about the final design concepts.

All comments collected will remain anonymous and will only be shared with the Design Competition Jury. Any contact information submitted on the reverse of this card will not be linked to your comments.

CMG and Public Architecture

really like how this team
addressed existing Austin insti-
tutions. The planning was particularly
sightful. Scheme could be
be environmentally friendly.
and layouts diversify
their than simplify the
concepts.

Michael Van Valkenburgh Associates and
Thomas Puffer & Partners

This proposal had the most
beautiful renderings and
innovative park concepts. It
did not, however, seem to
integrate Austin's unique cultural
& environmental heritage with
any degree of success.

Public Architecture

lost ambitious, but
possible for the growing
Austin population. Creative
methods to draw people in.
lost creative and enticing,
in fact.

Favorites

Michael Van Valkenburgh Associates and
Thomas Puffer & Partners

Beautiful drawings.
I doubt so many bridges
would actually be infiltrated
with people or draw so
much attraction.

Landscape and Lake Park Architects

his proposal represents the
most research & deepest
understanding of urban &
environmental conditions.
e architectural & infrastruc-
tural solutions it proposes.
However, one not particularly
ground-breaking.

Workshop: Ken Smith Landscape Architects, Ten Eyck
Landscape Architects and Rogers Marvel Architects

The board layout was jumbled-
difficult to tell which teams
worked on it. Concept seems
ecologically strong, but the
marketing of the architecture
was kitschy and unlike a
solid proposal for the future
of Austin. BAD GRAPHIC DESIGN

Landscape and Lake Park Architects

Workshop: Ken Smith Landscape Architects, Ten Eyck
Landscape Architects and Rogers Marvel Architects

CMG and Public Architecture

Michael Van Valkenburgh Associates and
Thomas Phifer & Partners

doesn't mention
how the creek
will flow with all
additions + manipulations
generally good
but arch. does not
go with surrounding buildings

not a unified
concept;
too busy

Turenscape and Lohr/Faro Architects

Workshop Ken Smith Landscape Architect, Ten Eyal
Landscape Architects and Rogers Marvel Architects

I like the
design the best,
especially the
great green
streets.

I like the
idea of density

too urban;
design interferes
with the creek +
becomes the
main focus

Best concept.
Keeps the creek
the most natural.
Enhances creek
rather than
detracting from it

CMG and Public Architecture

Michael Van Valkenburgh Associates and
Thomas Phifer & Partners

I DON'T CARE FOR
ANY IMPROVEMENT
TO WALLER CREEK!

It is not as natural
as one would like

BEST
This is the best
design. It keeps
a lot of existing
features & connects
to them. Many good

Turenscape and Lohr/Faro Architects

Workshop Ken Smith Landscape Architect, Ten Eyal
Landscape Architects and Rogers Marvel Architects

I DON'T APPEAR THAT
IN THE FUTURE
THERE WON'T BE ANY
WATER

Turenscape and Lohr/Faro Architects

Workshop Ken Smith Landscape Architect, Ten Eyal
Landscape Architects and Rogers Marvel Architects

There is a lot
of building.
Palm walk is too
structured

This has many
good ideas, especially
sustainable
landscape

CMG and Public Architecture

Michael Van Valkenburgh Associates and Thomas Plater & Partners

Nice ideas
(good presentation)
I like hanging garden
city deck

Water wheel &
medicinal herbs
look from
the Pappy Creek
level platform

Landscape and Lake/Fiero Architects

Workshop: Ken Smith Landscape Architects, Ten Eyck Landscape Architects and Rogers Marvel Architects

The plan seems
very detailed
shaded streets &
old Cypress walk
are interesting
most innovative - I
can imagine using it

Garden approach
much more
thoughtful
landscape

THANK YOU FOR SUPPORTING A BRIGHTER FUTURE ON WALLER CREEK!

CMG and Public Architecture

Michael Van Valkenburgh Associates and Thomas Plater & Partners

Seems the
most practical
and pretty but
not enough
pizzazz.

The Pappy is
ugly. The
Grove and
Lattice are nice

Landscape and Lake/Fiero Architects

Workshop: Ken Smith Landscape Architects, Ten Eyck Landscape Architects and Rogers Marvel Architects

Seems impractical (many
aspects) but
best vision for
the area

Limited vision
Limited public
access.

CMG and Public Architecture

Michael Van Valkenburgh Associates and
Thomas Puffer & Partners

- Open spaces
appealing
- implementations
explained & doable
- thoughtful approach

Turnscape and Lake/Fiato Architects

Workshop: Ken Smith Landscape Architects, Ten Eyck
Landscape Architects and Rogers Marvel Architects

- Great ideas
- nice water
feature
- overhead gardens
repeated etc
maintenance

- overly
architectural
- too much
concrete &
bridges

- Details not
consistent
- Design doesn't
flow, very
choppy

Architecture

Michael Van Valkenburgh Associates and
Thomas Puffer & Partners

★
Tremendous...
- more 'olmstedian' in terms
of urban-park interfa
- So. Shore Crossing important
- Urban treatment much more
appropriate
- Waterwheel functional, pro
- Indigenous fauna w/o full
- Poppy is good
- The Refugium functional
practical
Education
- Bikeway highlighted & ad
- less intense urban attack
- Fantastic clear graphic
- preserved Palm School
balance

CMG and Public Architecture

Michael Van Valkenburgh Associates and
Thomas Pflieger & Partners

Way too much
improvisation covered
too modernistic/
minimalist. Graphics
not well done.
worst of lot.

Very nice graphics
but too busy 'sp
age' structures the
didn't add much to
very minimal thought
given to activities

landscape and Lake/Festo Architects

Hard to get a grasp
of overall approach
some places modernistic
some natural/minimal
Cross sections don't work
for conveying 'look'. Did
one for function
ideas

Workshop Ken Smith Landscape Architect, Ten Eyck
Landscape Architects and Rogers Marvel Architects

Best overall plan
great deal of thought
given to activities
Liked naturalistic
components. Graph
OK but couldn't see
out what was where
draw

CHG and Public Architecture

Good catch to west
incorporation of many
elements upon
connectivity & transpo.

