Additional Backup Information

The Village of San Leanna (San Leanna) is an incorporated municipality located in the southwest portion of Travis County along FM 1626. San Leanna currently provides ground water purchased from the Barton Springs Edwards Aquifer Conservation District and wholesale water from the City of Austin (City) to approximately 200 residents.

Land belonging to the Emergency Services District # 5 (ESD) is located just east of and adjacent to the boundaries of San Leanna (within the City of Austin's CCN). The ESD desires water service for its future station and for an emergency service association building. The City's closest water main is 1/2 mile away, but San Leanna's water main is adjacent to the property. San Leanna is willing to provide interim water service until the City's infrastructure is extended to the ESD's land. San Leanna will not modify its corporate boundaries. The ESD would extend a 12-inch water main from San Leanna's infrastructure and convey that water main to the City at no cost to the City. The City would collect its fees, including water capital recovery fees and inspection fees. San Leanna would bill the ESD for water usage from San Leanna's system. Upon the City extending its water infrastructure to the ESD's land, the interconnection between the ESD and San Leanna would be disconnected.
