Serving People with Disabilities within CommUnityCare
Where did we come from?

CommUnityCare Milestones

1970: The Austin City Council and Travis County Commissioner’s Court develop a system of primary care, dental care, and family planning clinics. The “East Austin Clinic” becomes the first publicly funded health clinic in the community to serve those with limited resources.

1992: The clinic system earns “Federally Qualified Health Center Look-Alike” status through the federal government. A 15-member FQHC Board of Directors is appointed. The majority of the members are patients who use the health centers.

2001: The Community Health Centers are officially designated a “Federally Qualified Health Center” system. The centers receive a Section 330 federal grant from the Bureau of Primary Health Care/Health Resources and Service Administration.

2004: Central Health (Travis County Healthcare District) is established as a limited-purpose taxing district. Funding for the Community Health Center system is transferred to Central Health from the City of Austin and Travis County Commissioners Court.

2009: The Community Health Center system becomes the non-profit corporation, CommUnityCare.

2010: CommUnityCare is accredited by The Joint Commission, which recognizes quality healthcare institutions around the world.

2011: Today CommUnityCare operates 20 federally qualified, Joint Commission accredited health centers. The system expects to provide 277,000 medical and dental encounters and serve 66,000 patients in 2011 with a budget of $64.5 million.
What are some of the requirements and benefits of being a Federally Qualified Health Center?

Must be 51% patient representation on Board of Directors

- Board hires and fires CEO, approves the scope of services, and approves the budget

An FQHC receives deeply discounted pharmaceutical cost via the 340B program

Federal Tort Claims Act provides malpractice coverage for the practice

Fair market reimbursement for Medicaid/Medicare/CHIP patient visits
Travis County Healthcare District/Central Texas Community Health Centers

Expected capacity by 12/31/12
CommUnityCare
Organizational Goals

- Our budgeted encounters for FY2013 are:
  - 221,841 medical
  - 35,934 dental
  - 13,667 behavioral

Total of 271,445 encounters
Why Use PCMH As Our Practice Model?

- Healthcare in the US is broken
- PCMH will help us transform ourselves into a true medical home.
- PCMH aligns with our mission of “the right care, at the right time, at the right place.”
- PCMH puts the patient at the center of the care delivery system that includes family, providers, specialists, ancillary staff and the wider community.
A patient centered medical home puts patients at the center of the health care system, and provides primary care that is “accessible, continuous, comprehensive, family-centered, coordinated, compassionate, and culturally effective.”

(American Academy of Pediatrics)
Enhanced Access and Continuity:

Provide access and advice during and after hours, give patients and their families information about their medical home and provide patients with team-based care.

Patients have limited access to appointments outside of normal business hours.

Patients wait weeks or months for appointments.

Patients have access to appointments before 8 and after 5. Staff and providers have options for a work/life balance with varied work schedules.

Patients can access same day appointments for all visit types.
Our Vision & Mission

Vision

Improve the health of the community by increasing access to the best care possible.

Mission

We will work with the community as peers with open eyes and a responsive attitude to provide the right care, at the right time, at the right place.
Travis County Stats

Travis County is one of the fastest growing areas in the nation.
- **Current population:** 1,024,266
- **Projected population in 2015:** 1,082,986

110 People move to Austin every day.

- 20% of women living in poverty (103,108 persons)
- 25% of children and youth living in poverty (62,168 kids under 18)
- 47% of children and youth considered low-income

Texas has one of the fastest growing child populations in the country (17% vs 3%) and central Texas is growing faster than the state rate (28%).

- 11% of children and youth in the county are uninsured.

According to national statistics these children are:

- Four times more likely to delay seeking care when needed
- Five times more likely to use the emergency room for regular care
- Six times less likely to fill prescriptions due to cost
CommUnityCare has over 24 Health Centers serving Travis County.