Michael Van Valkenburgh Associates and
Thomas Prifer & Partners

unique concepts seeking
some transformation
of the area, may not
be realistic financially.

Turenscape and Lake Flato Architects

I like the incorporation
of community perspective
Too much emphasis
upon aesthetics

Workshop: Ken Smith Landscape Architect, Ten Eyck
Landscape Architects and Rogers Marvel Architects

not enough exploration
on the concepts, needed
some elaboration on
the ideas.
too simplified.

CHG and Public Architecture

Two feels like a "big city" park
the spaces feel intriguing
like the swimming hole,
I didn't get a great sense
of the smaller pockets along
the creek from the display

Michael Van Valkenburgh Associates and
Thomas Prifer & Partners

I like the Grove and
Poppy a lot & would like
but it feels like a stagnant
atmosphere. It's nice but
doesn't show we are moving

Turenscape and Lake Flato Architects

Integration of the
cityscape to the Waller
Creek project is huge -
it creates an intriguing
and inviting atmosphere

Workshop: Ken Smith Landscape Architect, Ten Eyck
Landscape Architects and Rogers Marvel Architects

I really liked how the
highlighted nature -
think Waller Creek &
Austin means spots like
this - but the design
didn't showcase Austin's

CMG and Public Architecture

loved palm park!
love how functional
& played a
part in your
designs.

Landscape and Lake/Flo Architects

express walk
very Austin!
liked how you
integrated the
"skin life" in all
our plans

Michael Van Valkenburgh Associates and
Thomas Phifer & Partners

While this plan
beautiful, i don
want a little
Dallas. that
Curve wall hide
way too much.

Workshop Ken Smith Landscape Architect, Ten Eyck
Landscape Architects and Rogers Marvel Architects

i love the
simplicity of
your design
you didn't go
Crazy and let
Austin plan need a lot of help

CMG and Public Architecture

Waterloo park has a lot of
construction. Idea behind
sabin St. is nice. Palm park
development in very nice
water lakefront might be
not be realistic.
canopy walk is a nice
idea.

Landscape and Lake/Flo Architects

express walk looks very
nice. Waterloo park
may take a lot of
work. The idea behind
music bend is great.
Palm park and lady bird
parks would be a nice
refuge, but it will
need a lot of help.

Michael Van Valkenburgh Associates and
Thomas Phifer & Partners

I like the concept
of using live oaks,
the pantoen bridges
maybe too much green,
which maybe hard to maintain
the poppy will not look

Workshop Ken Smith Landscape Architect, Ten Eyck
Landscape Architects and Rogers Marvel Architects

Waterloo park has a lot of
construction.
behind sabin St.
Palm park is nice,
but ideas behind
development near
Hilton is lacking fine

Design Waller Creek:

about the final design concept
All comments collected will remain anonymous and will only be shared with the Design Competition Jury. Any contact information submitted on the reverse of this card will not be linked to your comments.

CMG and Public Architecture

Love:
Moon Garden
Lakefront
int way finding
like: Few too many
high rises (too tall)
L of play area at Palm
Park

Landscape and Lake/Flo Architects

Sabine Market St
Waterloo Park
sered Walkway
L of Building

Michael Van Valkenburgh Associates and
Thomas Phifer & Partners

Like: Palm School
Design
6th St. Canopy
Dislike: High rises
too close to creek
Waterloo Design

CMG and Public Architecture

+ "Creekside Multi-Use Trail
(12' Wide Min.)"
⇒ This design
was most explicit
about this component.
(an essential component)

Landscape and Lake/Flo Architects

Michael Van Valkenburgh Associates and
Thomas Phifer & Partners

- This one does not fully
use the natural landscape
(the creek) to provide the
best possible trail corridor
for bike mobility. Need to
minimize at-grade crossings,
minimize changes in grade (hills,
even mini-hills), minimize
sharp turns.

THANK YOU FOR SUPPORTING A BRIGHTER FUTURE ON WALLER CREEK!

CMG and Public Architecture

I like the
artsey designs
and architecture
but I think its
missing the connection
with nature. ~~like~~ like
~~the~~ kayaking, biking
etc.

Landscape and Lake/Flate Architects

I love the oasis
reminds me of
the market place
in Seattle.
Love it!!!

Michael Van Valkenburgh Associates and
Thomas Philp & Partners

I think the
connection from
nature to music
is an awesome idea
I'm not sure I like
the poppy canopy but
love everything else

I love kayaking
and walking
on trails and
biking. Love this

#1 choice
 Lots of detailed
 good ideas &
 has a sense of
 momentum.

#3 choice
 not enough activity
 to become an
 attraction
 in urban
 environment

City of Eugene
 Office of Public Architecture

Workshop: Ken Smith Landscape Architect, Ten Eyck
 Landscape Architects and Rogers Marvel Architects

#2 choice
 good details
 a bit of a sense
 of unrealistic
 vision

#4 choice
 lighting - nice

Great Vision
 Emphasis on
 trees, but
 W & Esters
 This is #1

City of Eugene
 Office of Public Architecture

Michael Van Valkenburgh Associates and
 Thomas Phifer & Partners

- Waller Lakefront
 looks like a great
 idea
 - Waterloo park
 looks too overdone,
 too much going on.
 - This design is turning
 suburbs into a lot of

- Do not like the
 structures presented
 - Enjoy the "Natural"

City of Eugene
 Office of Public Architecture

Workshop: Ken Smith Landscape Architect, Ten Eyck
 Landscape Architects and Rogers Marvel Architects

- like the design
 - looks natural
 - "Music Bend" is
 the best idea out
 of all the designs

- Good overall
 - missing some things
 such as
 - Feels like it is
 lacking something

CMG and Public Architecture

Michael Van Valkenburgh Associates and
Thomas Phifer & Partners

Too built up, too
much concrete & the
big built up bridges
& walkways on the
lakefront get a big
NO! Keep it natural.

The Habitat Refuge
looks like it has
prison walls
around it!

