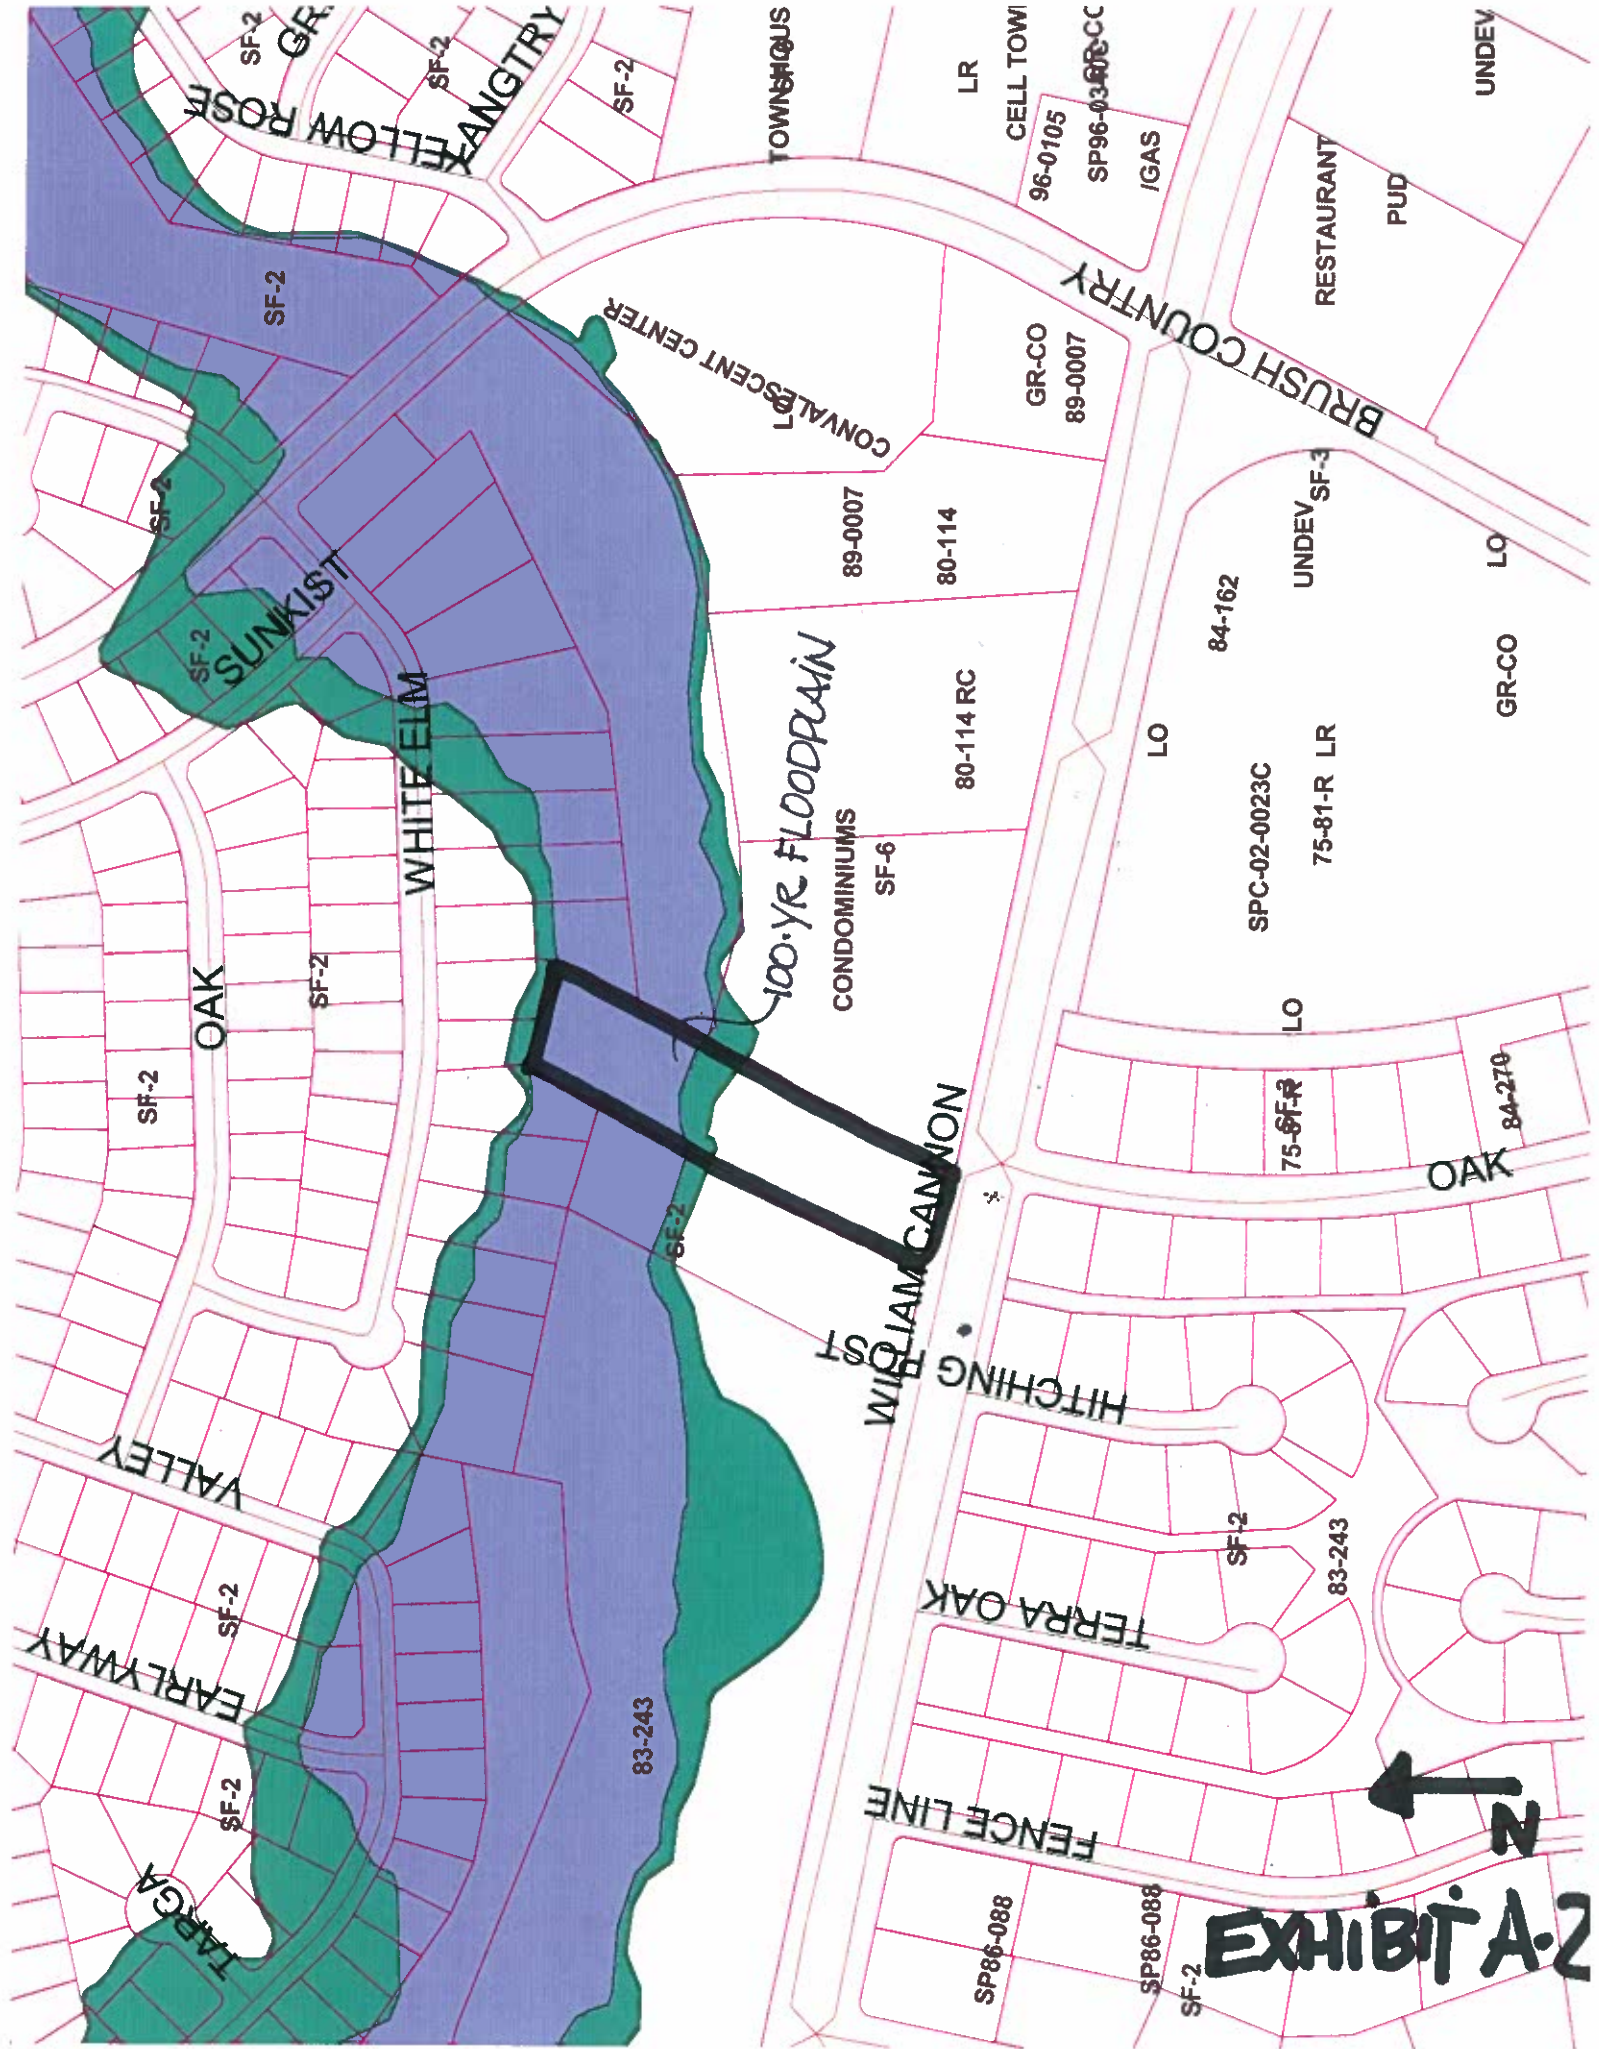

EXHIBIT A-2

SUMMARY STAFF RECOMMENDATION:

The Staff recommendation is to maintain single family residence standard lot (SF-2) district zoning.

BASIS FOR LAND USE RECOMMENDATION (ZONING PRINCIPLES)

1. *The proposed zoning should be consistent with the purpose statement of the district sought.*

The LR, Neighborhood Commercial district is intended for shopping facilities that provide limited business services and offices to the residents of the neighborhood, such as consumer repair services, food sales, service stations, and pet services. The purpose statement listed in the City of Austin *Land Development Code* states: "The Neighborhood Commercial district is the designation for a commercial use that provides business service and office facilities for the residents of a neighborhood. Site development regulations and performance standards applicable to a LR district use are designed to ensure that the use is compatible and complementary in scale and appearance with the residential environment." The mixed use (MU) district is intended to allow for office, retail, commercial and residential uses to be combined in a single development.

2. *Zoning changes should promote an orderly and compatible relationship among land uses.*

Although the property is situated on a major arterial roadway, commercial development and zoning along this segment of William Cannon is generally reserved for sites located at intersections. A rezoning to a non-residential district would be inconsistent with the neighborhood plan rezonings and would set precedent for office or commercial use in similar locations. In addition, the Critical Water Quality Zone and the Water Quality Transition Zone (CWQZ and WQTZ, measured from the centerline of Williamson Creek) occupies a significant portion of the site, thereby constraining site development. As the property is unplatted, impervious cover is limited to 15 percent of the net site area (the area outside of the CWQZ and the WQTZ). Due to the environmental constraints and the residential character of this portion of William Cannon Drive, the Staff is recommending that the SF-2 zoning be maintained.