- South Austin
- North Central
- Rundberg
- Rosewood-Zaragosa
Primary Care
• Prenatal care and specialty care for high-risk pregnancies
• Prenatal, Labor and delivery, and newborn care education
• Newborn and infant care
• Pediatrics
• Immunizations
• Gynecology and women’s health exams
• Physicals and annual exams
• Treatment of minor injuries
• Laboratory services
• Management of chronic diseases
• Diagnosis and treatment of chronic or acute illnesses
• Nutrition counseling
• Core specialty care services and referrals
• Clinical pharmacy counseling
• Prescription drug assistance
• Vision and hearing screenings
• Confidential HIV testing and care

Behavioral Health
• Mental health counseling services
• Family and marriage counseling
• Assessment of behavioral problems
• Substance abuse assessments

Dental
• Routine and emergency dental exams
• Teeth cleaning and sealants
• Dental fillings
• Dental extractions
• Dentures and partials (limited services)

Other Programs
• Affiliation with UT Residency Program
• Affiliation with UT Nursing Program
• Comienzo Bien Prenatal Education Classes
• Centering Pregnancy and Parenting Program
• Electronic Medical Record (NextGen)
We have a total of 620 team members:

- 50 physicians
- Contract with 150 other Specialists
- 17 dentists
- 30 midlevel providers (nurse practitioners and physician assistants).
- Pharmacists, Dieticians, Social Workers
- Many of our providers speak several languages and we also utilize a telephone medical translation service for less common foreign languages.
In Fiscal Year 2013, CommUnityCare provided over 271,500 service encounters (patient visits), caring for approximately 70,000 individual patients. CommUnityCare is the largest “safety net” provider of primary care health services in Travis County.
Patient Mix

66% of our patients are Hispanic
15% are Caucasian
12% are African-American
7% are other ethnicities.

Children age zero to 17 years represent 25% of the total patient population served. Fifty-eight percent are women.

We care for patients regardless of ability to pay:

• 27% are uninsured
• 32% have Medicaid coverage, including Children’s Health Insurance Program (CHIP)
• 6% have Medicare
• 35% have Medical Assistance Program (MAP) from Central Health
How do we transform HealthCare in Travis county?

DSRIP

CommUnityCare

Federally Qualified Health Centers · Joint Commission Accredited
CommUnityCare Patient Statistics

- 69,620 – Total number of individual CommUnityCare patients
- 1,048 – Total number of CommUnityCare patients diagnosed as Intellectually/Developmentally Delayed
- 124 – Total number of CommUnityCare patients diagnosed as being Dually-diagnosed: Depression, Schizophrenia, or Bi-polar disorder
- 1.5% – percentage of Intellectually/Developmentally Delayed CommUnityCare patients
- 0.18% – percentage of Dually-diagnosed, depressive, schizophrenic, bi-polar disorder CommUnityCare patients
Payor Mix for Patients

We care for patients regardless of ability to pay:

- 27% are uninsured
- 32% have Medicaid or Children’s Health Insurance Program (CHIP) coverage
- 6% have Medicare
- 35% have Medical Assistance Program (MAP) coverage
CommUnityCare Clinics that serve the majority of patients with Dual-diagnosis of Depression, Schizophrenia, or Bipolar Disorder
Meeting the Needs of Developmentally Delayed Patients at CommUnityCare

- **Pediatricians** – CommUnityCare has a staff of 9 Board-Certified pediatricians who perform developmental and behavioral screening from infancy throughout childhood.

- **Integrated Behavioral Health Counselors** perform psychosocial risk assessments of all pregnant women. They counsel children and adults with mental illness at 12 CommUnityCare sites.

- **High-Risk Clinics** provide wrap-around services for individuals who are HIV-infected, homeless, and suffer from addiction. They may also have developmental delays.

- **Referrals** to Dell Children’s Neuroscience Center, Any Baby Can’s “Early Childhood Prevention,” and Speech and Occupational Therapy.

Of the 1,048 patients identified as intellectually disabled, 124 have a dual-diagnosis of depression, schizophrenia, or bipolar disorder. The majority of the patients are in the >=19 year old age group.
CommUnityCare Patients with Developmental Delay and Dual-Diagnosis (Mental Illness) by Age

Among all the patients (the original 1,048), 204 (19%) were seen by a Behavioral Health Counselor in the past year.
CommUnityCare Patients with Dual-Diagnosis of Depression, Schizophrenia, or Bi-polar Disorder

Among the subset of 124 patients with a dual-diagnosis of depression, schizophrenia, or bipolar disorder, 78 (63%) were seen by a Behavioral Health Counselor in the past year.

Patients declined being seen by a Behavioral Health Counselor in part, to social and cultural stigmas of being diagnosed with a mental illness.

Many patients tell their Primary Care Provider that they simply will not be seen by a Behavioral Health Counselor.

