SUMMARY STAFF RECOMMENDATION: Staff recommends the proposed Historic District Overlay for the subject area.

HISTORIC LANDMARK COMMISSION ACTION: Recommended the establishment of the local historic district as proposed. Vote: 6-0-1 (Myers recused).

PLANNING COMMISSION ACTION: Recommended the establishment of the local historic district as proposed. Vote: 6-1 (Hernandez opposed; Dealey and Anderson absent).

PRIOR COUNCIL ACTION: November 18, 2010: Approved on first reading only with the direction to staff to work with the proponents and opponents of the district to arrive at a great consensus. Vote: 6-0 (Spelman recused).

DEPARTMENT COMMENTS:

Background: The Hyde Park Local Historic District will be the city's third local historic district nomination, and the largest to date. Within the approximately 186 acres of the proposed Hyde Park there are 640 properties. The owners of at least 51% of the land area within the district signed a petition in support of this application. There are 480 contributing properties out of total 640 structures, meeting the additional requirement of at least 51% of the structures being built within the period of "significance," retaining their appearance, and therefore be contributing structures.

Description of the District: The district is primarily residential, although there are several churches, a historic grocery store, and some other commercial structures on the periphery and a couple of important intersections. Queen Anne and Classical Revival styles dominate the first buildings completed towards the end of the 19th century, some of which were large formal mansions, as the neighborhood was originally designed to be an upper-class suburb. After financial crises of the 1890s, many of the larger lots in the neighborhood were subdivided, and the first several decades of the 20th century saw the construction of transitional houses and bungalows on these smaller lots. The overall blend of architectural styles reflects the transition from the Victorian Age to the 20th Century and the development of Austin.

Of the 640 total properties identified within the district, 480 are contributing to the historic character of the district. Contributing structures are those which maintain a high degree of architectural integrity and were built during the period of significance for the district. This high degree of architectural and historical integrity justifies the appropriateness of a Historic District Overlay, which will provide protections against demolition of contributing structures as well as design standards for additions to existing buildings and new construction within the district to preserve the historic character of the district. There are a number of designated historic landmarks within the proposed district, as well as several examples of historic infrastructure, such as the Hyde Park Fire Station and a moonlight tower. The proposed Hyde Park Local Historic District also incorporates two existing National Register Historic Districts: Hyde Park and Shadow Lawn.

Informing Stakeholders: Prior to the Historic Landmark Commission meeting, both applicants and City staff held a meeting (June 8, 2010) for district residents and other interested citizens to explain the local historic district (HD) overlay and allow opportunities for public comment, questions and suggestions for the proposed Design Standards for new construction. The Historic Preservation Office notified all property owners and utility account holders within the subject tract of the meeting, which was held in the Boards & Commissions Room at City Hall, and provided each a copy of the proposed Design Standards.

The nominators and city staff met to revise the Design Standards, taking many of the comments received at the public meeting as well as the comments of city staff into account. The attached Design Standards reflect the incorporation of many of these comments and have been approved by the Hyde Park Neighborhood Association at their regular meeting.

On December 7, 2010, city staff hosted and facilitated a meeting between the District nomination team and stakeholders who have voiced concern and/or opposition to the proposed design standards. Prior to the December 7 meeting, City staff proposed additional changes to design standards based upon the comments of stakeholders. The nomination team met December 5, 2010 and reviewed the proposed changes. At the December 7 meeting, the changes were reviewed by the stakeholders present, and additional recommendations changes were made by several parties in attendance. The first set of attached design standards reflect the original standards presented to the Council on November 18; the second set attached design standards reflect the changes that were made after the December 7, 2010 meeting.

Conservation and Green Energy: The proponents of the Hyde Park Local Historic District have taken care to incorporate green energy and conservation precepts into the Design Standards in an effort to balance the need for energy efficiency with the historic character of the district as well as promoting the continued conscientious and efficient use of historic building stock.

CITY COUNCIL DATE: November 18, 2010
December 16:2010

ACTION: Approved on first reading only.

ORDINANCE READINGS: 1ST 2ND 3RD

ORDINANCE NUMBER:

