MBE / WBE:	This contract will be awarded in compliance with City Code Chapter 2-9D (Minority-Owned and Women-Owned Business Enterprise Procurement Program.) No subcontracting opportunities were identified; therefore, no goals were established for this contract.
------------	--

Additional Backup Information

This is a contract for the purchase of a SMRT36 Relay Test System with STVI Interface and Software for the Austin Water Utility Department. This system is being purchased to replace an existing system that does not support the new relay technology currently installed throughout the Water Utility. The SMRT36 Relay Test System is used at AWU facilities for the purpose of calibration, maintenance and repair for the protective relaying in electrical substations. The unit will be used at various Treatment Facilities to perform maintenance/repairs on 15kv substations/distribution equipment. This relay test system will allow for continued use of existing and compatible software programs used for testing systems as well. Megger, Dallas, TX is the sole source manufacturer and distributor of this system and software.