EXISTING CONDITIONS**Site Characteristics**

The subject tract is developed one single family residence and slopes to the north, towards Williamson Creek which flows through the property on its north side.

Impervious Cover

The maximum impervious cover allowed by the LR-MU zoning district would be 15%, which is based on the more restrictive watershed regulations described below.

Environmental

This site is located over the Edwards Aquifer Recharge Zone. The site is in the Williamson Creek Watershed of the Colorado River Basin, which is classified as a Barton Springs Zone (BSZ) watershed. It is in the Drinking Water Protection Zone.

Here is a brief summary of LDC 25-8 and how it applies to this tract:

1. The SOS impervious cover limit for any kind of development within the recharge zone is 15% net site area.
2. The SOS Ordinance does not apply to a single tract of land not required to be platted if the development is either:
 - a. construction, renovation, additions to, repair, or development of a single-family, single-family attached, or a duplex structure used exclusively for residential purposes, and construction of improvements incidental to that residential use; or
 - b. development of a maximum of 8,000 square feet of impervious cover, including impervious cover existing before and after the development. (Note: Based on GIS planimetrics, the site is already over 8,000 square feet of IC and would not be able to use this exemption.)
3. However, this site is almost 100% within the Critical Water Quality Zone and Water Quality Transition Zone (except approx. 692 sq ft or 0.7% of the site according to GIS). Over the recharge zone, no development is allowed within the CWQZ or WQTZ except for minor drainage facilities and trails. (There is a one unit/three acre allowance in the WQTZ, but this does not apply in the recharge zone.) Environmental Review staff agrees that the buffer prohibitions would trump any existing tract exceptions under the SOS Ordinance itself. They would not be able to put additional impervious cover within either buffer.
4. The new BSZ Redevelopment Ordinance would not apply to this tract because it does not apply to existing residential uses.

According to flood plain maps, there is a flood plain within the project location.

Based upon the close proximity of a flood plain, offsite drainage should be calculated to determine whether transition zone exists within the project location.

The site is located within the endangered species survey area.

Standard landscaping and tree protection will be required in accordance with LDC 25-2 and 25-8 for all development and/or redevelopment.

At this time, site specific information is unavailable regarding existing trees and other vegetation, areas of steep slope, or other environmental features such as bluffs, springs, canyon rimrock, caves sinkholes, and wetlands.

Under current watershed regulations, development or redevelopment on this site will be subject to providing structural sedimentation and filtration basins with increased capture volume and 2-year detention. Runoff from the site is required to comply with pollutant load restrictions as specified in LDC Section 25-8-514.

At this time, no information has been provided as to whether this property has any preexisting approvals which would preempt current water quality or Code regulations.

Transportation

No additional right-of-way is needed for William Cannon at this time.

A traffic impact analysis was not required for this case because the traffic generated by the proposed zoning does not exceed the threshold of 2,000 vehicle trips per day. [LDC, 25-6-113]

Water and Wastewater

The landowner intends to serve the site with City of Austin water and wastewater utilities. The landowner, at own expense, will be responsible for providing the water and wastewater utility improvements, offsite main extensions, system upgrades, utility relocations and or abandonments required. The water and wastewater plan must be in accordance with the City of Austin utility design criteria. The water and wastewater utility plan must be reviewed and approved by the Austin Water Utility. All water and wastewater construction must be inspected by the City of Austin. The landowner must pay the City inspection fee with the utility construction. The landowner must pay the tap and impact fee once the landowner makes an application for a City of Austin water and wastewater utility tap permit.

Site Plan and Compatibility Standards

Site plans will be required for any new development other than single-family or duplex residential.

This site is in the Scenic Roadway Sign District. All signs must comply with Scenic Roadway Sign District regulations.

Any development which occurs in an SF-6 or less restrictive zoning district which is located 540-feet or less from property in an SF-5 or more restrictive zoning district will be subject to compatibility development regulations.

The site is subject to compatibility standards. Along the West, North, and Northeast property lines, the following standards apply:

- a. No structure may be built within 25 feet of the property line.
- b. No structure in excess of two stories or 30 feet in height may be constructed within 50 feet of the property line.

