ZONING CHANGE REVIEW SHEET

CASE: C14-2012-0121  Z.A.P. DATE: November 20, 2012
(Tech Ridge Center Phase III Apartments)

ADDRESS: 12504-12620 McCallen Pass

OWNER/APPLICANT: Tech Ridge Phase III, LP (Paul Juarez, VP Tech Ridge GP, LLC)

AGENT: Tech Ridge Management, LLC (Gina E. Diehl)

ZONING FROM: LI, GR, and RR  TO: MF-4  AREA: 28.128 acres

SUMMARY STAFF RECOMMENDATION:

The staff’s recommendation is to grant MF-4, Multifamily Residence-Moderate-High Density District, zoning.

In addition if the requested zoning is granted for this site, then 75 feet of right-of-way should be dedicated through a street deed and 125 feet of right-of-way should be reserved through a public restrictive covenant from the existing centerline of West Parmer Lane in accordance with the Transportation Plan. (LDC, Sec. 25.6.51 and 25.6.55)*

*On November 19, 2012, the staff received a memo from Garry Morris with TxDOT stating that additional right-of-way is not required at this time (Please see Attachment B).

ZONING AND PLATTING COMMISSION RECOMMENDATION:

11/20/12: Approved MF-4 zoning on consent (7-0); P. Seeger-1st, C. Banks-2nd.

ISSUES:

The applicant has provided an Educational Impact Statement (EIS) for this site (Please see Attachment A). The staff has forwarded this information to the Pflugerville Independent School District for their review.

DEPARTMENT COMMENTS:

The property in question is currently an undeveloped parcel of land that fronts East Parmer Lane. The applicant is requesting MF-4 zoning to develop the site with multifamily uses. The land to the north is zoned with the LI-PDA district and is currently developed with an apartment complex (Tech Ridge Center Apartments). To the west, there is GR district zoning and commercial retail uses (Tech Ridge Shopping Center). The land to the east is developed with a financial services use (Capital One Bank). To the south, are office uses (Dell Computers-Parmer South Campus).

The staff recommends the applicant’s request for MF-4, Multifamily Residence-Moderate-High Density District, zoning. The property meets the intent of the MF-4 district as it is fronts onto an arterial street/highway located in an area adjacent to the central business district or a major institutional or employment center. The proposed MF-4 zoning will promote consistency and orderly planning because the property to the north is zoned with the LI-PDA district, which permits multifamily uses, and is currently developed with an apartment complex (Tech Ridge Center...
Apartments). To the west, there is GR district zoning and commercial services (Tech Ridge Shopping Center). MF-4 zoning will permit the applicant to develop a multifamily residential uses in an area where a variety of housing opportunities are desirable. The proposed residential development will provide housing options adjacent to a major employer (Dell Computers) and near numerous commercial services (Parmer Center, Tech Ridge Shopping Center).

The applicant agrees with the Zoning and Platting Commission’s recommendation.

STAFF RECOMMENDATION

The staff’s recommendation is to grant MF-4, Multifamily Residence-Moderate-High Density District, zoning.

BASIS FOR RECOMMENDATION

1. The proposed zoning should be consistent with the purpose statement of the district sought.

Multifamily residence moderate - high density (MF-4) district is the designation for multifamily and group residential use with a maximum density of 36 to 54 units per acre, depending on unit size. An MF-4 district designation may be applied to high density housing in a centrally located area near supporting transportation and commercial facilities, in an area adjacent to the central business district or a major institutional or employment center, or in an area for which moderate to high density multifamily use is desired.

2. The proposed zoning should promote consistency and orderly planning.

The proposed MF-4 zoning will promote consistency and orderly planning because the property to the north is zoned with the LI-PDA district, which permits multifamily uses, and is currently developed with an apartment complex (Tech Ridge Center Apartments). To the west, there is GR district zoning and commercial retail uses (Tech Ridge Shopping Center).

3. Intensive multi-family zoning should be located on major arterials and highways.

The property under consideration fronts and will take access to Parmer Lane, an arterial roadway and state maintained highway.

4. The proposed zoning should allow for a reasonable use of the property.

MF-4 zoning will permit the applicant to develop a multifamily residential uses in an area where a variety of housing opportunities are desirable. The proposed residential development will provide housing options adjacent to a major employer (Dell Computers) and near numerous commercial services (Parmer Center, Tech Ridge Shopping Center).

EXISTING CONDITIONS

Site Characteristics

The subject tract is currently an undeveloped parcel of land that fronts East Parmer Lane. There appears to be floodplain along the north and west boundaries of the property.

Environmental

The site is not located over the Edwards Aquifer Recharge Zone. The site is in the Desired Development Zone. The site is in the Walnut Creek Watershed of the Colorado River Basin, which is classified as a Suburban Watershed by Chapter 25-8 of the City's Land Development Code.

According to floodplain maps there is a floodplain within or adjacent to the project boundary. Based upon the close proximity of floodplain, offsite drainage should be calculated to determine whether
transition zone exists within the project location. If transition zone is found to exist within the project area, allowable impervious cover within said zone should be limited to 30%.

