## Additional Backup Information

In February 2012, Austin Energy executed an agreement with ADHP, LLC, a Delaware Limited Liability Company, to provide chilled water-cooling services to the Hyatt Place Hotel located at 211 E. Third Street in Austin, Texas.

This request seeks authorization to complete the purchase of heat exchangers and related piping, as necessary, to provide the service to the customer as specified in the multi-year chilled water services agreement between Austin Energy and ADHP, LLC. Austin Energy will recover the cost for these reimbursable items as part of the agreement.

The environmental impact associated with this project using Austin Energy's District Cooling services over a conventional on-site, air cooled chiller is 227,500 kWh per year. The savings is equivalent to 147.2 tons of CO2 or the planting of 5,045 trees.
