MBE / WBE:	This contract will be awarded in compliance with City Code Chapter 2-9D (Minority-Owned and Women-Owned Business Enterprise Procurement Program). No subcontracting opportunities were identified; therefore no goals were established for this solicitation.
------------	---

Additional Backup Information

This contract with SEEPEX, Inc., Arlington, TX, is for the purchase of two progressive sludge cavity pumps with pressure protection for the Hornsby Bend Wastewater Treatment Plant. One pump will be for the Plant rotation program for the Seepex pumps at the Flow Equalization Build (FEB). The other will replace an older pump as a test run for possible upgrades at the thickener Complex.

The design of these pumps reduces wear on parts and allows for quicker rebuild of the rotor and or stator assembly without removing the units. This will allow for quicker repair time and reduction of down time and costs due to removal of the pump for rebuild and reduction of parts to be replaced.

Seepex Inc. is the sole manufacturer and distributor of these pumps and holds a patent on its design.
