**MBE/WBE:** This contract will be awarded in compliance with Chapter 2-9A of the City Code (Minority Owned and Women Owned Business Enterprise Procurement Program) by meeting the goals with 11.40% MBE and 4.78% WBE subcontractor participation.

**Boards and Commission Action:** Recommended by the Water and Wastewater Commission.

---

The two projects are part of the Water Conservation Task Force recommendations. The abandoned 24-inch Govalle and 12-inch Jimmy Clay force mains will be rehabilitated and converted to reclaimed water mains. The 12-inch line will improve reliability to the Jimmy Clay golf course and will also allow repumping from golf course ponds to the Onion Creek Soccer Fields, a new utilization of reclaimed water, replacing current potable use for irrigation.

The 24-inch line extends reclaimed water service 8,000 feet closer to Guerrero Park and the Montopolis area. Plans are under design for the Montopolis main. In addition, plans are under design for a reclaimed water main in Guerrero Park through an agreement between AWU and PARD.

The work consists of flushing the existing abandoned 24-inch and 12-inch force mains, rehabilitating 13 manholes, replacing nine air relief valves, replacing six valve box lids, making two interconnections with associated 12-inch valves and adding 84 feet of 24-inch pipe to the end of the 24-inch abandoned force main.

The contract allows 210 calendar days for completion of this project.
