Additional Backup Information

This project includes the relocation of existing City of Austin water and wastewater lines in conflict with the Texas Department of Transportation's (TxDOT) proposed improvements to the US 290 Intersections at SH 71, William Cannon Drive and Joe Tanner Road. The work will be included in TxDOT's construction contract.

This project will include a 16-inch bore under US 290, 2,535 linear feet of 16-inch water line pipe, 738 linear feet of 6-inch water line, 14 gate valves and 11 fire hydrants. The work also includes 3 wastewater manholes, 377 linear feet of 8-inch wastewater line and 42 linear feet of 6-inch wastewater line. Based on TxDOT's contract letting schedule, advertisement is scheduled to begin in July 2013 and construction is scheduled to begin in December 2013.

Due to the time constraints for this project as well as the possibility of unforeseen subsurface conditions and utility conflicts, a 25% contingency has been included to allow for the expeditious processing of any change orders.

This project is located within zip code 78741 and is managed by the Public Works Department.
