This contract will be awarded in compliance with Chapter 2-9A of the City Code (Minority Owned and Women Business Enterprise Procurement Program) by meeting the goals with 9.95% MBE and 4.33% WBE subcontractor participation.

Related Items:

## Additional Backup Information

This contract provides for the installation of traffic signal infrastructure including, but not limited to pole foundations, conduits, pull boxes, and loop detectors to be used by the Transportation Department to install and modify traffic signals, flashers, detectors, etc. This annual contract provides the City with the ability to construct and modify new traffic signal installation or for the replacement of existing traffic signals through-out the city on an "as needed" basis. The Indefinite Delivery/Indefinite Quantity (ID/IQ) project delivery methodology was used to account for the lack of specifically identified projects and necessitates the inclusion of an allowance. The allowance of \$200,000.00 will be used to address unforeseen work related to the installation of traffic signals and other miscellaneous items.

The contract is for twelve (12) months with two (2) twelve (12) month extension periods or until funds are exhausted. Payment for services under this contract is from various capital projects or the Transportation Department Operating Budget. This contract is anticipated to begin in August 2011.
