

**HISTORIC LANDMARK COMMISSION  
APRIL 28, 2014  
DEMOLITION AND RELOCATION PERMITS  
HDP-2014-0157  
902 W. 30<sup>TH</sup> STREET**

## **PROPOSAL**

---

Demolish a ca. 1933 house.

## **ARCHITECTURE**

---

One-story rectangular-plan, side-gabled brick veneered house with an ornamental front gable on the right side of the façade; single, double, and triple 1:1 sash windows and a large bank of multi-light casement windows on the left of the principal entry; partial-width roof overhang over the front door. Minimal Tudor Revival styling.

## **RESEARCH**

---

The house appears to have been built in 1933. The first occupants were Coleman H. and Willie Mae Cook, who rented the house from around 1934 to around 1940, when they purchased a house on Preston Avenue. Coleman Cook was a native Iowan and was a civil engineer for the Iowa Highway Commission before moving to Austin to work for the Texas State Highway Department, principally in bridge design. From 1940 to 1946, the house was rented by Robert and Alice Hungate – he was a professor at the University of Texas. From around 1946 to around 1950, the house was rented by Orville and Margaret Wyss; he was a professor at the University of Texas who was known for his work in microbiology, and was instrumental in the invention of Desenex. The house was a rental unit through the 1950s, and around 1961, it was purchased by John and Olivia Escobedo. John Escobedo was a clerk at the University Co-Op. After his death, Olivia Escobedo continued to live here – through the early 1990s.

## **STAFF COMMENTS**

---

The house does not appear in any City survey.

## **STAFF RECOMMENDATION**

---

Recommend rehabilitation and adaptive re-use of the house, which is a part of the historic fabric of the Heritage Neighborhood and is typical of the houses in the area north and west of the University of Texas campus, which were largely occupied by UT professors. If rehabilitation and re-use of this house is not possible, then staff recommends release of the permit upon completion of a City of Austin Documentation Package, consisting of photographs of all elevations, a dimensioned sketch plan, and a narrative history, for archiving at the Austin History Center.

This is from a professional archaeologist and neighborhood resident. I will follow up with her to see what they recorded.

Subject: Re: demo at 902 W. 30th ST.

Hello Mary Jo,

I was made aware of the stone tool artifacts that have been found on the above referenced property as well as the property next door to it and other spots in close proximity. It may be tied to a multi-component site recorded in 1972 as part of a UT Anthro class project just one block to the north. That site form mentioned stone tool fragments but wasn't sure if the soil was fill or not. Andy Malof and I, residents of the neighborhood, plan to record the artifacts collected by the neighbor as an archaeological site this Saturday. He knows where everything came from and we will also see if he minds digging a few shovel tests on his property (which is next door to 902). I saw some of these materials yesterday and given the large size and the condition they are in doubt they are from fill. However, we want to be sure about that. There are springs on the terrace in this part of the neighborhood which still flow!

I just wanted to alert you to our plan.

Thanks for your attention to this matter,

Dana Anthony

## OCCUPANCY HISTORY 902 W. 30<sup>th</sup> Street

From City Directories, Austin History Center  
Prepared by the City Historic Preservation Office  
March, 2014

1992	Olivia Escobedo, owner Retired
1985-85	Olivia A. Escobedo, owner Retired
1981	Olivia A. Escobedo, owner Retired
1977	Olivia A. Escobedo, owner Employed by the University of Texas
1973	Olivia A. Escobedo, owner Widow, John O. Escobedo Employed by the University of Texas Health Center
1968	John O. and Olivia Escobedo, owners Clerk, University Co-Op Society

- 1962 John O. and Olivia Escobedo, owners  
Clerk, University Co-Op Society
- 1959 Jack L and Kitty Thurber, renters  
Student  
NOTE: John (Juan) and Olivia Escobedo are listed at 1103 E> 9<sup>th</sup> Street; he was a stock clerk at the University Co-Op Society.
- 1955 Donald K. and Mary K. Sacken, renters  
Chemical engineer, Jefferson Chemical, 7114 Lamar Boulevard.
- 1952 Alfred A. and Louise H. Hudson, renters  
Store manager
- 1949 Orville and Margarette Wyss, renters  
Professor, University of Texas
- 1947 Orville and Margaret B. Wyss, renters  
Professor, University of Texas
- 1944-45 Robert and Alice Hungate, renters  
Professor, University of Texas
- 1941 Robert and Alice Hungate, renters  
Assistant professor, University of Texas
- 1939 Coleman H. and Willie M. Cook, renters  
Engineer, State Highway Department
- 1937 Coleman H. and Mae Cook, renters  
Engineer, State Highway Department  
NOTE: The address is listed as 1008 W. 30<sup>th</sup> Street.
- 1935 Coleman H. and Mae Cook, renters  
Assistant engineer, State Highway Department  
NOTE: The address is listed as 1008 W. 30<sup>th</sup> Street.
- 1932-33 The address is not listed in the directory.  
NOTE: Coleman H. and Mae Cook are listed at 3815 Avenue G; he was an assistant bridge engineer for the State Highway Department.