Standard landscaping and tree protection will be required in accordance with LDC 25-2 and 25-8 for all development and/or redevelopment.

Numerous trees will likely be impacted with a proposed development associated with this rezoning case. Please be aware that an approved rezoning status does not eliminate a proposed development’s requirements to meet the intent of the tree ordinances. If further explanation or specificity is needed, please contact the City Arborist at 974-1876. At this time, site specific information is unavailable regarding other vegetation, areas of steep slope, or other environmental features such as bluffs, springs, canyon rimrock, caves, sinkholes, and wetlands. Under current watershed regulations, development or redevelopment on this site will be subject to the following water quality control requirements:

- Structural controls: Sedimentation and filtration basins with increased capture volume and 2 year detention.

At this time, no information has been provided as to whether this property has any pre-existing approvals that preempt current water quality or Code requirements.

**Impervious Cover**

The maximum impervious cover allowed by the MF-4 zoning district would be 70%. However, because the watershed impervious cover is more restrictive than the zoning district's allowable impervious cover, the impervious cover is limited by the watershed regulations. Under current watershed regulations, development or redevelopment on this site will be subject to the following impervious cover limits:

<table>
<thead>
<tr>
<th>Development Classification</th>
<th>% of Net Site Area</th>
<th>% with Transfers</th>
</tr>
</thead>
<tbody>
<tr>
<td>Single-Family</td>
<td>50%</td>
<td>60%</td>
</tr>
<tr>
<td>(minimum lot size 5750 sq. ft.)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Other Single-Family or Duplex</td>
<td>55%</td>
<td>60%</td>
</tr>
<tr>
<td>Multifamily</td>
<td>60%</td>
<td>70%</td>
</tr>
<tr>
<td>Commercial</td>
<td>80%</td>
<td>90%</td>
</tr>
</tbody>
</table>

Note: The most restrictive impervious cover limit applies.

**Site Plan**

This site will be subject to Subchapter E Design Standards and Mixed Use. Additional related comments will be provided upon submittal of the site plan.

**Stormwater Detention**

At the time a final subdivision plat, subdivision construction plans, or site plan is submitted, the developer must demonstrate that the proposed development will not result in additional identifiable flooding of other property. Any increase in stormwater runoff will be mitigated through on-site stormwater detention ponds, or participation in the City of Austin Regional Stormwater Management Program if available.
Transportation

Following existing streets are abutting this parcel:

</tr>
</tbody>
</table>

*City of Austin Traffic Count from 01/31/2007

West Parmer Lane is classified as EXP6 (6 lane Expressway) in the Austin Metropolitan Transportation Plan (AMATP 2025). The Austin Metropolitan Area Transportation Plan calls for 400 feet of right-of-way for Parmer Lane. If the requested zoning is granted for this site, then 75 feet of right-of-way should be dedicated and 125 feet of right-of-way reserved from the existing centerline of W Parmer Lane in accordance with the Transportation Plan. [LDC, Sec. 25-6-51 and 25-6-55]

No additional Right of Way is needed at this time for McCallen Pass.

The traffic impact analysis for this site was waived because the site must comply with conditions and trip limits approved in the Traffic Phasing Agreement per the Second Amended Restrictive Covenant and development agreement per Zoning Case (C14-85-322). At the time of site plan application, the applicant will be required to demonstrate compliance with the terms of the traffic phasing agreement.

There are existing sidewalks along both sides of W. Parmer Lane.

There are existing sidewalks along the subject property side of McCallen Pass.

Following table shows 2009 Bicycle Plan recommendations for the boundary street for this parcel:

Following Capital Metro bus service routes are available along McCallen Pass and West Parmer Lane:

392 - Braker

Water and Wastewater

FYI: The landowner intends to serve the site with City of Austin water and wastewater utilities. The landowner, at own expense, will be responsible for providing any water and wastewater utility improvements, offsite main extensions, utility relocations and or abandonments required by the proposed land use. Depending on the development plans submitted, water and or wastewater service extension requests may be required. Water and wastewater utility plans must be reviewed and approved by the Austin Water Utility for compliance with City criteria. All water and wastewater construction must be inspected by the City of Austin. The landowner must pay the City inspection fee with the utility construction. The landowner must pay the tap and impact fee once the landowner makes an application for a City of Austin water and wastewater utility tap permit.
EDUCATIONAL IMPACT STATEMENT (EIS) DETERMINATION

PART A

If your project is located in the Austin Independent School District, requires Land Use Commission review; and meets one of the requirements listed below, an Educational Impact Statement is required.

| ☐ YES | ☐ NO | 100 or more single family units are proposed |
| ☐ YES | ☐ NO | 200 or more multifamily units are proposed |
| ☐ YES | ☐ NO | 100 or more multifamily units are proposed and a tax credit is requested |
| ☐ YES | ☐ NO | Project will demolish more than 50 residential existing units in a structure more than 20 years old |

If an Educational Impact Statement (EIS) is required, please complete the Educational Impact Analysis (EIA) Part B.