- c. No structure in excess of three stories or 40 feet in height may be constructed within 100 feet of the property line.
- d. for a structure more than 100 feet but not more than 300 feet from property zoned SF-5 or more restrictive, 40 feet plus one foot for each 10 feet of distance in excess of 100 feet from the property zoned SF-5 or more restrictive.
- e. An intensive recreational use, including a swimming pool, tennis court, ball court, or playground, may not be constructed 50 feet or less from adjoining SF-3 property.
- f. No parking or driveways are allowed within 25 feet of the property line.
- g. A landscape area at least 25 feet wide is required along the property line. In addition, a fence, berm, or dense vegetation must be provided to screen adjoining properties from views of parking, mechanical equipment, storage, and refuse collection.

Additional design regulations will be enforced at the time a site plan is submitted.

Subject: Williamson Creek Trail - Conservation / Recreational Easement - Case C14-2008-0115
Attachments: Hill Country Conservancy Letter.pdf; AustinParksFoundation-Letter C14-2008-0115.pdf

Ms. Rhoades,

I am Vice-chair of the Oak Hill Trails Association and I would just like to share with you some comments about the Williamson Creek Trail that is in the Oak Hill Neighborhood Plan. I am speaking on my own behalf because this opportunity just appeared to us and the Oak Hill Trails Association has not had a chance to vote on this issue.

Attached are two letters of support from the Hill Country Conservancy and the Austin Parks Foundation for the contiguous connection of the Williamson Creek Trail which roughly parallels to William Cannon.

The homeowner who is asking for a change of zoning from SF2 to LO has told us that they are committed to a conservation easement and a recreational easement on the back portion of their property. The rec easement would be used for the Williamson Creek Trail of which this property is in a very critical area to ensure that we will have a contiguous trail between the Y at Oak Hill, the Oak Hill little league baseball fields at Hwy 290, to Dick Nichols Park, and across MoPac to connect to the Walk for a Day trail. The Oak Hill neighborhoods have a far-reaching goal to have this natural trail to be slowly constructed over the next 10 years. This is evidenced in the Oak Hill Neighborhood Plan of which the Williamson Creek Trail is a part.

It should be noted that the City of Austin already owns a majority of the land that constitutes Williamson Creek and in most instances the width of the land ownership is in excess of 100 feet. There is plenty of room for a 5 or 10 foot wide hike and bike trail within this swath of land. The immediate neighbors more than likely will never see or hear someone who is using the proposed trail, that is, unless they choose to recreate on the trail, which undoubtedly they will do once the trail is in place.

The Oak Hill Trails Association does not wish to get involved in the details of the zoning case, however, we do support any landowner who will provide assistance towards the building of the Williamson Creek Trail, especially when a donation of a recreational easement will help the citizens of Austin to exercise and enjoy the outdoor community space.

August 21, 2008

To: Honorable Mayor Will Wynn and City Council Members

Re: Zoning Case C14-2008-0115-4808 William Cannon Drive.

It is my understanding that the property owner, Gail Whitfield, has offered the City of Austin a conservation easement along Williamson Creek as part of her request to rezone the property from SF2 to LR. We are not familiar with all the aspects of the zoning case and do not take positions on specific projects. However, we urge the Council to consider the benefits of obtaining conservation easements along Williamson Creek as you deliberate on this agenda item.

A trail along Williamson Creek is one of twelve top-priority trails identified by the Austin Area Trails Network, a group comprised of citizens, non-profit groups and government representatives working collaboratively to plan and build a five-county trail system. The Williamson Creek Trail is envisioned to connect with Walk For A Day and Oak Hill. Obtaining easements along Williamson Creek is an important step toward effecting the vision of an extensive interconnected trail network for the greater Austin area. I believe most of the Williamson Creek corridor in this area is already owned by the City of Austin (or conservation easements are in place), with the exception of this property and two more needed to create a contiguous greenbelt. Each individual easement and "acquisition" moves us measurably closer to our goals.

Thank you for your consideration and all that you do to support a strong and vibrant parks and trails system for the City of Austin.

Sincerely,

A handwritten signature in dark ink, appearing to read "George Cofer", is written over a light-colored background.