Turenscape and Lake/Flato Architects

Workshop: Ken Smith Landscape Architect, Ten Eyck
Landscape Architects and Rogers Marvel Architects

Like the more
'natural' look but
don't think walk-
way down center
of creek is good.
Too much letter &
disruption to wildlife.
To comment further visit: www.waller creek.org/finalfour

Might be the
best of the lot,
except please don't
turn Waller Creek
in a concrete
drainage ditch.
Put an island in
the lake & water log
part

THANK YOU FOR SUPPORTING A BRIGHTER FUTURE ON WALLER CREEK!

Please see reverse to connect with us.

for the
animals

CMG and Public Architecture

Michael Van Valkenburgh Associates and
Thomas Phifer & Partners

What are the "lattice
mushrooms"?
Too much concrete
in Palm Park

Concerned about
maintenance of
"Poppy". Not
convinced portico
bridge is good idea

Turenscape and Lake/Flato Architects

Workshop: Ken Smith Landscape Architect, Ten Eyck
Landscape Architects and Rogers Marvel Architects

Over designed. Too
much emphasis
on buildings
surrounding the
Creek.

Like contrast of
wild Waller in the
city. Minimal
competition w/
existing businesses

CMG and Public Architecture

*hammer. Had a harder time
with this one. I do
like the "wooden
mushrooms" I like
a more natural look vs.
something bright red
plastic.*

Michael Van Valkenburgh Associates and Thomas Phifer & Partners

*I did not like the
large scale cement
retaining walls on this
design.*

Turenscape and Lake/Flato Architects

*Sabine Market Street
looks great. Love the
"great streets" concept.
Not sure of all the
use of red/orange.*

Workshop: Ken Smith Landscape Architect, Ten Eyck Landscape Architects and Rogers Marvel Architects

*I like how this design
favors a more natural
look or a design that
showcases natural
beauty of Waller vs.
too much hardscaping*

To comment further visit: www.wallercreek.org/finalfour

Public Architecture

Like this one
best overall.

Michael Van Valkenburgh Associates and
Thomas Phifer & Partners

This one is
limiting
But I do like the
Lattice.

Scenic and Lake/Flato Architects

Like the
in Park &
terloo Park.
s one mixed
in CMG is the
still

Workshop: Ken Smith Landscape Architect, Ten Eyck
Landscape Architects and Rogers Marvel Architects

I don't like this
one at all.

CMG and Public Architecture

Whitaker's design -
seems expensive to
build and maintain.
It'll seem dated before
opening.

Michael Van Valkenburgh Associates and
Thomas Phifer & Partners

Like: The Grove - more
trees are always good
Dislike: The Refuge -
seems dangerous and
a haven for rapists

Scenic and Lake/Flato Architects

rowing Food here
seems impractical
& unsanitary

Workshop: Ken Smith Landscape Architect, Ten Eyck
Landscape Architects and Rogers Marvel Architects

Waller Walk = best!
This seems to be
the most practical
and easily maintained
project. Most eco-friendly

CMG and Public Architecture

like lakefront
see hanging garden
most ideas are
great!

Michael Van Valkenburgh Associates and
Thomas Phifer & Partners

love the Poppy
he thought about
parking
love the water wheel
overall great idea

Landscape and Lake/Flato Architects

not crazy
about Cypress
walk

Workshop: Ken Smith Landscape Architect, Ten Eyck
Landscape Architects and Rogers Marvel Architects

not really
unique
does not fit
for Austin

CMG and Public Architecture

Michael Van Valkenburgh Associates and Thomas Phifer & Partners

Not cohesive
East side of 35 down played - not bringing connectivity
Overall C-B

Not some of the poppy concepts
Bridge over Lady Br. should have boat access
Overall A-

Landscape and Lake/Flato Architects

Workshop: Ken Smith Landscape Architect, Ten Eyck Landscape Architects and Rogers Marvel Architects

Not Hip on Red walkway
Hard to appreciate Real estate development, too private.
Overall B

Plain & cheap looking
Very sterile compared to like the green pers.
A-

CMG and Public Architecture

Michael Van Valkenburgh Associates and Thomas Phifer & Partners

Feels over-programmed
Dislike the contrived
web of walkways
but gallery nice but
the art will fry in
there

Complicated & over-
whelming but exciting
ideas. Nice swimming
holes, green streets

Turenscape and Lake/Flato Architects

Workshop: Ken Smith Landscape Architect, Ten Eyck Landscape Architects and Rogers Marvel Architects

of the 4, shows a more
unified plan with
landmarks. Poppy is
gorgeous but not an
indigenous flower in
Austin? Best graphics
top. the map

Seems half-baked in
design but most
thoughtful in the
environmental elements

CMG and Public Architecture

Michael Van Valkenburgh Associates and Thomas Phifer & Partners

Planning process,
though well thought
out, should not
be part of design
concept.

Grandiose design
may be too costly
to implement

Turenscape and Lake/Flato Architects

Workshop: Ken Smith Landscape Architect, Ten Eyck Landscape Architects and Rogers Marvel Architects

Everything in Austin
does not have to
have a musical
component

Wild creek design
even shows low
water level which
would be dry in
a drought and
hard to maintain

CMG and Public Architecture

Michael Van Valkenburgh Associates and Thomas Phifer & Partners

integrated by
bee line, but confused
Palm Park: too
much concrete.

Creek over view/look
too over designed.
Confused by the rebar
like puppy handshell

Turenscape and Lake/Flato Architects

Workshop: Ken Smith Landscape Architect, Ten Eyck Landscape Architects and Rogers Marvel Architects

Respects the nature
of Waller Creek.
Cypress walk,
music band highlights
Love Palm Park, trolley idea, green
they "get" Austin
To comment further visit: www.wallercreek.org/finalfour

too much
urbanism
fountain bad idea

THANK YOU FOR SUPPORTING A BRIGHTER FUTURE ON WALLER CREEK!

Please see reverse to connect with us.

ENJOY
with the SPLASH
PADS!! Not about
older kid.

Public Architecture

Michael Van Valkenburgh Associates and Thomas Phifer & Partners

much concrete.
"BDN" not green
gh. Waller look front
is cool though
too much concrete.

