Related Items:	
----------------	--

MBE / WBE:	This Cooperative Purchase is exempt from the MBE /WBE Ordinance. This exemption is in compliance with Chapter 2-9D of the City Code (Minority-Owned and Women-Owned Business Enterprise Procurement Program). No subcontracting opportunities were identified; therefore, no goals were established for this contract.
------------	--

Additional Backup Information

This equipment shall be used to implement Phase 1 of the Advanced Traffic Management System (ATMS) and will be used for collection of traffic volume and speed along different arterials in the City. They would also be used to identify unusual traffic patterns caused by incidents and unplanned events.

The collected data is sent to our traffic management center to help improve the flow of traffic by determining appropriate signal patterns. Also, using the embedded algorithm of the ATMS, the collected data will be used to estimate fuel consumption, stops, & delays, and other related Measures of Effectiveness (MOE's) along different roadways throughout the City. Without system detectors, the ATMS will not receive the data needed to adjust traffic signal patterns based on traffic flow or to provide MOE information to the public.

Twincrest, Inc. dba Twincrest Technologies, Mansfield, TX, is under contract with HGAC to supply these materials and services statewide as a result of a competitive bidding process.