CASE MANAGER: Steve Sadowsky

PHONE: 974-6454

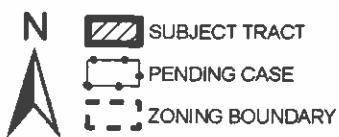

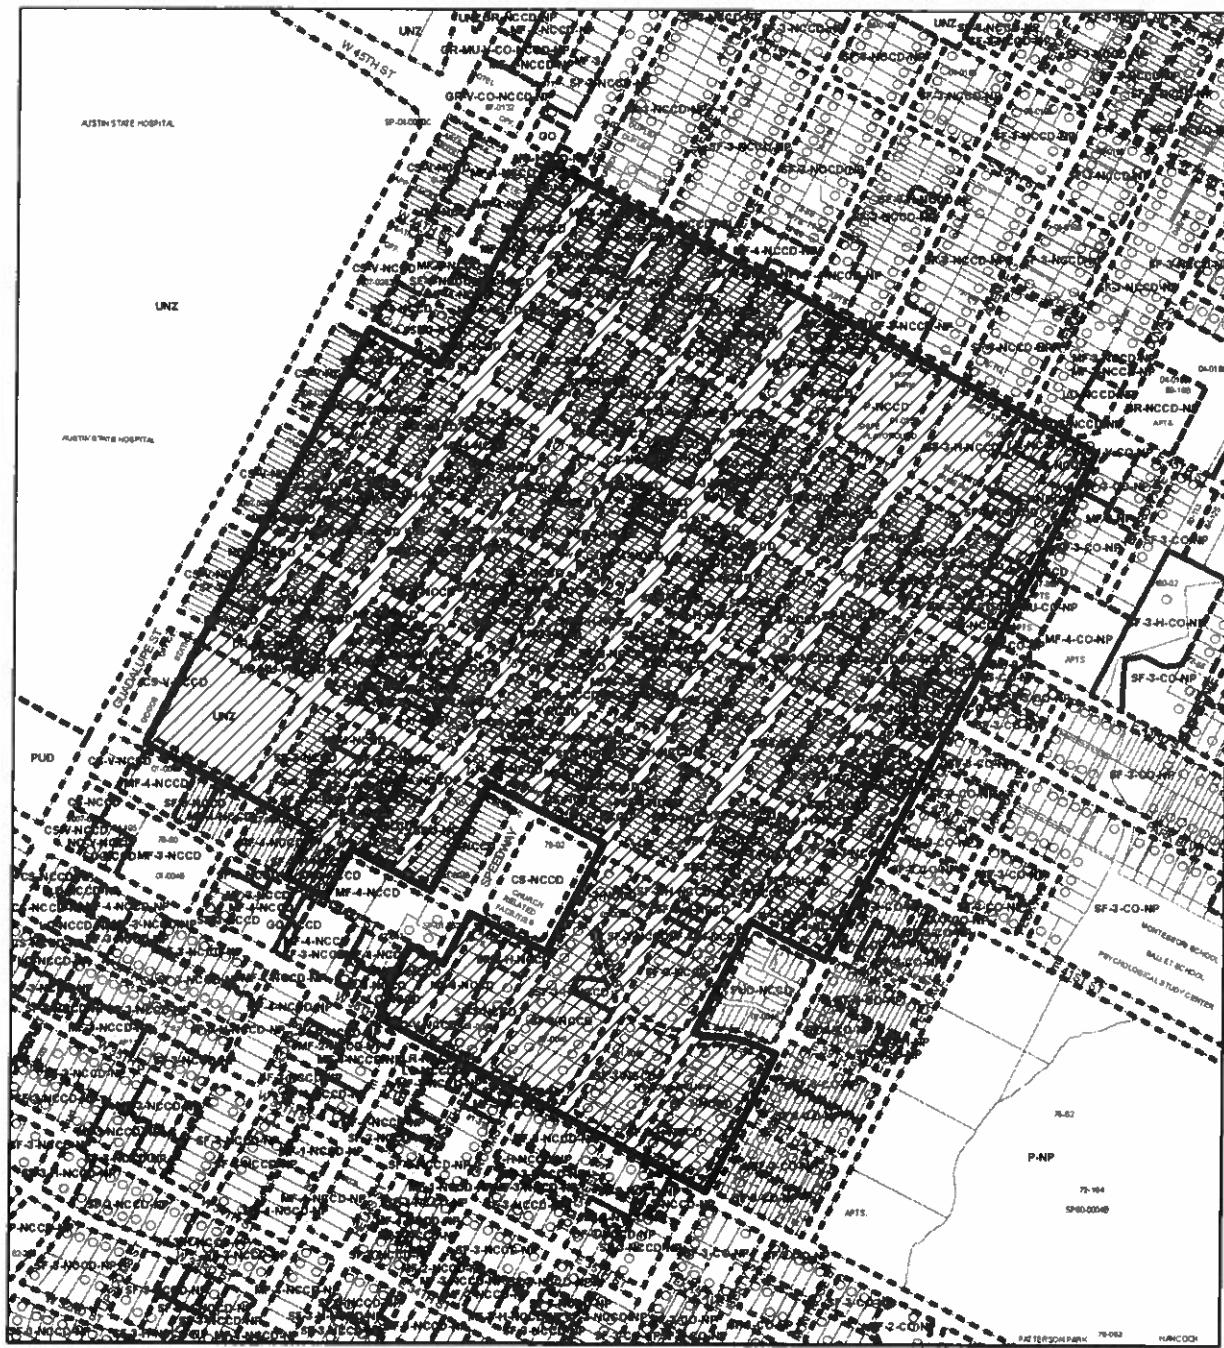

NEIGHBORHOOD ORGANIZATION: Hyde Park Neighborhood Association

BASIS FOR RECOMMENDATION:

The proposed Hyde Park Local Historic District is complete, meets all Code requirements, and has been prepared in consultation with neighborhood residents and property owners. The proposed historic district incorporates two National Register Historic Districts (Hyde Park and Shadow Lawn), and possesses a high degree of architectural and historical integrity.

