Additional Backup Information

This contract will provide a constant source of repair parts for the scarifiers and planers used to remove runway paint at Austin Bergstrom International Airport (ABIA) to meet. The use of scarifiers and planers allows for the removal of the ABIA runway striping with minimal damage to the underlying surface. Scarifiers and planers are machines that use a multi-tipped drum with specialized teeth that grinds away surface paint and other markings with minimal damage to the surface below. The paint is removed to ensure that all tarmac, taxiway, and runway markings meet the Federal Aviation Administration regulation requirements.

For this contract, Guardian Industrial Supply, LLC, is the primary vendor and Smith Manufacturing is the secondary vendor. The secondary vendor will provide parts that the primary vendor cannot provide.

These parts will be purchased for use by ABIA’s Aviation Service Centers. These supplies will be ordered on an as-needed basis.
