

HISTORIC LANDMARK COMMISSION
PERMITS IN NATIONAL REGISTER HISTORIC DISTRICTS
DECEMBER 15, 2014
NRD-2014-0129
1300 Bradwood Road
Wilshire Woods

PROPOSAL

The applicant proposes the replacement of 13 original windows and one door.

PROJECT SPECIFICATIONS

The existing windows are original metal-framed multi-light casement windows that typify the era and style of construction in this historic district. The applicant proposes to replace the original metal-framed windows with single, double, and triple casement windows with a Colonial grille.

STANDARDS FOR REVIEW

The Wilshire Woods Historic District has no specific guidelines for window replacements, but general design philosophies for historic districts encourage the retention of architectural features that define the historic character of the house and the district, such as window types.

STAFF RECOMMENDATION

Retain and rehabilitate the existing windows to make them more energy efficient; if replacement is necessary, then staff recommends the selection of a window that reproduces the look of the existing windows.

Casement and Awning WINDOWS

Casement Windows catch a breeze and direct fresh air indoors, allowing the most ventilation of any window style. Awning Windows let in fresh air, even on rainy days!

EASY

Casement Windows open wide to allow easy cleaning of outside glass from the inside* and can be hinged from the right or left.

SECURE

One lever positioned in an easy-to-reach location, securely locks the Casement Window at multiple points for a weathertight seal.

EFFICIENT

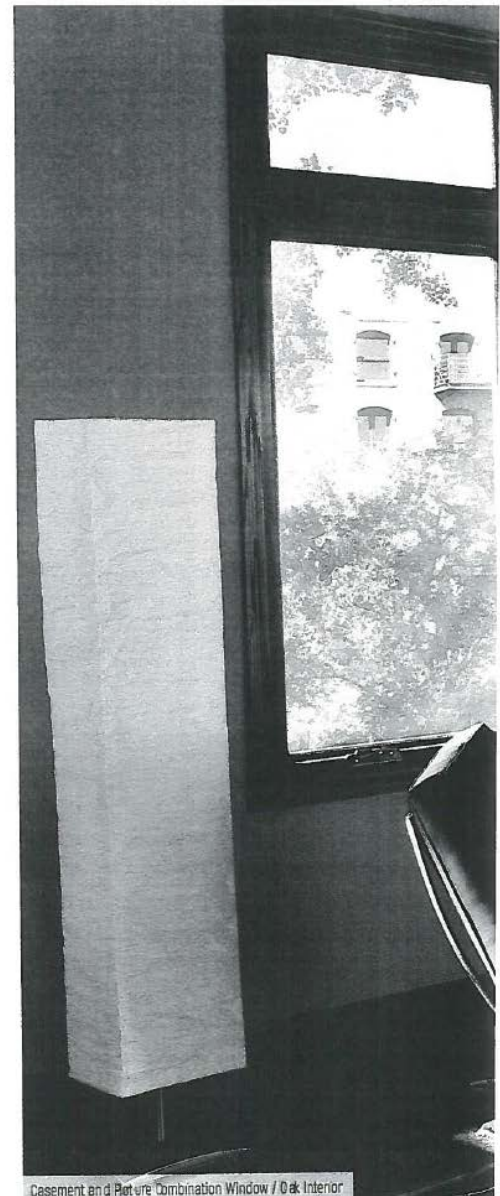

Casement and Awning Windows are our most energy-efficient ventilating window styles.

CONVENIENT

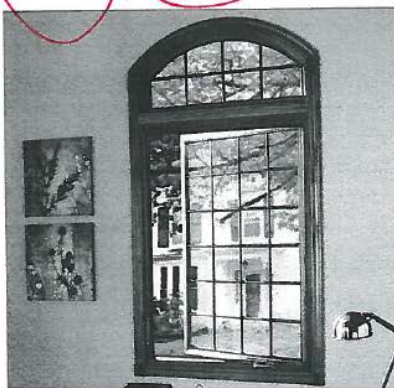

Awning Windows are recommended for use over cabinets, counters, or areas where opening and closing require a reach.

Use grilles to mimic the appearance of Double-Hung Windows for a historically accurate look