LEGAL DESCRIPTION: See Exhibit C:

6. PUBLIC SPACE STANDARDS	16

Relevant Definitions

The following definitions are relevant to the understanding of this document.

Certificate of Appropriateness: The documentation provided by the Historic Landmark Commission after review of proposed changes to a contributing structure in the historic district certifying that the proposed change is in conformance with these Design Standards. Sections 25-11-2 and 25-11-212 of the City of Austin Land Development Code explain “Until a person obtains a certificate of appropriateness, demolition or removal, from the commission or building official, the person may not: (1) change, restore, remove, or demolish an exterior architectural or site feature of a designated historic landmark or a contributing structure; or (2) change, restore, remove or demolish an exterior architectural or site feature of a structure for which a designation is pending; and “Except for a change to the exterior color of a historic landmark, the prohibition of Subsection A does not apply if the historic preservation officer determines that a change or restoration (1) is ordinary repair or maintenance that does not involve changes in architectural and historical value, style, or general design; (2) is an accurate restoration or reconstruction of a documented missing historic architectural element of the structure or site, unless a variance or waiver is requested; or (3) does not change the appearance of the structure or site from an adjacent public street, and is limited to construction of (a) a ground-floor, one-story addition or outbuilding with less than 600 square feet of gross floor areas; or (b) a pool, deck, fence, back porch enclosure, or other minor feature”

Contributing Structure: “A structure that contributes to the historic character of a historic area (HD) combining district, was built during the period of significance for the district, and which retains its appearance from that time. An altered structure may be considered a contributing structure if the alterations are minor and the structure retains its historic appearance and contributes to the overall visual and historic integrity of the district. A structure is designated as a contributing structure by the ordinance establishing the historic area (HD) combining district” (Section 25-2-351 of the Land Development Code of the City of Austin).

Fenestration: The arrangement, proportioning, and design of windows and doors in a building.

Historic District: “A historic area (HD) combining district in accordance with Chapter 25-2 (Zoning)” Section 25-2-352 of the Land Development Code of the City of Austin provides that “The council may designate an area as a historic area (HD) combining district if at least 51 percent of the principal structures within the proposed district are contributing structures when the historic preservation officer certifies that the zoning or rezoning application is complete”

Noncontributing Structure: Any structure less than 50 years old is non-contributing to the District. In addition, a house older than 50 years can be noncontributing if it was not built during the period of significance of the district or if it does not retain sufficient integrity of materials and design to convey its historic appearance. Any house that was

moved into the neighborhood is noncontributing unless it was moved into the district more than 50 years ago and otherwise comports with the historic character of the district. A structure that could qualify as a contributing structure if its historic appearance were restored, as determined by the Landmark Commission, is a potentially contributing structure.

Preservation: The “act or process of applying measures necessary to sustain the existing form, integrity, and materials of an historic property. Work, including preliminary measures to protect and stabilize the property, generally focuses upon the ongoing maintenance and repair of historic materials and features rather than extensive replacement and new construction. New exterior additions are not within the scope of this treatment; however, the limited and sensitive upgrading of mechanical, electrical, and plumbing systems and other code-required work to make properties functional is appropriate within a preservation project” (*The Secretary of the Interior’s Standards for the Treatment of Historic Properties*, page 17).

Reconstruction: The “act or process of depicting, by means of new construction, the form, features, and detailing of a non-surviving site, landscape, building, structure, or object for the purpose of replicating its appearance at a specific period of time and in its historic location” (*The Secretary of the Interior’s Standards for the Treatment of Historic Properties*, page 164).

Rehabilitation: The “act or process of making possible a compatible use for a property through repair, alterations, and additions while preserving those portions or features which convey its historical, cultural, or architectural values” (*The Secretary of the Interior’s Standards for the Treatment of Historic Properties*, page 61).

Restoration: The “act or process of accurately depicting the form, features, and character of a property as it appeared at a particular period of time by means of the removal of features from other periods in its history and reconstruction of missing features from the restoration period” (*The Secretary of the Interior’s Standards for the Treatment of Historic Properties*, page 117).

The Hyde Park Preservation Plan: Overview

1. The Need for a Preservation Plan

Hyde Park has one of the largest concentrations of historic homes in the City of Austin. Its proximity to downtown and the University of Texas, along with an increasing interest in redeveloping downtown Austin, has resulted in tremendous development pressure on the neighborhood.

