Boards and Commission Action:	To be reviewed by the Electric Utility Commission on September 19, 2011 and Resource Management Commission on September 20, 2011.			
MBE / WBE:				
Related Items:				
Additional Backup Information				

The Austin City Council established a strategic energy policy for Austin Energy through the adoption of Resolutions 030828-38 and 030925-02. These resolutions and Austin Energy's Generation Plan calls for the development and use of clean energy by Austin Energy and sets a goal of 35% of its energy from renewable energy sources by December 31, 2020. The recommended project offers Austin Energy competitively priced renewable energy and environmental attributes and the opportunity to continue progress towards its renewable goal.

This contract will provide for the purchase of the full output of an approximately 200-megawatt wind power project to be constructed by Iberdrola Renewables, Inc. in Kenedy County near the small town of Sarita, Texas. The new wind project is expected to come online by the end of 2012 and will comprise approximately 84 wind turbines.

This agreement will run for a term of up to 25 years and will not require Austin Energy to invest any funds in the construction, operation, or maintenance of the project during that period. The agreement will provide for a non-escalating fixed price of between \$35 and \$45 per megawatt-hour of energy produced, the quantity of which will vary in accordance with the actual availability of wind resources. It may also provide for an option for Austin Energy to purchase the project at a future date. Authorization and funding to complete such a purchase will be subject to further Council approval.

Council Resolution No. 20110310-003 prohibits the City Manager from placing a request for approval of any acquisition of more than 10 megawatts of power on a Council agenda without first presenting it to Council and allowing for public comment at a separate meeting. Staff therefore seeks Council's authorization to proceed to seek final approval of this agreement.

PRICE ANALYSIS

- a. Adequate competition.
- b. One hundred eighty-two requests for pricing were issued. One hundred twenty-seven proposals were returned.
- c. Proposal provides for a utility scale wind power plant.

APPROVAL JUSTIFICATION

- a. Top three evaluated proposals.
- b. The recommended awardee meets the requirements of the Request for Proposal.
