Additional Backup Information				

Chapter 26 of the Texas Parks and Wildlife Code provides that the use of parkland for non-park purposes may be approved upon a finding that there is no feasible and prudent alternative to the use of this land.

The City of Austin and Austin Energy have proposed the installation of a pad mounted transformer, fed by rooftop solar cells, which supplies electricity back into the power grid.

Approval of the use of parkland is made on the condition that all restoration is completed in accordance with the Standard Specifications and Construction Standards of the City of Austin and the Parks and Recreation Department's "Construction in Parks Specifications." Austin Energy is required to pay all costs associated with the restoration and tree mitigation as part of the site restoration process.

There is no feasible and prudent alternative to the use of the dedicated parkland which includes all reasonable planning to minimize harm to such lands. The dates of public notification in the *Austin American-Statesman* are March 23 and 30, 2014, and April 6, 2014.
