MBE / WBE:	This contract will be awarded in compliance with City Code Chapter 2-9D (Minority-Owned and Women-Owned Business Enterprise Procurement Program). No subcontracting opportunities were identified; therefore, no goals were established for this contract.
------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Additional Backup Information

This purchase will provide the Transportation Department with 200 Bluetooth Reader Systems in an effort to improve traffic flow along City of Austin roads. These systems will be installed along major arterials throughout the City and will allow the Transportation Department to measure and monitor travel times as well as adjust signal timing to improve traffic flow. This information will be disseminated to the public through the City's web page and the City's dynamic message signs.

Twincrest Technologies is contracted through SmartBuy to supply this type of equipment to other public entities statewide as a result of a competitive bidding process. Utilizing these cooperative contracts provides for volume discount pricing as well as the earliest opportunity to place the City's equipment orders.
