## Additional Backup Information

This contract will provide liquid carbon dioxide for the Austin Water Utility (AWU) on an as needed basis. Liquid carbon dioxide is used by AWU to stabilize the drinking water during treatment to prevent calcium carbonant or scale from being deposited in the distribution system. The liquid carbon dioxide will be delivered to and used at the Ullrich and Davis Water Treatment Plants.

The product complies with the American Water Works Association Standard B510, which is the standard for liquid carbon dioxide used for the treatment of drinking water. It also meets the National Sanitation Foundation Standard 60 which governs the use of direct and indirect additives for the treatment of drinking water.
