## Additional Backup Information

On May 4, 2009, the TCEQ issued a Texas Pollutant Discharge Elimination System, Phase II small municipal separate storm sewer system permit to Travis County. This permit requires Travis County to work cooperatively with other TPDES MS4 permit holders within the area, particularly those entities with overlapping jurisdiction, to protect water quality throughout the respective jurisdictions.

Accordingly, the City of Austin's TPDES MS4 Permit Compliance program staff within the Watershed Protection Department is working with Travis County representatives to negotiate an Interlocal Agreement that clarifies the responsibilities for implementing their respective Storm Water Management Programs within the portion of the City's ETJ that is located within Travis County.
