MBE / WBE:	This contract will be awarded in compliance with City Code Chapter 2-9D. (Minority-Owned and Women-Owned Business Enterprise Procurement Program). No subcontracting opportunities were identified; therefore, no goals were established for this contract.
------------	---

## Additional Backup Information

This contract is for the one-time purchase of a gas chromatograph-headspace analyzer. The APD Forensics Laboratory will use this instrument to determine the amount of ethyl alcohol and other volatile compounds found in blood samples.

Headspace Gas Chromatography (GC) is used in the analysis of the blood specimen and is a validated and scientifically approved method for the analysis of volatiles in biological samples. Many partnering agencies such as the Travis County Medical Examiner's Toxicology Laboratory, the Texas Department of Public Safety Crime Laboratory System, and the Drug Enforcement Agency Laboratory System utilize this same instrument.

APD's current gas chromatograph-headspace analyzer was purchased in August of 1998 and is no longer functioning. The new instrument will allow APD to process 45 samples during a sequence run, reduce the amount of backlog, and allow APD to remain current with casework.

Many partnering agencies such as the Medical Examiner, Texas Department of Public Safety Crime Laboratory, and the Drug Enforcement Agency Laboratory utilize this same instrument.

All Business Machines, Inc. is contracted through TXMAS to supply various types of scientific equipment to other public entities statewide as a result of a competitive bidding process. Utilizing the TXMAS contracts provides for volume discount pricing as well as the earliest delivery of equipment.