Local Historic District designation is intended to protect and enhance existing historic resources. By establishing local historic district zoning, the City of Austin provides a mechanism to ensure that architectural changes within the local historic district are compatible with the historic character of the district. Buildings within these districts may not have sufficient historical or architectural significance on their own to be designated as Austin Historic Landmarks, but they have significance as part of their neighborhood fabric.

2. The Overall Purpose of the Hyde Park Preservation Plan

Because of the innate historical and architectural value of Hyde Park as a neighborhood, the primary emphasis for the Hyde Park Local Historic District will be *preservation*. In so far as possible, the existing form, integrity, and materials of a historic property or a contributing structure will be maintained.

Restoration, as defined by the Secretary of the Interior Standards, is acceptable when the original appearance can be verified through photographic or other evidence.

Currently, a few historical and contributing structures originally intended as residences are being used for other purposes. As long as “those portions or features which convey its historical, cultural, or architectural values” are preserved, such compatible reuse or *rehabilitation* is also acceptable.

Hyde Park also recognizes that change is inevitable. Changes in lifestyle between 1891 and the present require different uses of space. Additions, secondary dwelling units, and new residences or commercial structures will be built.

Consequently, the aspects of the Hyde Park Preservation Plan and Design Standards that address new construction aim for appropriateness of construction, determined by compatibility of two types:

1. **Compatibility with neighborhood architectural patterns.** Despite the diversity of housing types in Hyde Park, most residential structures in the neighborhood share architectural patterns, including but not limited to an entrance in the front of the house, a front porch, a pathway from the sidewalk to the front entrance, and windows that are taller than they are wide. For a full list of Hyde Park neighborhood patterns, see *Hyde Park Neighborhood Plan* (City of Austin Ordinance No. 000413-63, August 13, 2000).

2. **Compatibility with the immediately surrounding structures.** New buildings should be reviewed in the context of their surroundings. For example, no addition to a house should cause it to be incompatible in size or form with its neighboring houses, and no new structure should be incompatible in size or form with its neighboring structures.

Designation of the Hyde Park Local Historic District does not require property owners to make changes to their properties, such as returning buildings to their historic appearance. Additionally, the review of construction projects within the district that results from district designation is limited to those projects that affect the exterior of the building and its site; interior remodeling projects do not require review and approval.

3. The Specific Goals of the Hyde Park Preservation Plan

The goals of the Hyde Park Local Historic District Preservation Plan are as follows:

- Preserve the historic fabric of Hyde Park.
- Prevent the demolition of contributing buildings in the neighborhood.
- Encourage the rehabilitation, maintenance, and retention of historic structures.
- Ensure that alterations to existing buildings are compatible with the historic character of the structure and the district.
- Assist property owners and designers in developing plans for historic properties and encourage the compatibility of new structures in the historic district.
- Encourage sustainable design and building practices in the neighborhood.

This document is a tool for the following interested parties:

- Property owners, tenants, contractors, design professionals, realtors or anyone else planning new construction or a change to the exterior or site of a building within the district.
- The Historic Landmark Commission, in its evaluation of whether to grant a Certificate of Appropriateness for any project covered by these Standards.

The Parts of the Hyde Park Preservation Plan

1. Adherence to Design Standards

Documents and City Code sections governing buildings within the Hyde Park Local Historic District include the following:

- A. The Neighborhood Conservation Combining District (NCCD)
- B. The Secretary of the Interior's Standards for the Treatment of Historic Properties
- C. The Hyde Park Local Historic District Design Standards
- D. Previous Agreements about Specific Properties in the District

A. The Neighborhood Conservation Combining District

The City of Austin Neighborhood Conservation Combining District (NCCD) (Ordinance No. 020131-20) already regulates the modification and construction of buildings and other structures in Hyde Park. It also provides for standards that affect fences, driveways,

accessory buildings, garages, maximum building coverage, maximum impervious cover, maximum height, setbacks, and building facades, among other things. In no case shall the standards established by the NCCD be invalidated by any additional standards; they may, however, be narrowed by additional standards in order to ensure compatibility with the historic patterns of the Hyde Park neighborhood, an issue which is not addressed by the NCCD.

B. The Secretary of the Interior's Standards for the Treatment of Historic Properties

This Preservation Plan adopts *The Secretary of the Interior's Standards for the Treatment of Historic Properties with Guidelines for Preserving, Rehabilitating, Restoring & Reconstructing Historic Buildings* (by Kay D. Weeks and Anne E. Grimmer, 1995, U.S. Department of the Interior). This document provides detailed descriptions and instructions for preservation, rehabilitation, restoration, and reconstruction of historic structures.

