Subject: Opposition to proposed Mueller power substation @ Old Manor & 51st.

Dear Ms. Joi Harden:

I'd like to express my concerns about the safety and health hazards that will be posed by this substation to our children and community. I'm particularly concerned about the potential effects of electric and magnetic fields emanating by such power substation. Additionally, the negative impact to the property values of surrounding neighborhoods will be immense particularly the adjacent school (APA) and community center (ICGA). Therefore, I'd like to express my strong opposition to the proposed power substation and would kindly request that the City of Austin reconsider its rezoning plan for this location. Thank you for your attention regarding this matter.

Ms. Joi Harden

Hello and Good Morning,

Hope your day is going good. I just like to bring a very important issue to your attention. As a member of ICGA we all are very concern about a re-zoning request from Austin Energy to build a power substation to support the Mueller development project. I would like you to pls stop this for the sake of our members who worked hard to put a Islamic center for future generation. I hope and trust in God that you will not support this project.

Thanks

The Planning Commission

City of Austin

Subject: Proposed Power Sub-Station at Manor Road

I have been living in Austin for the past 3 years with my wife and two children. One of the attraction for my move to this city was the religious and educational services offered by the Islamic Center of Greater Austin (ICGA), located at 5110 Manor Road, Austin.

I have recently learned of a decision by the City of Austin to build a power sub-station literally a few feet from my place of worship and the school where my kids study. This is very disturbing to me and to the many people who worship at the mos ICGA to worship and/or send their kids to school at Austin Peace Academy, an accredited, private school, which is located inside the ICGA campus. As a community member and parent, I am deeply concerned about the potential for these children to be exposed to the deadly effects of EMF radiation. I do not have to elaborate on the myriad scientic studies that have been conducted in this field to prove my claim.

I have also been made aware that the decision "not" to locate the subject station at the very Mueller development that it will primarily serve, is for aesthetic reasons. If indeed this is true, this is really appalling and grossly outrageous that the City would even consider the proposed site as an alternate location for the sub-station though knowing well this is right next to a school where >180 students attend classes every day.

I hereby appeal to you deny the proposed rezoning of the property at the 51st Street/ Manor Road intersection. I am sure there are more suitable locations in the City for such an installation that will have minimal adverse affect on the health of our peoples.

I trust that the City Council will make the right choice in this matter.

Sincerely,

Shaik Mohseen

Address of Rezoning Request: 2403 E. 51st Street, Austin, TX 78723

TO: PLANNING COMMISSION

Respected Members of the City of Austin Planning Commission:

My name is Bassel Tizani. I have been a resident of City of Austin since 2002.

I live in SW Austin with my wife and four children. I moved to Austin because my family and I like to receive the community services offered by the none profit Organization on 5110 manor Road Austin tx 78723.

I just learned that City of Austin considering rezoning subject Land was taking from religious organization by mandate not by choice. The land was taking for drainage easement and would not be used for any power station or any other major utility structure

Across from the subject land, there is my four children full time school. Building a power plan will put my children and other student attending K-11 grad at high risk of health hazards posed by the proposed substation just few feet from their school. Part of the same building on 5110 manor road is used for religious services (Masjid). Many Family spend lots of hours on the weekend at the Masjid. The community members use the Masjid will be exposed to the site effect of big power plant next to their worship place.

I appeal to city of Austin Planning Commission to deny the rezoning. Deny the rezoning would prevent putting the student and the faculty at the Austin Peace Academy and the other community members who used the Masjid at 5110 manor Rd in harm way.

Sincerely,

Bassel Tizani

Subject: keeping Austin vibrant: no power plant on old manor & 51st

Dear Ms. Joi Harden,

My name is Amir Ahmed and I am native Austinite. I've seen Austin's Muslim community grow from a tiny congregation that used to meet in a small UT apartment home off of Nueces, to a community of over 5,000 spread across 5 mosques throughout our great city. This explosive growth is the fruit of over 20 years of hard work, dedication, and sacrifice from the members of my community. We built our institutions in various parts of the city in hopes that we could bring positive impact to not only our community, but to the Greater Austin community as well. The Manor Masjid, close to the Mueller shopping area, is one of the core components of our infrastructure. We chose that location because it was our hope that the area would be in the vicinity of people who needed the help of our community. Recently, I learned that the city is considering building a sub-station power plant to help with energy demands from the Mueller development project. While I understand the planning commission's desire to keep up with the city's increasing energy needs, the building of this power plant would greatly reduce the quality of our organization's programs and our future prospects for growth in the area. Also, since the mosque doubles as a private charter school, the decline in property value and the potential health effects from the electric and magnetic fields emanating from the sub-station are of great concern to the well being of the school and students. Therefore, I suggest the City choose a different location in lieu of the proposed location at Old Manor and 51st, a location away from communities and neighborhoods that contribute to Austin's vibrant culture. Thank you for your time. It is greatly appreciated. If you have any question or comments, please do not hesitate to get in touch with me.

