**Meeting Date:** May 9, 2013  
**Department:** Contract Management

### Subject

Authorize execution of Change Order # 3 to the construction contract with INSITUFORM TECHNOLOGIES, INC., to extend the term of the Annual Service Agreement for Rehabilitation of Wastewater Lines Through Trenchless Process – Indefinite Delivery/Indefinite Quantity, at no additional cost to the City, for a total contract amount not to exceed $11,769,805.

### Amount and Source of Funding

Funding is available in the FY 2012-2013 Capital Budget of the Austin Water Utility. Funding for the extension options are contingent upon available funding in future budgets.

### Fiscal Note

No fiscal note is required.

### Purchasing Language:

|-----------------------|-------------------------------------------------------------------------------------------------------------------------------------|

### For More Information:

Mike Russ, P.E. 972-2054, Frank Mays 974-7051; Felecia Shaw, 974-6017.

### Boards and Commission Action:

To be reviewed by the Water and Wastewater Commission on May 8, 2013.

### MBE / WBE:

This contract was awarded in compliance with City Code Chapter 2-9A (Minority Owned and Women Owned Business Enterprise Procurement Program) with 4.51% MBE and 4.61% WBE subcontractor participation to date including this change order.

### Related Items:

|-------------------------------| |
Rehabilitation of wastewater pipelines through trenchless processes, commonly called Cured In Place Pipe (CIPP) can be an effective and efficient way to improve existing pipeline performance. When appropriate to use, this method is less expensive and reduces traffic impact when compared to the more traditional open trench method. The Austin Water Utility’s budget for this work has been reduced since the contract was awarded and is significantly less than the contract amount. This change order will extend the duration of the contract from 5/18/2013 to 12/31/2013, but does not require additional funding authorization.

60,991 linear feet of deteriorated wastewater mains ranging in size from 6-inch diameter to 36-inch diameter have been lined to date. This service contract will be rebid this summer with a new contract planned to be in place on January 1, 2014. The contract time extension requested in this Change Order will allow the construction to continue until a new contract is in place. This project is managed by the Austin Water Utility.

Insituform Technologies is located in Chesterfield, MO.
