Mr. Efrain V. Avila proposes to validate development on his property for a residential remodel that converted the garage to conditioned space at the single-family residence at 306 Heartwood Drive. The property is entirely within the 25-year floodplain and the 100-year floodplain of Williamson Creek. The development is the subject of Building Permit application number 2009-033439 PR.

The development included converting approximately 340 square feet of garage area into conditioned space. The applicant seeks variances to the City of Austin's floodplain management regulations to: 1) alter the structure in a way which increases its nonconformity; 2) not provide normal access from the building to an area that is a minimum of one foot above the design flood elevation; 3) not require the finished flood elevation of the converted area to be one foot above the design flood elevation; and 4) to exclude the building footprint from the drainage easement.

The depth of water at the curb of 306 Heartwood Drive and at the existing house is approximately 6.9 feet during the 100-year flood event and 3.9 feet during the 25-year flood event.
