Additional Backup Information

Austin Energy requests authorization to issue a rebate to Dell Computers, Inc. in an amount not to exceed \$127,158 for the installation of Custom Data Center Heating, Ventilation and Air Conditioning (HVAC) retrofits in accordance with the City of Austin's Commercial Rebate Program guidelines. This program is one element of Austin Energy's comprehensive Resource, Generation, Climate Protection Plan to 2020, approved in April 2010 by City Council, designed to reduce local air pollution through energy conservation, to reduce peak demand, and to assist customers in reducing electric consumption.

Dell Computers, Inc. is located at 701 E. Parmer Lane in Austin, Texas. The demand kilowatt (kW) savings associated with this energy efficiency project is estimated at 390.7 kW, at a program cost of \$325.46 per kW saved. The avoided kilowatt hours (kWh), estimated at 3,550,977 kWh per year, represents a major benefit to the local environment. This project will prevent the following air pollutants from being emitted: 2,132.2 metric tons of Carbon Dioxide (CO2), 1.344 metric tons of Sulfur Dioxide (SO2), and 1.486 metric tons of Nitrogen Oxides (NOX).

In addition to the reduced air and toxic metals pollution, the project savings are also equivalent to an estimated	
4,787,365 vehicle miles traveled, the removal of 408.5 cars from our roadways, or the planting of 54,778 trees or 2,739	
acres of forest in Austin's parks.
