

**HISTORIC LANDMARK COMMISSION
SEPTEMBER 9, 2013
NATIONAL REGISTER HISTORIC DISTRICT
NRD-2013-0061
Westline
724 Patterson Avenue**

PROPOSAL

Construct an approximately 1,600 sq. ft. addition to a contributing house.

RESEARCH

The existing house was constructed c. 1929 and its first owner and occupant was Carl Edward and Ellen Peterson, who previously lived at 624 Patterson Avenue. Mr. Peterson worked for the City Water, Light & Power Department. From 1937 until approximately 1949 there were a series of short term tenants after which Glendon E. Doss and his wife Bonnie reside at the house until the mid-1960s. Glendon Doss was a plaster before working at various labor jobs for the State Board of Control. Bonnie Doss worked as a clerk for the Insurance Co. of North America and as a saleswoman for Russell Stover Candies.

PROJECT SPECIFICATIONS

The existing c. 1929 house is an approximately 1,100 sq. ft., one-story, with a front-facing gabled roof. The partial-width, concrete front porch has a separate front-gabled roof supported by squared posts. The house currently has wide asbestos shingle siding. There are numerous single, and paired, wood, double-hung windows. The house is located on a corner lot.

The applicant proposes to construct a 1,600 sq. ft. addition to the side, and on top of, the existing house. The side portion of the addition will be set back from the front of the porch approximately 19', and from the front wall of the house by approximately 10'; however the second story addition will be set back only 4' from the front wall. The roof of the addition will have a fairly low slope, with a cross hipped form, and it, and the roof of the existing house, will be covered in pre-weathered, Galvalume, standing seam metal roofing. The walls of the addition will be painted stucco. A portion of the first floor addition facing the street will be covered with vegetation. The windows will typically be multi-paned casement style, and there will be a second floor screened porch facing Patterson Avenue. The applicant will investigate removing the asbestos siding on the existing house and repairing/replacing the horizontal siding below.

STANDARDS FOR REVIEW

The existing property is contributing to the Westline National Register Historic District. Applicable general design review guidelines state:

- The distinguishing original qualities or character of a property and its environment shall not be destroyed. Removal or alteration of any historic material or distinctive architectural features should be avoided.
- All properties shall be recognized as products of their own time. Alterations which have no historical basis and which seek to create an earlier appearance shall be discouraged.

- Changes which have taken place in the course of time may have acquired significance in their own right, and shall be recognized and respected.
- Distinctive stylistic features or examples of skilled craftsmanship which characterize a property shall be treated with sensitivity.
- Deteriorated architectural features shall be repaired rather than replaced whenever possible. In the event replacement is necessary, the new material should match the material being replaced in composition, design, color, texture, and other visual qualities. Repair or replacement of missing architectural features should be based on accurate duplications of features, substantiated by historical, physical, or pictorial evidence.
- Surface cleaning of structures shall be undertaken with the gentlest means possible. Sandblasting and other cleaning methods that will damage the historic building materials shall not be undertaken.
- Contemporary design for alterations and additions to existing properties are appropriate when such alterations and additions do not destroy significant historic, architectural, or cultural material and are compatible with the size, scale, color, material, and character of the property, neighborhood, or environment.
- Whenever, possible, new additions or alterations to structures shall be done in such a manner that if such additions or alterations were to be removed in the future, the essential form and integrity of the structure would not be impaired.
- The installation of protective or code-required mechanical systems shall be concealed whenever possible so as not to intrude upon or detract from the property's aesthetic and historical qualities except where concealment would result in the alteration or destruction of historically significant materials or spaces.

Although the proposed side addition is set back from the front wall of the existing house, the second story set back is not sufficient to meet the guidelines, especially given that the house is located on a corner lot. Additionally, the low slope, hipped roof form and fenestration patterns of the windows are not compatible with the original house.

COMMITTEE RECOMMENDATIONS

The addition allows the original house to read separately, so approve the design as presented but place downspouts toward the rear of the addition.

STAFF RECOMMENDATION

Release the permit with the recommendation that the applicant set the addition 15' back from the façade of the existing house, and revise the roof form to reflect the pitch and form of the existing roof.
