

Revisions and Additions to the EUC 2011 Annual Review Report

Add underlined language to the 3rd bullet under 1.B.:

- Elimination of Funding of EGRSO by AE and applying those funds to restore energy efficiency programs to 2011 levels and applying the remainder to the Repair and Replacement Fund

Add the following language regarding work on revising the Competitive Matters Resolution to Section 1.B.:

“In March 2011, the Electric Utility Commission completed its work, initiated in 2010, of improving transparency at Austin Energy by having two additional public hearings on the dual needs of transparency and data privacy, before the City council approved a new Competitive Matters resolution included in Attachment A. That Competitive Matters Resolution restructures the approach to transparency at Austin Energy as it assumes all information is public unless there is a specific reason it should remain confidential, which reverses the prior assumptions.

The Electric Utility Commission continued to improve transparency by receiving public input and providing guidance to staff on how the Austin Energy Annual Performance Report could include more detailed information in a manner more accessible to the general public. After two public hearings on the topic, the staff prepared a revamped form of annual report, which was approved by the EUC in November 2011. That new form of annual report is included in Attachment A.”

A copy of the Competitive Matters Resolution and the Annual Performance Report FY 2010 will be added to Attachment A.

Add to the list of resolutions/recommendations under 1.B.:

Rescinding the Probability of Dispatch methodology
(And add a copy of the Resolution to Attachment A.)