Basic standards for rehabilitation were developed in 1976 and are as follows:

- A property shall be used for its historic purpose or be placed in a new use that requires minimal change to the defining characteristics of the building and its site and environment.
- The historic character of a property shall be retained and preserved. The removal of historic materials or alteration of features and spaces that characterize a property shall be avoided.
- Each property shall be recognized as a physical record of its time, place, and use. Changes that create a false sense of historical development, such as adding conjectural features or architectural elements from other buildings, shall not be undertaken.
- Most properties change over time; those changes that have acquired historic significance in their own right shall be retained and preserved.
- Distinctive features, finishes, and construction techniques or examples of craftsmanship that characterize a historic property shall be preserved.
- Deteriorated historic features, finishes, and construction techniques or examples of craftsmanship that characterize a historic property shall be preserved.
- Chemical or physical treatments such as sandblasting that cause damage to historic materials shall not be used. The surface cleaning of structures, if appropriate, shall be undertaken using the gentlest means possible.
- Significant archeological resources affected by a project shall be protected and preserved. If such resources must be disturbed, mitigation measures shall be undertaken.
- New additions, exterior alterations, or related new construction shall not destroy historic materials that characterize the property. The new work shall be differentiated from the old and shall be compatible with the massing, size, scale, and architectural features to protect the historic integrity of the property and its environment.

- New additions and adjacent or related new construction shall be undertaken in such a manner that if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.

For the complete document, readers are referred to www.nps.gov/history/hps/tps/standguide.

C. Hyde Park Local Historic District Design Standards

The Design Standards itemized in this document (beginning on page 11) are in addition to those of the NCCD and the Secretary of the Interior's Standards. The Hyde Park Local Historic District Design Standards provide a guide for decision-making for changes in the exterior appearance of buildings and sites within the Hyde Park Local Historic District.

D. Previous Agreements about Specific Properties in the District

- For specific properties where zoning was carefully crafted and agreed to between the neighborhood and property owners, specifically Part 5 (Hyde Park Civic District), and specific properties noted at 4307 Speedway contained in Ordinance NO: 020131-20, as well as the zoning for 511 W. 41st per Ordinance 20088065-062, the neighborhood and property owners strongly urge the Historic Landmark Commission to respect those agreements in their determination of a Certificate of Appropriateness.
- For the property located at 4300 Speedway, no shed roofs shall be permitted. Otherwise, the standards established for that property by Ordinance No. 0201131-20, which created the Hyde Park Neighborhood Conservation Combining District, together with the commercial design standards for development along urban roadways as set forth in Subchapter E of Chapter 25-2 of the City Code, shall fully constitute the applicable design standards for 4300 Speedway. Those collective standards for 4300 Speedway are incorporated in this preservation plan by reference. Applications for exterior changes, including those for demolition, relocation, and building permits, shall be reviewed by the historic preservation officer and the Historic Landmark Commission under the City Code's guidelines for review in a National Register Historic District. This provision shall govern over anything else in this preservation plan.

2. Educational Efforts

The Hyde Park neighborhood, primarily through the agency of the Hyde Park Neighborhood Association, conducts a variety of educational efforts:

- Articles in the monthly neighborhood newsletter, the *Pecan Press*
- Presentations at the monthly neighborhood association meetings
- Special meetings when required
- A yearly homes tour designed to exhibit historic and contributing houses, accompanied by a booklet that describes the history of the houses
- A website that includes historical information about the neighborhood and links to relevant preservation and design resources

Hyde Park intends to continue these educational efforts in order to raise the level of knowledge and awareness about the historic significance of the neighborhood among both Hyde Park residents and the larger city of Austin. It also intends to post this preservation plan and design standards document on its website, as an educational measure.

3. Regulation Procedure Overview

Every application for a building permit for a new structure, an addition to an existing structure, or the replacement of doors, windows, and roofing materials within a Local Historic District must be routed through the Historic Preservation Office and, if necessary, the Historic Landmark Commission for a review for appropriateness. Only after a Certificate of Appropriateness is issued can a building or demolition permit be issued.

A. Review by the Development Review Committee

The HPNA Development Review Committee will work with developers and home owners to resolve **all** questions of proposed development in advance of permitting and construction.

B. Requirement of a Certificate of Appropriateness

Most construction activity that affects the exterior or site of a building within the Hyde Park Local Historic District must be approved by the Historic Landmark Commission with a Certificate of Appropriateness before a building permit is issued by the City of Austin. A Certificate of Appropriateness is not required for remodeling of the interior of the building or for routine maintenance. The City of Austin Historic Preservation Office will review applications for projects that involve the replacement of doors, windows, and roofing materials to determine if a Certificate of Appropriateness issued by the Historic Landmark Commission is necessary.

Applying the Design Standards in this document and the requirement of City Code, the Historic Landmark Commission will review all applications regarding contributing and new structures for the following:

- Exterior changes to existing buildings and sites, including but not limited to the construction of additions, the installation of new windows, doors, or roofs, and the modification of porches.
- New construction.
- Proposed demolition of existing buildings.
- Relocation of existing buildings into or out of the Hyde Park Local Historic District.