Sincerely,

Amir Ahmed

Subject: Rezoning Request from Austin Energy at Manor & 51st street

Hello Ms. Joi Harden,

My name is Ayman Kabire and I am a member of the *Islamic Center of Greater Austin*. I am writing to you in regard to the rezoning request from Austin Energy to Build a Power sub-station to support the Mueller Development Project. As you are aware, the proposed location of this sub-station is across from the ICGA property. As a practicing Electrical Engineer, I am well aware of the health side effects of such stations on neighboring areas. The electromagnetic fields generated as a result of these stations have long lasting and devestating effects on Humans who stay in close proximity to these stations. Our center is used as a worship place as well as a school and a community center. Our kids spend 6 - 7 hours daily in this property and we are exteremly concerned of possible side effects on our children due to the placement of this substation across from the school/property. In addition, this will adversely affect the area and the property value in the area. I am strongly opposed to this rezoning request and I am willing to bring forth my concerns to people in charge. Thank you for taking the time to read my concern and I look forward to seeing the outcome of my concern.

Have a great day

Sincerely,

Ayman Kabire Electrical Engineer @ National Instruments

Subject: Appeal to relocate the Power Substation for Mueller

Hello Ms. Jarden,

It recently came to my attention that City of Austin is planning to build a power substation literally feet away from where my son is going to school at the Austin Peace Academy campus. This was quite a shock for me, and many of the parents of the 180+ kids who go to school here. It is very concerning to me as a parent that these children would be exposed to potentially dangerous side effects of being exposed to EMF radiation as concluded by scientific studies at the national level.

I understand that the decision was made to not build the substation in the Mueller development, the community that it will primarily serve, for reasons of aesthetics. This seems more outrageous that a site next to a school was chosen totally disregarding health concerns of children in a relatively less fortunate neighborhood, in favor of the appearance of an upscale neighborhood.

I appeal to you to relocate the substation to a more suitable area. I trust that the City Council I have known to decide and act wisely over the years, will not let us down.

Thank you, Abu Sanaullah

Subject: Mueller development project and impact to my ICGA

Dear Mrs. Harden.

I tried to reach you by phone to express my objection, your email seems to not be working right,

Dear ICGA team, Please forward my objection immediatly if you have the correct email address as the one you have provided is not accurate!

Mrs. Harden.

I STRONGLY DISAGREE with the Power substation in our community center, Please put yourself & your family in our position!!! PLEASE BE CONSIDERATE of our KIDS and potential HEALTH HAZARDS

It is unfortunate I am on business travel out of town this week; otherwise you will find me there in person to express my strong opposition to this project. This project will affect my immediate family, my community, all the neighborhood.

As I ICGA Member and on behalf of many members that I spoke with about the subjects, we are very concern; we all take our children for activity on a weekly basis. It is not fair for the city of Austin to really do this in an area that is regularly frequented by hundreds of kids if not thousands. Are they aware there is an actual elementary school in the property next door?

I urge you to be our voice in front of the city council and to urge them to reconsider as we are very concern because of the followings:

- 1- Safety and health hazards posed by the proposed substation to our children
- 2- Potential health effects of the electric and magnetic fields (EMF) emanating from such substations

While the above are our main concern, we also care about the look of our community center just for future considerations:

We are worried about the negative impact to our center from the appearance as it is does not look nice to look at a power grid or any unattractive future project while we are watching our kids in the playground. It is neither a good appearance nor an aesthetic appeal of the neighborhood.

I will recommend for the City of Austin to consider Mueller site as the place to accommodate the need for Mueller power substation, after all their community may figure out how to address their need. We do not want to feel are taken advantage as our Ex- land originally belonged to ICGA and was captured by the city of Austin with the intent of a drainage easement but not for a power substation.

On behalf of my community, my immediate family, my kids who love to frequent the center. I do not want to tell them no in the future because of this nor I will give up my fight to continue objecting to this project. You will be destroying a spirit of the community that is been serving the city of Austin for many years, please show support and reconsider your decision.

Thank you for consideration and for your support

Sincerly yours! Best Regards Chak Chakir ICGA Member cchakir@yahoo.com

Subject:

Objection to power plant at Manor-51st Street location

Dear Ms. Harden,

I am writing to you in reference to the proposed zone change to construct a power plant at the Manor and 51st Street location. I believe the power lines and other electro-magnetic fields would be hazardous to the health of children and the adults attending the Peace Academy located just across the street from the proposed site. The power lines could also be an obstruction to any future constructions in that property of the Islamic Center of Greater Austin (ICGA). Such a power plant construction in this neighborhood is a very bad idea on several accounts (which I am sure other members of the community have expressed).

Based on the above-mentioned concerns, I strongly object to the proposed plan to construct an electric power generation plant at the Manor-51st Street location.

Thank you very much for your time and consideration.

Sincerely, P.A.M. Abusali

Subject: Request to move proposed Electrical substation across ICGA property

Hi Ms. Joi Harden,

It is my pleasure to introduce myself as a Muslim Community member in greater Austin. I came to know that the City of Austin is considering a rezoning request from Austin Energy to build a high power substation for the Mueller development project at the corner of Old Manor Rd and 51st Street. The proposed site is just across the corner from Islamic Center of Greater Austin property. The proposed site development will affect ICGA, its property interests, and interests of the community members its serve.