POPPY IS COOL.
Maybe Green on Habitat
Refuge walls...
Like the Bridges

Turenscape and Lake/Flato Architects

Workshop: Ken Smith Landscape Architect, Ten Eyck Landscape Architects and Rogers Marvel Architects

Public Architecture

Michael Van Valkenburgh Associates and Thomas Phifer & Partners

Green streets
ade & public access
Creek, like the
Feel of Palm Park
the wading pools
Fun for all ages
not just little kids.

Love the Grow the City
Concept - the green
Feel overall.
Play it up slides - Love
Prefer splash pad to be multi
use pool - or
water
play area.

CMG and Public Architecture

Michael Van Veenburgh Associates and Thomas Piller & Partners

like the #4 frequency of open park space. could make the creek more visible to the city - more used.

Too low density. Tree lights won't prevent vagrants at night.

CMG and Public Architecture

Michael Van Veenburgh Associates and Thomas Piller & Partners

this is really cool but there is a lot going on. Who will maintain? specialized program areas?

The Grove! - excellent group of Texas plant communities but the detail section of wall is confusing.

Turenscape and Lake/Flato Architects

Workshop: Ken Smith Landscape Architects and Rogers Marvel Architects

park space is too narrow along most of the route - would be a significant change from current status. early Bird Park looks nice

This plan does not open the creek to the city above enough. Too much opportunity for vagrants to inhabit narrow, low areas. the trail.

Turenscape and Lake/Flato Architects

Workshop: Ken Smith Landscape Architects and Rogers Marvel Architects

doesn't show a great understanding of Texas culture or flora.

like the effort to dispersed wet infrastructure, but the overall mess is weak

THANK YOU FOR SUPPORTING A BRIGHTER FUTURE ON WALLER CREEK!

is busy -
and to read
hard to
see!

Excellent vision
presentation,
good ideas &
results use.
The best

Like the focus on activities and the variety of areas of interaction.

Michael Van Veenburgh Associates and *FAU
Thomas Fisher & Partners

Like the believability of a project - doesn't seem too ambitious, but still new in forecasting. My favorite part is that it feels like Justin. Conservation is nice.

Landscape and Lake|Flato Architects

Workshop: Ken Smith Landscape Architect, Ten Eyck
Landscape Architects and Rogers Marvel Architects

and access
to water for
millions
and presented

The presentation
is a little vague
I have to work
hard to picture
the end
project.

Terrestrial and Lake Fire Archives * **PNOLITE**

I really love the idea behind this one, but it does seem really obvious. The level of interactivity and focus on nature is fantastic. Love the idea of the little communities

Workshop: Ken Smith Landscape Architecture and Design Team By: Ken Smith
Landscape Architecture and Design: Marvin A. Anderson

I like the visual simpl
of the design, but it's
quite a bit more expose
to sunshine (although it
could just be the vendor

CRIG and Public Architecture

good project
some interest but
too busy
definitely a
lame park feel
to it.

Michael Van Valkenburg Associates and
Thomas Pifer & Partners

Sheer drama,
transformative,
perhaps too much
'lame park' feel
would be good for
Horton

Landscape and Lake/Fazio Architects

the most comprehensive
very strong
est understanding of
region
important emphasis
on housing

Workshop Ken Smith Landscape Architect Ten Eyck
Landscape Architects and Rogers Marvel Architects

pleasant but
perhaps more
everyday
approach

Design Waller Creek:

about the final design concept
comments collected will remain anonymous and will only be shared with the Design Competition Jury. Any contact information submitted on the reverse of this card will not be linked to your comments

CRIG and Public Architecture

openness of the parks

Michael Van Valkenburg Associates and
Thomas Pifer & Partners

Walls around the Habitat
Refuge raise some safety
issues.

Landscape and Lake/Fazio Architects

the idea to use boardwalk
to engage users with
creek.

question about water availability
Palmer Park.

Workshop Ken Smith Landscape Architect Ten Eyck
Landscape Architects and Rogers Marvel Architects

like: relationship with water
and surrounding water-front
in the urban fabric.

dislike: circulation and feel
for Waterloo park - NOT
"wild", too fake.

All comments collected will remain anonymous and will only be shared with the Design Competition Jury. Any contact information submitted on the reverse of this card will not be linked to your comments.

CMG and Public Architecture

Too much concrete/hard
scape

(4)

Michael Van Valkenburgh Associates and
Thomas Porter & Partners

Can rowers go under
ponton bridge?
Don't like ponton bridge
or Potts or Refuge

(3)

Landscape and Lake Park Architects

like Xeric pool to inlet
like ^{small} bridges through delta

inlet pools will be chlorinated
water > How prevent discharge
in Waller Creek?

Pick this one, way better

(1)

Workshop Ken Smith Landscape Architect, Ten Eyck
Landscape Architects and Rogers Marvel Architects

Too much landscaping
at water base - not
natural feeling
inlet handling is ugly

(3)

CMG and Public Architecture

- diagrams really
difficult to
read!
- love the city
deck at lakefront

Michael Van Valkenburgh Associates and
Thomas Porter & Partners

- like the idea
of a lattice-
delicate foot
bridges

Landscape and Lake Park Architects

- love the wading
pools
- hand drawn maps
difficult to read

Workshop Ken Smith Landscape Architect, Ten Eyck
Landscape Architects and Rogers Marvel Architects

- like the canopy
bird walks
- like solutions
to runoff

CMG and Public Architecture

Way too urban -
too much concrete,
no balance w/
nature - all about
benefiting the new
development, not Austin

Appreciate the
integration of
"natural" spaces
with usable space
without excessive
concrete

Michael Van Valkenburgh Associates and
Thomas Porter & Partners

Least invasive app
most likely to be
accepted, hate the
ponton bridge (can you
under bridge when it
crossing river?)

Workshop Ken Smith Landscape Architect, Ten Eyck
Landscape Architects and Rogers Marvel Architects

Too landscaped, no
a natural ~~feel~~ fi
information is
really limited in
boards compare
to other designs.

CMG and Public Architecture

Michael Van Valkenburgh Associates and Thomas Phifer & Partners

Waller Lake front is
too space age. Hate
the things made w/
all the slides + poles.

