Councilwoman Cole,

The board of directors of the CORE Health Foundation supports the move of the proposed ADA Wheelchair Accessible Fishing Pier from the trail behind Holiday Inn to the 'International Shores' portion of the trail at Lady Bird Lake. We approve this move with the understanding that a semi-permanent pier being used for construction trucks to build the boardwalk will be designated as a permanent fishing pier for our project once some modifications take place. Our organization looks forward to working with City of Austin Parks and Public Works staff to integrate the pier into the designs for that area. Thank you for your assistance with the progress of this project.

Please contact our organization with any questions.

Sincerely,

A handwritten signature in dark ink, appearing to read "Eric Makowski". The signature is written over a horizontal line.
