Commission
Action:

MBE / WBE:

This Interlocal Agreement is exempt from the MBE /WBE Ordinance. This exemption is in compliance with Chapter 2-9C of the City Code (Minority –Owned and Women-Owned Business Enterprise Procurement Program). No subcontracting opportunities were identified; therefore, no goals were established for this contract.

Related Items:

Additional Backup Information

Under this Agreement, the City will acquire 813 square miles of 6-inch pixel resolution orthoimagery in the Austin area. This is second generation digital imagery in which the photographic image has been adjusted to correct for topographic relief, camera lens distortion, and camera tilt, so one can measure true distances on the photo.

Data will be delivered in a digital format, which will be shared by all departments working on Geographic Information Systems (GIS) related projects. This data is designed to meet the immediate needs of the City's strategic initiatives for homeland security, public safety, infrastructure management, and land development activities.

The aerial photography will update 2009 photography that supports the "Base Map" for all users within the city and the public at large. This data can be used for site checks, analyzing and depicting crime scenes, demographics, land use, determination of drainage fees, traffic analysis, and general change analysis. Various work groups can locate, reference, or verify mapped and unmapped features using the aerials. Desktop availability of this easily understood graphic information improves decision-making, and minimizes time spent on field checks and information-gathering.

The Interlocal Agreement between the City of Austin and Capital Area Council of Governments will be in effect from the date signed until September 30, 2012.