Too many bridges -
may 3 is plenty. Love
the rock / fern wall.
Love the naturalistic
design. Love bike
access. Hate the
Poppy

Turenscape and Lake/Flato Architects

Workshop: Ken Smith Landscape Architect, Ten Eyck Landscape Architects and Rogers Marvel Architects

Like the idea of
the cypress walk but
will it really be
orange? yuck! Is
there any freepkg
for Palm Park?
Bikes not invited to
creek (i). Too much
= stuff.

Like the naturalist
design + Bike
access.
Beautiful great
Lawn.
feels like Austin

Public Architecture

nature and states
issues with Waller
without giving a good
action

Michael Van Valkenburgh Associates and
Thomas Phifer & Partners

Gives many good ideas. Love
the approach to walking by
or across Waller Creek instead
of on it. It makes Waller a
very tailored experience classy
enough yet natural for downtown

and Lake|Flato Architects

good ideas and my
choice except that it
much of the creek with
is. If the idea truly is
not ~~the~~ the paths
it comes it then.

Workshop: Ken Smith Landscape Architect, Ten Eyck
Landscape Architects and Rogers Marvel Architects

They think we live in
woodlands. They use photos
in their renders.

Public Architecture

Love this
encompasses
everything
and
every one.

tie
for
1st place

Michael Van Valkenburgh Associates and
Thomas Phifer & Partners

Love this one
the best!
It encompasses
everything while
creating new iconic
images of Austin!

and Lake|Flato Architects

Very Cool
Very Green
People and Plant Friendly
+ much room for
wildlife.

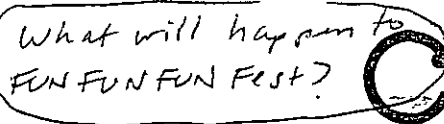

Workshop: Ken Smith Landscape Architect, Ten Eyck
Landscape Architects and Rogers Marvel Architects

Grow the City does ~~not~~
not appear public and
too low looks like it
will flood.
Love the wildlife
spaces.

CMG and Public Architecture

very diagrammatic and
rule obvious instead
of innovative.

Michael Van Valkenburgh Associates and
Thomas Phifer & Partners

2ND FAVORITE
- concerned about landscape
experience
✓ media corals
✓ the rocky
X the refuge
X pour over bridge

Turenscape and Lake|Flato Architects

FAVORITE
- love the amount of detail in
vegetation and housing studio
- feels most complete
✓ local firm
X why does the cypress walk
cover so much of the creek?

Workshop: Ken Smith Landscape Architect, Ten Eyck
Landscape Architects and Rogers Marvel Architects

✓ wild - canyon - wild
concept
- lacks refinement
and has fewer ideas
than some of the
others

CMG and Public Architecture
Michael Van Valkenburgh Associates and Thomas Phifer & Partners
Like - design for regeneration diagrams
- looked at relevant local plans
Dislike - too much program idea
Like - different flexing program idea
- the poppy is cool
Dislike - refuge form
- so green, don't believe feasible in rock
- what about drought

Turenscape and Lake/Flato Architects
Workshop: Ken Smith Landscape Architect, Ten Eyck Landscape Architects and Rogers Marvel Architects
Like - activities map
- emphasis on critical habitat
- 4 sites concentrated on
Dislike - a lot of development emphasis on residents
Like - lots more technology diagrams
- adventure play at palm park
- yay diversity!
Dislike - felt a lot more program underused

CMG and Public Architecture

Michael Van Valkenburgh Associates and Thomas Phifer & Partners

Too much "built"
landscaping

Interesting art
Sculptural details
liked the "Grotto"
area.
But entire creek
should not be artificial

Landscape and Lake/Flato Architects

Workshop: Ken Smith Landscape Architect, Ten Eyck Landscape Architects and Rogers Marvel Architects

Interesting
The Lady Bird Lake
portion should primarily
be a wildlife sanctuary

Like natural emphasis
" watershed approach
Too much hardscape
at the park.

Michael Van Valkenburgh Associates and
Thomas Phifer & Partners

Do not like any section
of the creek blocked off
from the public by "urban canyons"
The creek belongs to the city
& its people - NOT
conglomerates who wish to block
off portions to themselves.

This is my favorite. For it's focus on nature is connected well with the project.

Landscape and Lake/Flato Architects

Workshop Ken Smith Landscape Architect, Ten Eye Landscape Architects and Rogers Marvel Architects

\Rightarrow A REALM LIKE THESE

IG and Public Architecture

the "radical" approach
graphics

- seems too busy
- "theme park" feel

anscape and Lake|Flato Architects

- Like:
 - sections of area seem very well thought out w/ character of city
- disliked:
 - creekshed comm. seem too exclusive from rest of area

• comment further visit: www

Michael Van Valkenburgh Associates and
Thomas Phifer & Partners

- like:
 - incorporates existing conditions well
 - welcomes more activity w/o overbiking
- dislike:
 - 1st big picture makes concept look "ignored"

Workshop: Ken Smith Landscape Architect, Ten Eyck
Landscape Architects and Rogers Marvel Architects

- like:
 - minimalism of approach
 - incorporating existing conditions
- dislike:
 - catch phrases

www.wallercreek.org/finalfour

THANK YOU FOR SUPPORTING A BRIGHTER FUTURE ON WALLER CREEK!

Please see reverse to connect with us.

A great opportunity for Austin to finally
begin to educate its citizens about
the importance of a watershed.
Please incorporate this + other life quality
Design Waller Creek: A Competition

Design Waller Creek: A Competition

CMG and Public Architecture

I like the re-connection
of east + west Austin
concept, but
can it work?
more watershed
water treatment options

Turenscape and Lake/Flato Architects

good use/reuse of
H₂O resources +
potential resources.
important! ~~Also like~~
restoration of
east reservoir, here.
ches bar (two bar?) but
could be a great basis for

Public Architecture

Michael Van Valkenburgh Associates and
Thomas Phifer & Partners

Favorite. Activates
the public areas
citing, tangibles.
the plaza area
area, slide. Seems the
complete vision.

Turenscape and Lake/Flato Architects

Workshop: Ken Smith Landscape Architect, Ten Eyck
Landscape Architects and Rogers Marvel Architects

already has a pretty
like nature trail. We
citizen created so
people want to go &
with the area.