The Historic Preservation Office performs a preliminary review of the application. The Historic Landmark Commission can grant the Certificate, require modification to the plans, or deny the Certificate. Denials can be appealed to the appropriate land use commission and after that to City Council. The Historic Preservation Office will not release a demolition or relocation permit for an existing primary structure within the

district until the Historic Landmark Commission has granted a Certificate of Appropriateness for the replacement building. The Historic Preservation Office has the authority to approve minor projects without requiring a full review by the Historic Landmark Commission.

4. Periodic Review

This Preservation Plan is not intended to be static. It is subject to periodic review.

Design Standards

Text in italics describes characteristics of existing structures in Hyde Park.

1. General Standards

1.1: Prevention of Demolition

Demolition of any contributing structure, is strongly discouraged under all circumstances. No person shall demolish a contributing structure or any exterior part of any contributing structure within the local historic district without prior approval by the Historic Landmark Commission with a Certificate of Appropriateness. Demolition permits on primary structures within the district will not be released until the Historic Landmark Commission has granted a Certificate of Appropriateness for the replacement structure.

In no case shall the maximization of energy efficiency be used as a reason to demolish a historic or contributing structure, or to change a structure in such a way that its historic features are compromised to the extent that the building can no longer maintain its historic appearance and/or be considered contributing to the historic character of the district. Hyde Park recognizes that the greenest house is one which has not been torn down and taken to the landfill.

1.2: Retention of Historic Style

Respect the historic style of existing structures and retain their historic features, including character-defining elements and building scale. Avoid alterations to the existing fabric of historic buildings.

1.3: Avoidance of False Historicism

Avoid alterations that have no historic basis and that seek to create the appearance of a different architectural period. For example, do not add Victorian trim to a 1920s bungalow or bungalow details to a 1950s ranch-style house or cottage.

1.4: Sequence of Appropriate Treatment Options for Contributing or Potentially Contributing Structures

Repair rather than replace deteriorated historic features and architectural elements. If an existing architectural feature cannot be readily repaired, the replacement shall match the historic feature in size, scale, and materials. When the original materials of a structure are deteriorated beyond the point of repair, substitute identical recycled historic materials in its place.. Reconstruct or rebuild missing architectural features with photographic or physical evidence as your guide. Use new materials that duplicate the form and material of the original materials (based upon photographic or other evidence) as a last resort.

1.5: Energy Efficiency

Recommendation: Construction of any new structures or alterations of existing structures shall be done in such a way as to maximize energy efficiency.

2. Residential Standards: Single Family and Contributing Multifamily

Preservation and Restoration

2.1: Front of Houses

Houses in Hyde Park uniformly face the street, generally with a visible front door and with windows facing the street.

Retain the original front facade of a house in terms of door and window placement, and exterior wall materials. No changes shall be made that compromise the status of the house as a contributing resource in the Hyde Park Local Historic District. Repair damaged or deteriorated exterior wall materials to the greatest extent possible.

Doorways on the primary façade are an important architectural feature. Do not enlarge, alter, or relocate doorways. Retain original entry doors. In cases where replacement of an original entry door is required, or where the house does not have the original door, choose a replacement door that is compatible with the historic character of the house in terms of design and materials. Retain the glazing (window or glass) in its original configuration on doors that contain glass.

Recommendation: Look to other houses of similar age and style in choosing a replacement door, or consult publications or catalogs dealing with houses of the same age and style as yours.”

Rainwater collection systems that are visible from the public street must use traditional materials such as metal and wood; use of PVC containers or piping is not permitted within the public view.

2.2: Windows

Original fenestration is character-defining for a building. In Hyde Park, most old windows are old-growth pine or cypress and are 50 to 100 years old. Original steel-casement and other types of windows are also still extant in Hyde Park. With proper restoration, these units will likely outlast many modern products.

Maintain, repair, and restore, if necessary, the original placement, style, design, materials, and glass of windows and screens. Energy efficiency of original windows can be improved by using methods that do not damage historic sashes, glass or frames to weatherstrip, insulate weight pockets, add insulated glass (and necessary additional balancing weights) or add clear interior film or any combination of these approaches. Do not use tinted glass or tinted film if it is not original to the house.

2.3: Porches

Front porches are an integral part of the character of homes in Hyde Park. Consider the architectural style of the house if making decisions about changes to the front porch.

Maintain original front and street-side porches. Do not enclose open front and street-side porches. Other porches, including second floor front porches, may have screening over the original openings.

2.4: Lighting

Exterior lighting has traditionally been located on the ceilings of porches (thus minimizing light pollution and emphasizing the entry) or on the wall adjacent to the entry.