#### **BIOGRAPHICAL NOTES:**

##### **Coleman H. and Mae Cook (ca. 1934 – ca. 1940)**

Coleman H. and Mae Cook appear in the 1940 U.S. Census as the owners of a house at 1507 Preston Avenue in Austin. Coleman H. Cook was then 49, had been born in Iowa, and was a civil engineer for bridge construction. Mae Cook was then 44, had been born in Texas, and had no occupation listed. They had a son, James, 20, who had been born in Iowa and had no occupation listed. The 1930 U.S. Census shows Coleman H. and Mae Cook as the renters of a house at 3220 Harris Park Avenue in Austin. Coleman Cook was a civil engineer for the State Highway Commission. Mae is listed as Willie M. Cook. The 1920 U.S. Census shows C.H. and May Cook living in Ames, Iowa, where C.H. Cook was a civil engineer for the State Highway Department.

##### **Robert and Alice Hungate (ca. 1940 – ca. 1946)**

Robert and Alice Hungate appear as the renters of this house in the 1940 U.S. Census. Robert Hungate was then 34, had been born in Washington, and was a science professor at the University of Texas. Alice Hungate was then 29, had been born in California, and had no occupation listed. They had 2 sons: Robert, 5; and Don, 2. Both boys had been born in California. The census reports notes that the Hungate family had lived in Santa Clara County, California in 1935.

### **Orville and Margaret Wyss (ca. 1946 – ca. 1950)**

#### IN MEMORIAM ORVILLE WYSS

Dr. Orville Wyss, Professor Emeritus of Microbiology, died on November 11, 1993, in Brush, Colorado. He was born in Medford, Wisconsin, on September 10, 1912, and attained his early education there. In 1937, the University of Wisconsin at Madison awarded him the B.S. in Bacteriology and the M.S. and Ph.D. in 1938 and 1941, respectively, also in Bacteriology. His doctoral supervisor was Dr. Perry Wilson, a pioneer in research on nitrogen fixation and the bacteria of the genus *Azotobacter*. The interests he developed while under Dr. Wilson's tutelage brought Dr. Wyss national attention in the physiology of nitrogen fixation and the organisms concerned with this process in nature.

In 1941, Orville accepted a research position with Wallace Tiernan, Inc., a pharmaceutical concern, and in the same year married Margaret Bedell in Nutley, New Jersey. His work with antifungal substances at Tiernan led to the development of Desenex, a commercially successful product still widely marketed after 50 years. In 1945, Dr. Wyss joined the faculty at The University of Texas as Associate Professor of Bacteriology and in 1948 was promoted to Professor, the rank he held until his retirement and subsequent death. On the death of Professor and Chairman O. B. Williams in 1959, Wyss became Chairman of the Department, now renamed Microbiology, and served in that capacity until 1969. He returned to the chairmanship for the 1975-76 school year and afterwards served with full-time teaching duties until his retirement in 1983. During Orville's years as chairman, the department grew from a faculty of seven to fifteen; the expansion included nationally prominent individuals who were attracted to Texas by his presence.

Orville Wyss supervised the work of some 70 graduate students, ten of whom became chairmen of their own departments, five became deans, and one the provost of a major university. His students went from Austin to many of the great universities of the world, to important positions in industry, and to government laboratories. Wyss' total contribution to American science must include the influence that his teaching had not only on his students but also on the students of his students. The notion of intellectual progeny of a gifted teacher applies well to Professor Wyss.

Dr. Wyss published some 115 research articles, several monographs, and two textbooks entitled *Microorganisms and Man* and *Elementary Microbiology*. He served on the editorial boards of the *Journal of Bacteriology* and *Applied Microbiology* as well as reader for many other journals. He also served on the review panels of the National Science Foundation (NSF), National Institutes of Health (NIH), Research Corporation and other granting agencies. Wyss was a member of various scientific societies and held various offices including the presidency of the American Society for Microbiology (ASM) in 1964, Texas Chapters of Sigma Xi and Phi Kappa Phi, and the Board of Governors of the American Academy of Microbiology (AAM). He was a founding member of AAM and played a major role in the development of the Texas Branch of ASM, for which he received the Distinguished Service Award. He served as consultant to the NSF Antarctica Research Program, the Chemical-Biological-Radiological Agency and also to various industrial concerns. Perhaps his most cherished honor was the endowment made to The University of Texas by a group of his former students and friends for the creation of the Orville Wyss Scholarship.

Finally, Orville Wyss' effect on science must be viewed in personal terms. He taught his students

the place of microbiology in science and the difference between science and life. He nurtured the search for knowledge, for self-respect, and for personal honor. It is important to remember also that Orville's former students remember him as a friend and colleague. He was philosopher, teacher, mentor, and much more. Professor Wyss is survived by his wife, Dr. Margaret Wyss, three daughters, Ann, Jane, and Patti, and two granddaughters.

## SANITARY SEWER SERVICE PERMIT

No. 1187

Austin, Texas

Received of Andrewartha Date 6/9/1933  
 Address 902 W. 30th  
 Amount twelve dollars \$ 12.00

Sewer service permit for this house (1933)

REQUEST FOR POSTPONEMENT RECEIVED 3-21-14 10:50 a.m.

Hi Steve,

As the president of the Heritage Neighborhood Association, I am requesting a postponement on the demolition case for 902 W 30th on behalf of the Heritage NA. The Heritage NA would like to talk to the owner as well as have the City Arborist examine the two Heritage trees, one extremely close to the house. In fact, if the owner demolished the house, he probably does not realize that his a new house is practically impossible to build because of the Heritage trees' root zones.

Regards,  
John