I like elements such as
the poppy & water wheel
But didn't activate the
whole area. The nature
aspect is important, but
how people will use it is
more so.

Hohum. Didn't get
me excited. The focus
on businesses and hotels
is good though.

A little too
abstract -
not as smooth -
not enough foliage

- beautiful presentation
- maybe looking
a lot like Chicago or
NYC - very big
city-ish

Turenscape and Lake/Flato Architects

Workshop: Ken Smith Landscape Architect, Ten Eyck
Landscape Architects and Rogers Marvel Architects

- Favorite.
I didn't look at
who did what until the
end and wasn't surprised
it was Flato's work.

- Love the simplicity of
presentation.
- love the play areas
and downtown density

- Love reforestation
and water area / Green Streets!

- very believable

CMG and Public Architecture

Michael Van Valkenburgh Associates and
Thomas Phifer & Partners

Pretty busy -- too much
so for most folks

Lattice bridges + very
natural surroundings
retained very well.
Expand pool use for all.
Could be good for all
ages of handicapped, not
just young children

Turenscape and Lake/Flato Architects

Workshop: Ken Smith Landscape Arch
Landscape Architects and Rogers Marvel Architects

Most well-developed -
and specific integration
of a sustainable
green design with
urbanization. Would
like less development.

LOVED the green
retention, less
development, integration
within + to diverse
neighborhoods.
Loved terraced
Amphitheater

Design Waller Creek: A Competition

PUBLIC COMMENTS: ONLINE SUBMISSIONS

Workshop: Ken Smith Landscape Architect, Ten Eyck Landscape Architects, and Rogers Marvel Architects:

What a disappointment from Ken Smith and hometown girl Christine Ten Eyck! I am given so little a glimpse into their ideas by these paltry boards that I am having trouble responding to this entry. Attempts to have a graphically simple proposal fall flat. I simply have no sense at their vision for the creek.

Fortunately for them, no vision at all is still better than MVVA's terrible vision, so they can salvage third place here.

There are some good ideas were lost in the mediocrity:

- The taxonomy of water streetscapes--green alley, bioswale, et c.--is a profoundly strong idea and should be a working part of how this project is designed (and, frankly, how future street improvements throughout the city should be designed)
- Idea of Waller Creek as \"missing street\" is a good idea. So what do you do with it?
- There is a clear suggestion of urbanism (the Urban Canyon) in the middle of the project area, right where it should be. Sadly, this is poorly reflected in the renderings.

Overall, this project promises great ideas and then subverts them entirely with poorly chosen renderings, no legible site plan and an entire board wasted on speculative announcement posters for activities on the creek. This is a sorry effort.

Turenscape + Lake|Flato Architects:

One thing I really like about this proposal is the emphasis on the \"toolbox\" i.e. methodology over a prescriptive site plan. In evidence of this, Turenscape|L/F's site plan is tiny on their boards. This is the right mindset for this project, and this is the strongest of the four proposals.

What I like:

- Again, the Toolbox. It responds to the language of Waller Creek that is already existing, as well as the City's commitment to urban environmental efforts
- Designing based on habitat regions-- the sections of the creek which evoke the Great Streets typical section are a wonderful graphic device for understanding the relationship to water on a human scale. This is important because these trails are about quiet moments, not the \"big\" event
- Cypress walk, although a little Formal, is a wonderfully consistent gesture that suggests the entire course of the creek--not just nodes (a main criticism of MVVA and CMG proposals)--and complements the existing language of limestone banks.
- There is an implied understanding of phasing which reflects maturity of the design team
- The terraced amphitheatre at Waterloo Park is a good gesture for that space (although I have concerns with the acoustics from that waterfall inlet right next to it)
- The many bends (if a little Formal) in the Cypress walk promote a slowness to foot traffic there and promote contemplative moments that could not exist if the paths were larger or more straight for long distances. This is the appropriate pace for the paths

- The trails at the creek mouth I similarly enjoy; good access between east and west sides of creek. I assume one would be able to paddle a kayak under them but it's not clear in the renderings
- The clear devotion to articulating speculative development is a huge strength of this proposal. I'm not arguing for or against their residential development designs, but the emphasis on articulating its location, scale and density makes this a very mature and realistic proposal
- Ecology is strong with this team; Turenscape and Lake|Flato have a reputation for sensible social spaces, regionalism and remediation practices

A few concerns:

The renderings do not suggest much urbanism. I am interested in the canopied Sabine Street but generally there is an overly pastoral feel to renderings. This creek is very much in the City and needs to reflect that.

-The relationship with IH-35 and the east side is very underdeveloped. CMG's efforts in this regard are far stronger.

-The xeric cap over the inlet is strangely disengaging, given that its overlook looks out to the amphitheatre. I think there should be a stronger connection between these two parts of Waterloo Park.

Ultimately, I wish there was a little less "nature" and a little more "city" in this one. We need both and they need to be integrated with one another, but these renderings do not give me the sense that this is fully happening. My opinion is that Waller Creek will be a collection of personal reflection spaces which operate in tandem with and occasionally in response to a bustling urbanism. This proposal is by far the strongest in this regard and reflects the most sensible relationship to Austin's downtown.

There are many aspects I also enjoy of the CMG proposal, but this one has my vote.

Michael Van Valkenburgh Associates, Inc. and Thomas Phifer & Partners:

Comments:

The very act of showing the creek mouth-first on their boards suggests that MVVA has a fundamentally backward idea of the City's relationship with this creek. Witness Shoal Creek: one enters the creek area and travels TO the lake. A simple graphic flaw generates concern right off the bat.

I am strongly opposed to this proposal but I will point out some highlights:

-The pontoon bridge across the lake, however practically problematic, would be a great project inclusion to connect the southside to the Waller Creek trails and parks. (Witness the success of the similar bridge at Lamar).

-I like the shelf treatment for the tunnel inlet at Waterloo. There is well-programmed social space there.

