Unavailability or shortage of funds shall not constitute force majeure for purposes of this Plan.

#### **SUMMARY OF THE WATER AND WASTEWATER UTILITY SERVICE EXTENSION POLICY**

The following information is a summary of the Austin Water Utility Service Extension Policy, as set out in Chapters 25-1 through 25-5 and 25-9 of the Austin City Code, in conformance with the

Texas Local Government Code requirement that the Plan have a summary of the service extension policy.

Water and wastewater service is only provided to lots that have been properly subdivided and platted or are a legal lot. For property that is required by subdivision regulations to construct water or wastewater facilities connecting to the City system, funding and construction of those facilities will remain the responsibility of the developer. If the specific undeveloped property does not have City water or wastewater service fronting the property, the owner may make an application for an extension of service to the Director of the Austin Water Utility for review. If the Director determines that adequate capacity is available, or will be, and if the project does not include City cost participation or reimbursement, and if the proposed facilities are a logical extension of the City's water and wastewater system and the requested extension otherwise meets the requirements of Chapter 25-9, the extension size, capacity, and routing may be approved by the Director for funding and construction by the developer.

Depending on the size of the new facilities and other conditions, with City Council approval, the City may reimburse the developer for part of the cost of constructing certain facilities. With City Council approval, the City may cost participate by reimbursing costs associated with the oversize capacity of wastewater mains larger than 8 inches but less than 18 inches in diameter, and of water mains greater than 12 inches but less than 24 inches in diameter. With City Council approval, the City may reimburse to the developer the construction cost of the full capacity of wastewater facilities 18 inches in diameter or larger, and water facilities 24 inches in diameter or larger, as well as other facilities such as reservoirs or pumps. The actual calculation of the cost participation and reimbursement amounts, including limits and the schedules for the payments, are included in the Land Development Code.

For lots served by an existing on-site well or septic system that have water or wastewater lines within 100 feet of the lot at the time of annexation, the owner will not be required to pay the impact fees if a tap permit is obtained by the property owner on or before the second anniversary of the date of annexation. For lots served by an existing well or septic system that do not have water or wastewater lines within 100 feet of the lot, the owner will not be required to pay the impact fees if a tap permit is obtained by the property owner on or before the second anniversary of the date of acceptance of the water or sewer line to within 100 feet of their lot. In either case the owner will still be required to pay other applicable connection fees.

As long as a property is using a septic system, the property owner remains responsible for the operation and maintenance of the septic system. If the septic system fails before the City sewer service is extended to the property, the property owner must repair the system. Under certain circumstances the Austin/Travis County Health and Human Services Department may require connection to the City sewer facilities.

This policy is set by the City Council and can be amended in the future by ordinance.