Retain the original location and fixture style of exterior lighting. If replacement of the original fixture is necessary, choose a fixture compatible with the historic character of the house. Avoid gas lights or other large fixtures such as lanterns which have no historic basis in the district.

2.5: Roofs

The most common roof forms in Hyde Park are hipped, gabled, and combinations of hipped and gabled roofs. Roofs are generally more complex for Queen Anne styles and simpler for the bungalows and other twentieth century buildings. Roofs often included dormers. There are examples in Hyde Park of flat roofs, but those are not typical of the roofs of the primary structures for contributing residences in the neighborhood.

Traditional roof materials were wood shingles for main roofs and corrugated metal for outbuildings. There are also examples in Hyde Park of metal shingles. Occasional nineteenth century residences had metals roofs, but during the twentieth century, metal roofs were not considered appropriate for residences. Wood shingles were replaced by composition shingles in the early- to mid-twentieth century. Metal roofs returned in popularity as an energy saving approach in the last 20 years of the twentieth century.

Retain the original roof pitches and profiles on the building. Avoid changes to roofs on the front of the building. Avoid adding to the eave height of original roofs, especially at the front of the structure. Retain historic dormers. In replacing roof materials, consider first the use of the original material, then the use a product that resembles the original material, such as a fiberglass or other energy-efficient shingle. Metal roofs are also acceptable. Do not use shaped, scalloped or diamond shingles unless they were original to the building. Preserve original gable/attic vents and roof brackets.

Photovoltaic and solar thermal installations on existing contributing buildings must be designed to be in scale with the existing structure's roofline, and must not damage historical architectural features or materials. These roof systems must be on the same plane as the roof. The colors of the panels must be compatible with surrounding roof materials.

Recommendation: Consider replacing any original dormers that can be documented when roof work is done.

2.6: Chimneys

Maintain existing chimneys. If an existing chimney must be rebuilt, use original or identical replacement materials. In no case may a wood-framed chimney with wood-siding finish be added to the historic part of a contributing structure.

2.7: Garages

Garages have traditionally been located to the rear of the lot and separate structures. They are constructed in a simple but complementary design to the main building.

Retain the original materials and roof pitch of a detached garage. Maintain the historic siding of the garage. The addition of second floor space requires new structural work. In that event, retain salvaged historic siding for reuse on the new structure. If that is not possible, refer to section 1.4 for the sequence of appropriate treatments. Refer to New Construction for standards.

Recommendation: New doors to garages should be of a style appropriate to the age and architecture of the garage.

3. Residential Standards: Single Family and Multifamily New Construction

3.1: Houses

Local Historic District designation does not prevent change, but instead provides design parameters that work with the special character of the district. Hyde Park recognizes that any new residential structure should reflect its time; consequently, contemporary design for new residential construction is appropriate, as long as it fits the architectural patterns of the neighborhood and its immediately surrounding structures. Items of most concern are finished floor height, floor-to-floor heights, roof heights and pitches, fenestration pattern, porch size and location, setbacks, and an overall scale that reflects neighborhood patterns.

Use massing, scale, and architectural elements typical of the contributing buildings on the block when designing a new building. The geometry of new house construction shall be in a scale with contributing buildings on the same block. When applying for the courtesy review by the Hyde Park Design Review Committee or the Historic Preservation Office and Historic Landmark Commission, be sure to include photographs of all existing adjacent buildings and any other buildings on the block which have inspired design choices for the new construction.

Design fenestration to be similar to the character of fenestration in contributing structures on the block. Use windows without false divided lites.

A half-story approach for second story space is more prevalent in Hyde Park than full second stories and maintains a scale in character with existing houses; consider a half story design for second floor space for new houses. Locate new dormers and gables on the sides and rear of the structure.

Front porches on new construction are not necessary, but if present, they must be at least 7 feet deep.

Raise porch and first floor levels for new houses to a height comparable to existing houses with pier and beam construction, even if new construction is on a slab.

Recommendation: Minimize light pollution with the location and style of exterior lighting.

Use roof forms traditionally used on contributing Hyde Park houses, such as hipped, gabled, or a combination of hipped and gabled. Use a simple roof form whenever possible to be more compatible with the simple forms of bungalows and other twentieth-century structures. Shed roofs are appropriate on attached porches but not main structures.

Locate the entrance to the building on the front, facing the street. If it is necessary to add a doorway on a secondary facade, it shall be of a size and shape that does not detract from the original fenestration pattern of the house.

Use wood siding, cementitious siding, brick, or stone exterior materials that are complementary with those of nearby contributing structures.

3.2: Additions

Items of most concern are finished floor height, floor-to-floor heights, roof heights and pitches, fenestration pattern, porch size and location, setbacks, and an overall scale that reflects neighborhood patterns.

Construct additions so as to require the removal or modification of a minimum of historic fabric. Do not construct additions which will require the removal of any portion of the front façade.

