Additional Backup Information				
<p>The City of Austin (Austin) and the City of West Lake Hills (West Lake Hills) executed a wholesale wastewater agreement for the provision of wastewater service to West Lake Hills on May 3, 2001. To date, West Lake Hills is in full compliance with the terms and conditions of the agreement. As of January 2012, West Lake Hills has connected 368 single-family residential lots and 42 commercial customers in accordance with the terms of the agreement. The contract limits the amount of wholesale wastewater service to 800 gpm peak wastewater flows. Currently, the highest amount of peak wastewater flow since the execution date of the agreement is 335 gpm.</p> <p>The amendment to the wholesale wastewater agreement would not increase the amount of wastewater service provided by Austin (i.e., the level of service would remain at 800 gpm peak wastewater flows).</p>