-The "lattice" of small bridges at the mouth is a compelling move and engages both sides of the creek shore (where the CMG/PA proposal only engages the west side, for example)

-There seem to be some appropriate small shaded areas in the "Grove"

Now the bad:

-Calling out the four nodes of the project--Lattice, Grove, Refuge, Confluence is at best stupid and at worst detrimental to the need for well-developed small social spaces on the creek. MVVA plays for the big "SXSW" moment, but the reality is that the large spaces, no matter what name you give them, are not the real lifeblood of this project. MVVA fails to understand the scale of this City and the uses of the creek.

-The Poppy is just terrible. It is ugly and useless.

-The Canopy walk is a weak idea. Better to leave that to the Convention Center and future Hotel. For what it's worth, it's also a very aggressive move toward Ironworks and the small businesses nearby

-Potential development is not nearly well enough considered, defined simply as "Potential

Development\" or \"Opportunity Area\". Compared to other proposals, this is a very insular and naive understanding of the City/Creek relationship.

- The IH-35 \"viaduct\" is insufficiently developed.

- The Palm School is a non-starter as long as IH-35 is right next to it. Again, a naive move, and a non-starter

- The Refugium is perhaps the worst idea of all of them. Putting an enclosed space under the bridge in a little-trafficked area is going to scare people away. It's an assault magnet. The water remediation off the bridges is a great idea but this is NOT how to go about it. In what is their closest attempt at a contemplative space, MVVA fails wildly

- Where are the small spaces? Where is any connection to retail potential? Where is an understanding of development? Instead, I get a rendering with some bats in it? Frankly, I'm insulted.

CMG and Public Architecture:

The CMG/Public Architecture entry was the most pleasant surprise of the four entries, aided by a masterful aerial rendering that showed some surgical relationships to IH-35 as well as speculative scales of future development.

Some highlights:

- A nicely scaled Waterloo Park; the building over the tunnel inlet seems like an appropriate architectural addition and the loosely programmed park and grassy amphitheatre is appropriate

- The cap over IH-35 at 11th/12th streets could represent a huge community value; other interventions on the highway (replacement of concrete with wildflower embankments, the light tunnel) are key moves that could be developed further.

- The pedestrian connections between 6th Street, the new Sabine corridor and the creek seem the most realistic

- The Eco-District should be a design generator; happy that language is included

- The waterfront seems practical

- I appreciate the idea of \"events\" preceded the project construction

Some concerns:

- The boardwalk in general is way too Formal, particularly at Waterloo park where the limestone language might make more sense

- The installations on Sabine are unrealistic and overbearing; other teams treat that space much more gently

- The cap will be expensive; I like the gesture but I do not understand a clear vision for how it would specifically benefit the East side. This needs to be stronger to justify the cost

- There are way too many \"cute\" interventions that take away from the strength of the hole. I do not care for the moon towers, the \"Red River Park\", the hanging garden or the City Deck

- Generally, there is way too much treatment of the entire project as a venue for large social spaces and too many brazen attempts at making quirky experiences. Where are the small social spaces? The personal reflective spaces? The reality of Waller Creek (in many ways similar to Shoal Creek) will be that of quieter moments. The design--too often too grandiose--eschews these moments in favor of crowds and prescriptive moments.

CMG and Public Architecture:

Thank You.!!!

Workshop: Ken Smith Landscape Architect, Ten Eyck Landscape Architects, and Rogers Marvel Architects:

I would like to download the design concepts.

CMG and Public Architecture:

This rocks.

Turenscape + Lake | Flato Architects:

I went to the Blanton Museum today to see these designs. Based on those large-scale models, I definitely like the following design the best: Turenscape + Lake | Flato Architects

However, the CMG and Public Architecture design looks the best on this website.

Go with Turenscape!!!

Workshop: Ken Smith Landscape Architect, Ten Eyck Landscape Architects, and Rogers Marvel Architects:

This presentation is by far cleaner and more innovative than the others and will both by function and aesthetics serve the community for many years to come without becoming stogy and dated. Truly creative.

Workshop: Ken Smith Landscape Architect, Ten Eyck Landscape Architects, and Rogers Marvel Architects:

I like the stress on the natural environment, and I like the general design, but I dislike the over-reliance on created walks and space. I would prefer it to be done so it looks as though maybe nature did it.

Turenscape + Lake | Flato Architects:

I'm not a fan of the raised and very prominent boardwalk.

Michael Van Valkenburgh Associates, Inc. and Thomas Phifer & Partners:

In general, the different spaces are well thought out and there is good greenspace. I'm not a fan of the shell scape with alternating angle columns.

CMG and Public Architecture:

I like the overall natural looking landscape of this design. I would like to see fewer constructed walks and more trails, but otherwise this design is good.

Turenscape + Lake|Flato Architects:

want to see the details!

Michael Van Valkenburgh Associates, Inc. and Thomas Phifer & Partners:

The MVVA team have nailed the Austin vibe. The natural look feels like home. Please choose this one.

CMG and Public Architecture:

CMG and Public Architecture Team are trying too hard. Austin doesn't need a theme park. Too much concrete, paving over Austin's natural beauty.

Turenscape + Lake|Flato Architects:

I love the that they have looked at the entire watershed of Waller Creek including the condensate water that is usually just dumped into Town Lake. The swimming holes created by collecting this condensate is a great idea! Also, I love the consistency of having a Cypress Walk run the length of the creek. Great work!

Workshop: Ken Smith Landscape Architect, Ten Eyck Landscape Architects, and Rogers Marvel Architects:

I don't know much about Landscape Architecture, but I really like the pictures I am seeing from this Team.

Turenscape + Lake|Flato Architects:

I like the minimal intervention and natural approach. Seems practical and attainable because it develops from community activities that already exist, e.g. expanding Red River music scene to create Music Bend. This design is also equitable as it specifically created Palm Park to attract East Austin residents, and the CommunityGardens suggested for the LadyBird Lake area would bring farming to downtown city dwellers. I love the environmental education center at Palm Park, and the living walls concept. I would like to see natural playscapes included as well. I think this is something the community could get behind and support because it appeals to a diversity of residents. (Cut out the orange on the bridge - definitely doesn't go with the natural vision of the rest of the design.)