Design additions to existing residential buildings to reflect the form and style of the existing house. Design an addition to be subordinate to the original house in terms of size, scale, and massing.

Locate new additions and alterations to the rear or rear side of the building so that they will be less visible from the street. Extend the existing roof line in the rear of the house to accommodate an addition wherever possible. Make the pitch and height of the roof of the addition compatible to that of the existing house. Make windows visible from the street on any addition compatible with those on the existing house in terms of sash configuration, proportion, spacing and placement. Use exterior siding materials on the addition which match or are compatible with that of the existing house.

Construct one-story additions to one-story houses when possible, unless constrained by impervious cover restrictions or protected trees.. Design additions to have the same floor-to-ceiling height as the existing house. Locate second story additions at least 15' back from the front house wall. Design additions so that they do not overwhelm the original building. In no case transform a one-story house to a full two-story house.

Recommendation: Wherever possible, build additions in existing attic space without raising the roof height. Consider the construction of attic dormers opening to the side or rear of the house to open underused attic space. Design side wall heights on second floor additions to be in scale and proportion to the original house.

Recommendation: Where attic heights are adequate to support second floor living space, dormers or rear additions that do not exceed the original roof ridge height are preferable, as are side walls that maintain the same proportions.

Recommendation: Do not locate windows so as to invade the privacy of neighboring properties.

3.3: Chimneys

Do not locate a new chimney on the front façade. Construct chimneys of brick or stone. Do not use wood siding on a chimney. Do not use a wood-framed chimney on the historic portion of an existing contributing building.

3.4: Garages

Construct new garages to be detached and located to the rear of the lot. Design a new garage to be complementary to the main structure on the property. Do not locate garages or carports on the front façade of a building.

3.5: Garage Apartments/Secondary Units

The traditional pattern in Hyde Park for secondary units is that they face the street and they share access to parking with the primary unit except in the case of corner lots, when some secondary units face the side street and access parking from the side street.

As specified in the NCCD, garage apartments and secondary units are allowed only on lots equal to or greater than 7000 square feet in size. Design new secondary units to respect the traditional patterns of Hyde Park.

Garage apartments generally require construction of a new garage. Make new garage doors of a style appropriate to the age and architecture of the primary structure. Use single doors or a double door no wider than required for garage access. Use materials and fenestration complementary to the primary structure.

Locate the front door and windows to face the street. Design secondary units and garage apartments to complement the form, integrity, massing, materials, scale, character elements, and fenestration patterns of the primary unit.

Historic and contributing garages and carriage houses shall retain their historic appearances as garages or carriage houses when apartments are added to them.

3.6: Driveways

A single lane driveway, entered from the front of the lot and located to the side of a house, is character-defining for Hyde Park. They are constructed of gravel or runners. Parking has traditionally been located to the side or rear of the house.

Locate driveways from the front lot line along the side of the house. The NCCD specifies acceptable materials for driveways. Locate parking as required in the NCCD. Do not design or construct a circular drive in front of the house.

3.7: Fences

Fences shall adhere to the regulations set forth in the Hyde Park Neighborhood Conservation Combining District (Ordinance No. 020131-20). Design fences at a height and with materials that are compatible with the architectural character of the structure.

4. Commercial Property Standards

Commercial development in Hyde Park consists of a mixture of historic, contributing, potentially contributing and noncontributing structures. Historic and contributing commercial structures in Hyde Park share certain architectural patterns: they are one-story rectangular buildings with flat roofs and entryways consisting of double doors. At least one commercial structure, the Avenue B Grocery, has existed and served the neighborhood since 1906 and is recognized as one of the landmarks of Hyde Park.

New commercial buildings in Hyde Park shall adhere to the historic patterns of Hyde Park commercial structures. Use rectangular masonry designs with double door entries covered by an awning and appropriate fenestration. Refer to Subchapter E of the Austin Land Development Code for appropriate street frontage design.

5. Multi-family Property Standards

There are few multi-family structures in Hyde Park that date from a period of significance in the history of Hyde Park; the exceptions are covered by Residential Standards: Single Family and Contributing Multifamily. The majority of multi-family structures, in fact, are at variance with the architectural patterns of residential structures in Hyde Park. No emphasis is put on the preservation or restoration of those multi-family structures that have no historic significance and are at variance with Hyde Park architectural structures.

6. Public Space Standards

Hyde Park public space consists of streets, sidewalks, bridges, park space, public buildings, and alleys. School buildings are a significant historical feature of Hyde Park.

Maintain the width, materials, and historic location of sidewalks, retaining walls, and bridges. Maintain the historic facades of public buildings and park structures. Maintain the alleyways with traditional gravel surfaces, except where traffic levels or terrain require pavement.

Preserve and maintain contributing civic structures in compliance with the Secretary of the Interior's Standards.
