## Additional Backup Information

In response to helicopter traffic associated with the Formula One Circuit of the Americas race that occurred in November 2012, and various concerns from neighborhoods and businesses regarding helicopter traffic, City Council approved Resolution No. 20121108-052. This Resolution directed the City Manager to engage stakeholder representatives to develop recommendations for modifications to the City Code Chapters 13-1 *Aviation Services* and 25-2 *Zoning* that clarify definitions, code requirements, and enhance criteria, transparency, compatibility and discretion in the authorization process for temporary and permanent heli-facilities.

In order to implement the Council direction, the Aviation Department hired a public policy consultant and the Airport Advisory Commission appointed a "Working Group" to help facilitate three, publicly-posted stakeholder meetings to consider input from various stakeholder groups and individuals. The stakeholder groups consisted of City staff, neighborhood associations, large event producers, property owners, helicopter operators, two members of the

Planning Commission, and three members of the Airport Advisory Commission. Additionally, adjacent municipalities (City of Sunset Valley, City of Rollingwood, City of Westlake and Travis County) were updated by individual meetings or emailing the meeting summaries from the stakeholder meetings.

Aviation and Planning and Development Review staff have worked with other departments to incorporate the recommendations from the stakeholders into the proposed City Code changes.
