#### Additional Backup Information

This contract will provide replacement parts for the Atlas Copco blowers located at the South Austin Regional (SAR) Wastewater Treatment Plant – Secondary Treatment Building. Part of the biological process in the treatment of the wastewater that is processed at the SAR Treatment Plant requires dissolved oxygen and these blowers are a vital tool in that process. Without the blowers, the process would not be environmentally sanctioned and the AWU would not be able to maintain their Environmental Protection Agency (EPA) and Texas Commission on Environmental Quality (TCEQ) permits and would not only pollute the river but would also be subject to large daily fines.

Atlas Copco Comptec LLC is the sole manufacturer and distributor of these blower parts.
