Additional Backup Information			
Chapter 26 of the Texas Parks and Wildlife Code provides that the use of parkland for non-park purposes may be approved upon a finding that there is no feasible and prudent alternative to the use of this land.			
The Watershed Protection Department is proposing to repair and construct an improved storm drain outfall on approximately 2,382 sq. ft. of parkland within Town Lake – Holly Shores Park to discharge into Lady Bird Lake. The Lady Bird Lake/East 4th Street Drainage Improvements project will reduce the localized flooding problems in the area bounded by East 4th Street between San Saba Street and Pace Street. This repair project also includes the use of approximately 5,125 square feet for temporary access and working space. Approval of the use of parkland is made on the condition that all restoration is completed in accordance with the Standard Specifications and Construction Standards of the City of Austin and the Parks and Recreation Department’s “Construction in Parks Specifications”. The Watershed Protection Department is required to pay all costs associated with the restoration and tree mitigation			

as part of the site restoration process.

There is no feasible and prudent alternative to the use of the dedicated parkland and this project includes all reasonable planning to minimize harm to such lands. The dates of public notification in the Austin American-Statesman are March 13, 20 & 27, 2011.
