This contract with Polydyne, Inc., Riceboro, GA, is for the purchase of flocculating polymer to be delivered and used at the South Austin Regional and Walnut Wastewater Treatment Plants on an as needed basis. This polymer is used for aiding the settling of wastewater prior to filtration. This polymer will be used to treat and average of 55 MGD at Walnut Creek WWTP and 45 MGD at South Austin Regional WWTP during the winter months when settling is difficult.

The State has performed needed testing and the characteristics of this polymer is compatible with the existing polymer storage and feed equipment, metering devices and pumps at the plants.