CMG and Public Architecture:

While I think all the finalists do a good job of returning the creek to a more natural state, I feel that CMG and Public Architecture does the best job of integrating the creek with the surrounding urban environment. They have created an oasis within the city, providing art spaces and elaborate boardwalks that serve as art in and of themselves. Their concept expands the impact of the creek beyond it's banks into the surrounding areas that are now mostly parking lots. Their plan offers the most comprehensive approach to transforming the area into a destination and a more desirable place to live, work, and spend one's leisure time.

Workshop: Ken Smith Landscape Architect, Ten Eyck Landscape Architects, and Rogers Marvel Architects:

I am going to look over all the concepts in more detail, and hope to come see the display at one of it's stops. Initial impression, I don't see where archeological investigations or mitigation are taken into consideration by any of the plans. This project, being along a creek, there are archeological deposits, both prehistoric and probably historic. How are these being taken into consideration?

Turenscape + Lake|Flato Architects:

The designs appear over-the-top and hardly evolutionary that renders the creek unrecognizable. The amount of pavement is alarming and approaches the commercial ambience of San Antonio's river walk. Does the creek need to be a destination or merely a byway? Both will increase traffic and pollution! And no longer a home for the homeless, right?

Goodbye Austin!!

Turenscape + Lake|Flato Architects:

Turenscape + Lake/ Flato Architects has the best design to relax and cool off in Austin.

CMG and Public Architecture:

The CMG and Public Architecture model is perfect for Austin. The fun water activities are perfect for people to cool off in this Austin heat.

Workshop: Ken Smith Landscape Architect, Ten Eyck Landscape Architects, and Rogers Marvel Architects:

good!

Michael Van Valkenburgh Associates, Inc. and Thomas Phifer & Partners:

This was my favorite... Hope it wins.

Turenscape + Lake|Flato Architects:

I really think this concept is in touch with what Austin really is.

Turenscape + Lake|Flato Architects:

I vote for the Turenscape + Lake Flato Architects team. The design embodies living in Austin and Central Texas--past, present, and future. The design seems to minimally impact nature (although it will take much work to create this simple look). My home was also influenced by Lake Flato's clean, natural design concepts. This team comprises many Austin and well-respected organizations and considers local culture and environment in its design. It's a winner!

Workshop: Ken Smith Landscape Architect, Ten Eyck Landscape Architects, and Rogers Marvel Architects:

I like the minimal approach of the KSLA/RMA approach, both because it can (hopefully) be implemented quicker and at less cost than the other schemes. I really like the mention of keeping wildlife present and making a "landscape" as opposed to an "urban landscape". All 3 of the other schemes take a typical planning-style approach to make an urban amenity, but the idea of kayaking down a more lush creek is great. Although, Lady Bird Lake serves this function and I think the right amount of commercial uses would be needed to activate and make the scheme viable.

The renderings don't look like Austin even though the Bald Cypressess are native (and existing) trees.

Turenscape + Lake|Flato Architects:

The Turenscape scheme is very strong. I don't like the focus of the writing and quotes on the team and "potential" processes, but the concept proposed are excellent. Their scheme integrates real architecture by suggesting potential ideas about development and new housing or commercial buildings. They also hint at ways to regenerate or give back to the ecology/economy of the area rather than just be an amenity. This seems like the right approach. The look of the parks and their uses is right for our city.

Michael Van Valkenburgh Associates, Inc. and Thomas Phifer & Partners:

not sure if the pedestrian bridge in MVVA's concept is already planned as part of the Lady Bird Lake Boardwalk, if so it would be a great addition, however I think the multiple bridges in their scheme are an unnecessary expense that don't add to the potential experience of the creek walk. I do like that their scheme implies potential power generation/ecological regeneration (with their wheel sculpture). Don't like the poppy for Austin.

CMG and Public Architecture:

I would like to see more shade and a more native-looking canopy in the CMG scheme. In general, their language really captures Austin and the potential for this site.

The graphics on their Design Concept Summary are much better than the others. I like the positive, confident tone of their writing.

Turenscape + Lake | Flato Architects:

To me, the Lake | Flato design has the best feel of Austin. It has a useable, pretty and comfortable sense that the others lack in some way. Plus it's subtle and evokes Barton Springs and many things good about Austin.

Turenscape + Lake | Flato Architects:

This is one of the hardest City of Austin design decisions that I have had to make but, in the end, the near-seamless interaction with nature, neighborhoods, and public space, by Turenscape + Lake | Flato Architects provides the best overall benefit to the city as a whole.

CMG and Public Architecture:

I am blown away by CMG and Public Architecture's designs! It is both innovative AND unique! I love it. This would definitely be my choice. The other teams projects were interesting, but I feel they could be anywhere in the world. With CMG and Public's designs, however, you could never mistake it. You would be in Waller Creek in Austin, Texas!

CMG and Public Architecture:

I am a student of Architectural and Urban Design, and as such these proposals are incredibly intriguing to me. I'm quite disappointed that the only way to view these proposals is to visit their exhibition in person. I am almost positive that you would receive much more response if you not only displayed the information at public forums, but also allowed for the viewing of high resolution copies of each firm's work. Not only would the public benefit from being able to peruse and compare each option in the comfort of their own homes, but you will be able to reach a greater audience this way, and provide exposure and recognition for the talents and hard work put in by each design team. As an aside; promotion and exhibition of these types of rejuvenation projects is exactly what local governments should be doing to increase public involvement and interest in the creation of beautiful, sustainable, and functional public space. Thank you so much!

It would be extremely helpful if digital files of the design proposals were available for viewing. The current in browser window does not let the viewer read the text on each proposal board.

Workshop: Ken Smith Landscape Architect, Ten Eyck Landscape Architects, and Rogers Marvel Architects:

I prefer the keep it green concept, or anything that will keep the impervious footprint as small as possible. If you have buildings come right up to the creek, then trash will more likely be thrown into the creek.

Turenscape + Lake | Flato Architects:

i love this design! it get's my vote as the most AUSTIN of all the designs.

i've lived in austin since 1963 & so have seen a lot of change. much of it great. some not so great. i'm very excited about the waller creek project & i'm very much hoping that turenscape+lake/flato wins the commission.

Turenscape + Lake | Flato Architects:

This design by Turenscape and Lake/Flato looks the most like Austin to me, and the most like what I hope Austin will look like in the future.