The purpose of the Mosque at Manor road is not only for regular daily five times prayer along with Friday prayer, but it is also a weekly social gathering for Muslim Community at greater Austin with their family. The Austin Peace Academy is also on this premises where about 200 students are attending their classes on daily basis. It is not safe for the students of APA to have a high power electrical substation close to the school.

It is my humble request for not building the Electrical Sub Station across the corner from Islamic Center of Greater Austin property and move it to a safer place.

Thanks, Abdul Mazid Product Test Engineer Cirrus Logic Inc. 1901 Via Fortuna Austin, TX 78746

Subject: Protest the rezoning at the corner of Old Manor Rd and 51tst Street

Ms. Joi Harden,

Hello. Just today I became aware of the rezoning request by Austin Energy to build a high power substation at the corner of Old Manor road and 51st street. I was very concerned when I heard about it. I have 2 daughters - who go to Austin Peace Academy (5110 Manor Rd) - located just across this property.

There are around 200 students in this school, who spend most of their daytime hours within the school campus. This includes activities in the playground just oppsite to where the substation is planning to be built.

I am worried about the effects the power plant can have on the my daughters - and the other students in the school. That is why I am protesting against this request. Please consider the lives of so many students and young kids who frequent the ICGA premises at 5110 manor Rd - and what adverse effects the power substation may have on them.

I request you to humbly reconsider this rezoning request again - and not to permit Austin Energy to build a power substation there.

Thank you,

Rumana Haque.

(Concerned parent of kids going to nearby school)

Subject: power substation

Dear Ms Harden

I am writing you to express my displeasure for considering the construction of a power substation adjacent to a property used by members of a minority community for education, religious services and social events. I have visited the place numerous times along with my family and will be very reluctant to do so should the city proceed with the proposed construction.

Why will the city not consider this construction closer to the Mueller development? Afterall, the residents of that area will benefit from this station.

I have never seen a power substation next to a church or a school. Why place one next to a mosque and a school?

As a taxpayer citizen, I urge you to refrain from proceeding with this development.

Sincerly,

Yasmeen Manzur

Subject: Protest to Austin Energy re-zoning request of the lot at the Corner of Old Manor Rd and 51st Street

Attn: City of Austin Planning Commission

Frm: Amjad Odetallah

Hello,

This e-mail is to express my opposition to re-zoning the lot at the corner of Old Manor Rd and 51st street to build a power sub-station to support the Mueller development project. Please accept my complaint against the planned project on the following grounds:

1-The negative impact that a power station would have on the property value in our neighborhood and on the value of our own property. As well as the negative impact that it will have on the appearance of the neighborhood.

2-The safety and health hazards that a power substation may introduce to the student of the school across street from the panned power substation.

3-I strongly believe that if the Mueller development area needs a power station, then the Mueller development area should accommodate the project and not push it out to neighboring communities.

4-I believe that when my community was forced to sell the lot on the corner of Old Manor Rd and 51st street to the City of Austin, our community representatives were then told that this property will be used for drainage easement and would not be used for any project that may impose any health or safety

Kind Regards,

Amjad Odetallah

Oppose to power substation for Mueller development project

Dear Ms Joi Harden,

I am writing this letter to you in regard to re-zoning request from Austin Energy to build a power sub-station to support the Mueller development project at the corner of Old Manor Rd and 51st Street.

I am a long time Austin resident and absolutely and totally oppose to this request ... This power station will be to close to our children and they will be exposed to safety and health hazards posed by this ... We must put our children and family first, I am very concerned about potential health effects of the electric and magnetic fields (EMF)

If there is a need for building the power station then redeveloped Mueller site must accommodate this request and above listed property should not be an option.

Dear Ms Harden,

It was brought to our attention that the Austin Energy is planning to build an electric substation at the corner of Manor Road and 51th Street. This property (0.5-0.75 acres) was originally purchased from the Islamic Center of greater Austin with the intent of keeping this area as drainage easement. As you may already know, there is a school operating in that land and a place of worship for thousands of citizens. The proposed substation so close to the school will have a potential hazard and heath effects of the Electric and Magnetic fields emanating from such substations.

Would you please review this matter and keep this area safe for our children and honor the city commitment to keep this area a drainage easement.

If more information is required, please advise.

Thank you

To: AUSTIN CITY COUNCIL

We, the undersigned members of the Greater Austin community of 10,000 Muslims, do hereby protest against any change of the Land Development Code which would rezone the property to P-NP (Public District) from the currently zoned GR-NP (Community Commercial District).

REASONS FOR PROTEST: The Austin Energy Mueller Substation proposed for this site should be accommodated on the redeveloped Mueller site rather than be located at the said address. The 51" Street Reclaimed Water tower and this substation would create a .25-mile frontage of utilities within a .5 -mile stretch of E. 51" Street, a City of Austin (COA) designated Core Transit Corridor (CTC). Austin Energy does not propose to meet CTC sidewalk/landscape design, and plans to remove a number of protected trees. The "Utility" designation in the Windsor Park Neighborhood Plan was presumed to be drainage easement. COA staff never disputed this during the planning process.
