Additional Backup Information

This Amendment is for a medical surveillance program required for approximately 300 Austin Energy personnel performing various activities that may involve gradient levels of contact with asbestos, lead, Polychlorinated Biphenyls (PCBs) and Cadmium, and/or excessive noise exposures. The Occupational Safety and Health Act (OSHA) of 1970 requires annual and periodic testing for employees who have this type of exposure. The U.S. Environmental Protection Agency (EPA) also requires employees who work in removing asbestos to have a medical surveillance examination to monitor asbestos-related health problems and to ensure employees are wearing protective equipment while working.

This contract was competitively bid and awarded administratively in 2009 for a 12-month base period in the amount of \$45,598 with three extension options. Funding in the amount of \$45,598 for the exercise of the first extension option was added administratively. This recommended Council action is to approve Amendment No. 2 for \$45,598 for the second extension option and the authorization to enter into the final option period for \$45,598, for a final contract value of \$182,392.
