Additional Backup Information

This contract will enable the professional engineering and architectural staff within five departments of the City of Austin to better use their skills and specializations to design, build, manage and analyze city Right of Way and near Right of Way assets and Capital Improvement Projects. The 200 plus software applications available in a flexible and low cost check-out method will include the following: vector design applications for civil (road, earthwork), water, wastewater, storm plain, structural, bridge, rail, geotechnical, telecom fiber, mechanical, topological, architectural and building information modeling and inspection software. The other features available in this suite include engineering standard libraries, 3d geometric, vector, flow and tolerance related analytics, data sharing for proprietary engineering file types and the use of original design to track complex and long term maintenance asset lifecycles. This Bentley license allows pooling of licensing to best provide access to the largest number of engineers at the lowest cost.

Bentley Systems Inc, Exton, PA, supplies several products and support services to the City of Austin i.e. (Microstation, Inroads, GEOPAK, Watercad, PondPack, FlowMaster, StormCad, Bentley Fiber and others). Bentley provides a comprehensive software support service through its Bentley SELECT Program. The aforementioned products are Bentley products and Bentley is the sole provider of these products.
