**PROPOSAL**

---

Construct a second story to a one-story contributing house and a new detached garage.

---

**PROJECT SPECIFICATIONS**

---

The applicant proposes to construct a second story to a one-story house that is contributing to the historic district. The proposed addition will be flush with the existing house and will transform the house from one story to two stories. The proposed addition will match the existing painted brick of the house, will have a hipped roof with a hipped-roof dormer clad in horizontal lap siding. The details around the windows on the existing house will be reproduced on the addition. A new front porch will have wood columns and a metal balustrade above. The one-story section of the addition on the back of the house will have horizontal lap siding, and an open deck with a wooden railing on top. The existing detached garage will be replaced with a new garage with a hipped roof and lap siding.

---

**STANDARDS FOR REVIEW**

---

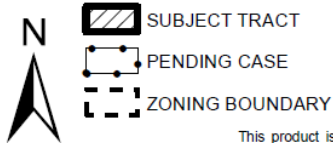

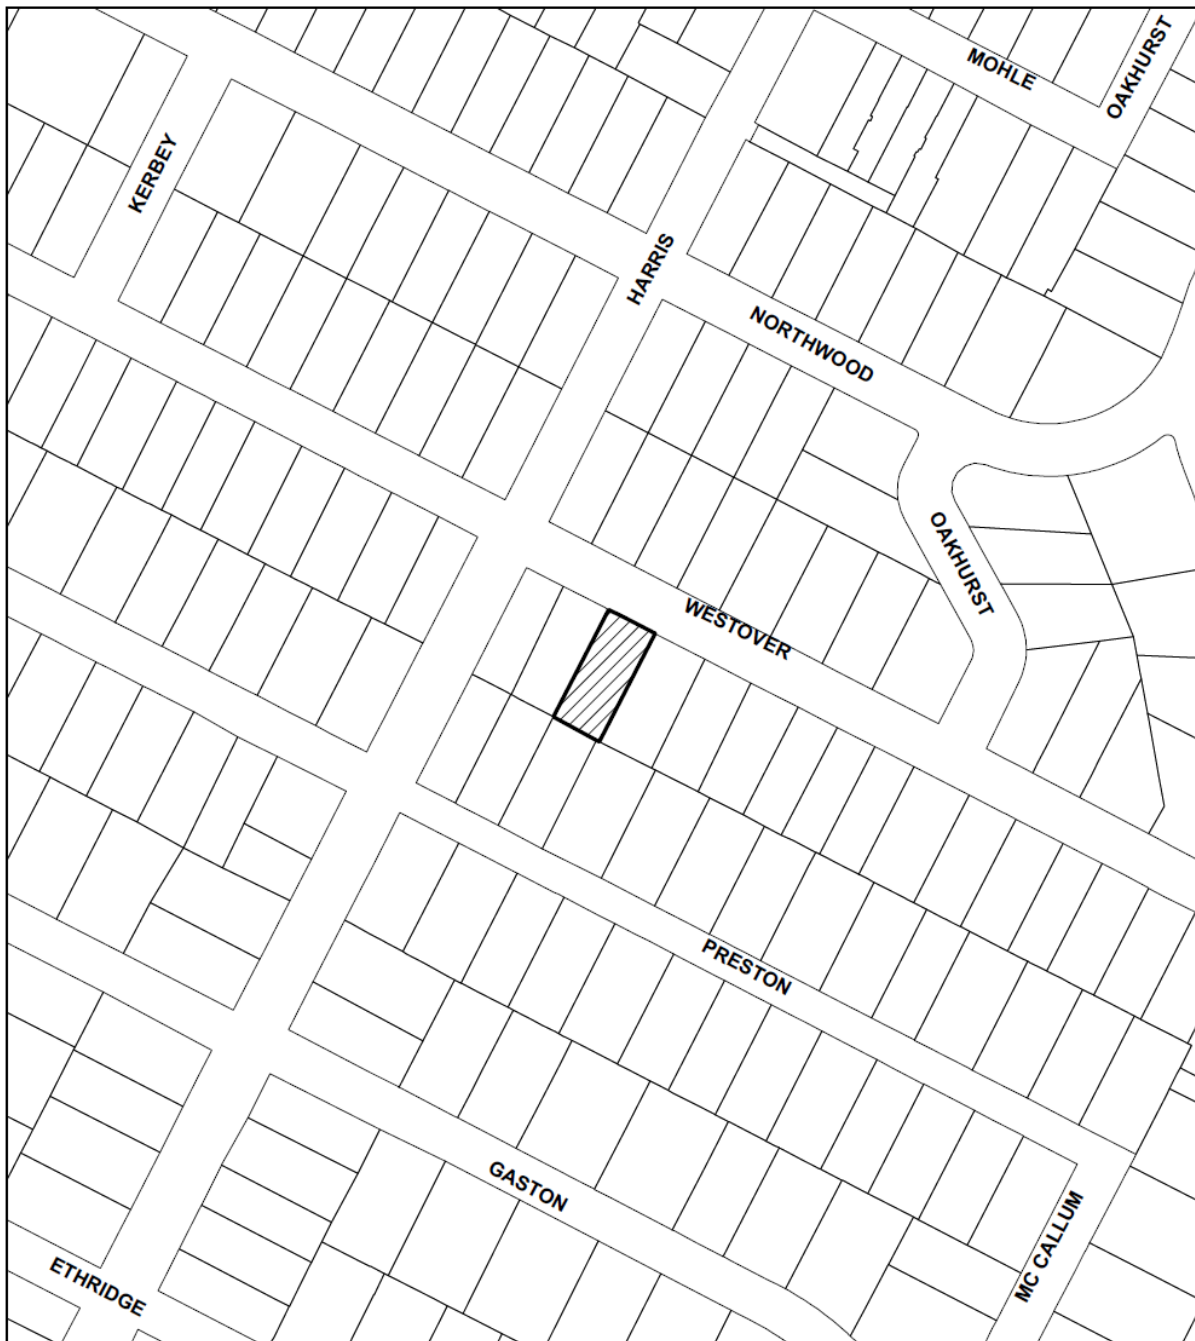

The house is contributing to the Old West Austin National Register Historic District, which has no specific design guidelines for additions. General design principles for historic districts encourage additions to the rear of the house with scale, massing, materials, and fenestration patterns complementing the house and other contributing houses within the district.

---

**STAFF RECOMMENDATION**

---

Recommend that the applicant reconsider the transformation of the one-story house into a two-story house. Transformation of a contributing house in a historic district, even when the addition is as compatible with the existing architecture as this proposal is, detracts from the character of the district. Pushing the addition back from the front wall of the house would better preserve the character of the house and the historic district.