August 20, 2008

The Honorable Will Wynn
Mayor, City of Austin
P.O. Box 1088
Austin, TX 78767

Dear Mayor Wynn,

The Austin Parks Foundation would like to address the zoning case C14-2008-0115 for 4808 William Cannon Drive. It is our understanding that the property owner, Gail Whitfield, has offered the City a conservation easement along Williamson Creek as a part of her request to rezone the property from SF2 to LR. We are not familiar with all aspects of this zoning case and have not taken a position on the item. However, we urge the council to place a high priority on the benefits of obtaining easements along Williamson Creek.

A trail along Williamson Creek is one of twelve top-priority trails identified by the Austin Area Trails Network, a working group comprised of citizens, non-profit groups and government representatives. The Williamson Creek Trail is envisioned to connect with Walk For A Day and Oak Hill. Obtaining easements along Williamson Creek is an important step to realizing the vision of an extensive interconnected trail network for Austin. Most of the creek is already City of Austin property or easements, with only this property and two more needed to create a contiguous greenbelt.

Thank you for your consideration and all that you do to support a strong and vibrant parks system for the City of Austin.

Sincerely,

Address of 4808 Wm Cannon
Rezoning Request: Austin, Texas 78749

To: Austin City Council

We, the undersigned owners of property affected by the requested zoning change described in the referenced file, do hereby protest against any change of the Land Development Code which would zone the property to any zoning classification other than SF-2.

Petitioners state the following reasons for the protest:

- Oak Hill Neighborhood Plan and FLUM as well as City Planning Commission Staff support the subject property as SF-2.
- City of Austin's focus is on nodal commercial growth at major intersections such as the one at Wm Cannon at Mopac rather than expansion of mid-block commercial growth.
- Existing retail and office space is available in the surrounding area negating the need for additional mid-block expansion.
- Rezoning would establish a precedent for the rezoning of the Wm Cannon property between Brush Country and McCarty Lane.
- Adjacency – surrounding property on all sides is zoned SF, making this 'pocket' zoning.
- Subject property has significant CEFs (Critical Environmental Features) and it is located in the Edwards Aquifer Contributing Zone, in the Drinking Water Protection Zone and is located within the endangered species survey area.
- Commercial development of the property will exacerbate flooding along Williamson Creek and may increase pollution in the creek.
- Re-zoning this property will reduce trees, vegetative cover and native habitat when impervious cover is increased. Several 'protected' oak trees exist on the property.

Address of 4808 Wm Cannon
Rezoning Request: Austin, Texas 78749

To: Austin City Council

We, the undersigned owners of property affected by the requested zoning change described in the referenced file, do hereby protest against any change of the Land Development Code which would zone the property to any classification other than SF-2. Sec. 1-2-1 of the Land Development Code, Protest of a Proposed Rezoning, states that:

a proposed rezoning shall not become effective except by the favorable vote of three-fourths of all members of the Council, if a petition has been filed, signed by the owners of 20% or more of

- 1) the land included in such a proposed change, or
- 2) the land immediately adjoining the same and extending 200 ft. there from.

Petitioners state the following reasons for the protest:

- Oak Hill Neighborhood Plan and FLUM as well as City Planning Commission Staff support the subject property as SF-2.
- City of Austin's focus is on nodal commercial growth at major intersections such as the one at Wm Cannon at Mopac rather than expansion of mid-block commercial growth.
- Existing retail and office space is available in the surrounding area negates the need for additional mid-block expansion.
- Rezoning would establish a precedent for the rezoning of the Wm Cannon property between Brush Country and McCarty Lane.
- Adjacency – surrounding property on all sides is zoned SF-2, making this 'pocket' zoning.
- Subject property has significant CEFs (Critical Environmental Features) and it is located in the Edwards Aquifer Contributing Zone, in the Drinking Water Protection Zone and is located within the endangered species survey area.
- Commercial development of the property will exacerbate flooding along Williamson Creek and may increase pollution in the creek.
- Re-zoning this property will reduce trees, vegetative cover and native habitat when impervious cover is increased. Several 'protected' oak trees exist on the property.

The signatures to follow represent 20% or more of the owners of the land immediately adjoining 4808 W. William Cannon and extending 200 ft. there from. Thank you for your consideration and attention to this matter.

Respectfully Submitted,