Many patients will schedule, then abandon, their appointment.
• Central Health
  o *Guides* transformation as Regional Health Partnership 7 (RHP7) Anchor
  o *Supports* transformation as an intergovernmental transfer (IGT) Entity
  o *Achieves* transformation through the Community Care Collaborative (CCC)

• 1115 Waiver is an opportunity to improve our health care system through Delivery System Reform Incentive Payments (DSRIP) projects.
Six Counties within RHP7:
- Travis, Bastrop, Caldwell, Fayette, Hays, & Lee

Region has proposed 77 projects
Total value: Over $700m
Most recent program year: $129m of local & federal funds to providers.

Travis County

- 57 projects total (includes 12 recently submitted & not yet approved)
- Focus on
  - Behavioral Health
  - Chronic Disease Management
  - Expansion of Care
- Value to Travis County: $606m dollars
- Central Health provides intergovernmental transfer for St. David’s, Dell Children’s, University Medical Center Brackenridge, & Community Care Collaborative
A NEW MODEL OF HEALTH CARE

INTEGRATED SYSTEM

CENTRAL HEALTH

- Public Clinic Upgrades
- Improved Accountability
- Training of Health Care Professionals

$85+ million a year in local and federal funds to expand and improve safety net services and treatment

NEW MEDICAL SCHOOL

- $35 million a year in tax dollars for patient services provided by medical school

THE UNIVERSITY OF TEXAS AT AUSTIN

- World Class from Day 1
- National Influence
- Top Doctors and Researchers

$30 million for 8 years
$25 million a year after that (additional money from philanthropy)

NEW TEACHING HOSPITAL

- Improved Services
- Better Equipment and Facilities
- Space for Teaching and Research

Seton funds residencies
UT faculty, residents and students teach, train and research in Seton Hospitals

$250 million for hospital construction

CommUnityCare
FIRST AIM: IMPROVED PATIENT EXPERIENCE

FROM TREATING THE DISEASE
TRANSFORMING
TO TREATING THE WHOLE PERSON

RESULTS IN
More patient engagement and better health outcomes.
SECOND AIM: HIGHER QUALITY CARE

FROM PAPER HEALTH RECORDS

TRANSFORMING

TO ELECTRONIC HEALTH RECORDS

RESULTS IN

Higher quality of care because real-time data is used to inform decisions.

CommUnityCare
A metrics-based system that supports the Triple Aim: Improved patient experience, higher quality of care, and increased cost efficiency.
WHAT DOES PROGRESS LOOK LIKE?

FROM FRAGMENTED CARE

TRANSFORMING

TO SEAMLESS CARE

RESULTS IN

An integrated delivery system that provides better health care and health outcomes for the community.
Health Care Delivery

TODAY

$
National transformative drivers of change

- Demand for value
- Engaging the individual in their health care
- Increased diversity
A unique opportunity

- Central Health, CommUnityCare and Sendero, in cooperation with the Community Care Collaborative (CCC) and Central Health’s primary partners in the CCC Seton Healthcare Family and ATCIC, have a unique opportunity to re-design care delivery and financial incentives by leveraging federal and state funds.

- In order to be most successful in adding value, it is critical for Central Health, Sendero and CommUnityCare to align themselves internally and focus on maximizing the efficient use of limited resources and ability to add measurable value.

- This can be achieved in part by developing shared services where possible and aligning and coordinating across the three organizations and with the new CCC.

Our goal is to create an Integrated Delivery system within the Central Health Enterprise.
Travis County Regional Trends

• Our healthcare system is fragmented and overwhelmed
• The public safety net hospital is aging and outmoded
• We have a shortage of doctors and other providers
• Rise in costly chronic conditions among population
• Our population is rapidly growing and aging
• Texas has the highest rate of uninsured in the nation
...that will require real change

- Realization of a future state that can survive in these assumptions will require an investment of time, resources and coordination by all three entities to fundamentally redesign current business operations, specifically:
  - Develop a clear decision making process and accountability to establish common goals and initiatives and pave the foundation of the enterprise infrastructure
  - Re-assign roles and responsibilities to ensure efficient use of resources
CommUnityCare and ATCIC are at the Table

- Develop strategic management and performance improvement capacity and competency
- Develop a long term unified financial strategy that includes enhancement of market share, aligned financial incentives, and integration of 1115 Waiver projects into health plan costs
- Invest in the right technologies and share platforms/infrastructure as possible to reduce duplication and improve overall efficiency
Central Health

Master planning the Travis County safety-net health care system

A FQHC network of 23 health centers providing quality multi-dimensional primary care to Travis County residents

Nonprofit provider of health coverage for Medicaid, CHIP and ACA eligible individuals in Travis County
Healthy People. Strong Community.
