Tools to support Creativity

$$C = f(K \times I \times E)$$

$$\text{Creativity} = f(\text{Knowledge} \times \text{Imagination} \times \text{Evaluation})$$

Skill: Diverge – Converge

Purpose: Enable inclusive group creative problem-solving

How it is used: Group members generate, and defer judgement before evaluating

Results: Over 200 people trained

Promise: *Culture change. Fewer painful meetings. Opportunity & innovative outcomes open up*

Identifying Rush to Judgment

(Idea Pinball)

Meeting Scenario: "What should do about _____?"

What you encounter:

- Some participants shut down others' ideas or rush to judgment ("That will never work").
- Some participants push for a decision prematurely ("Let's choose X course of action.")
- Participants are talking over each other.
- Friction is rising.

Tool: Basadur Profile

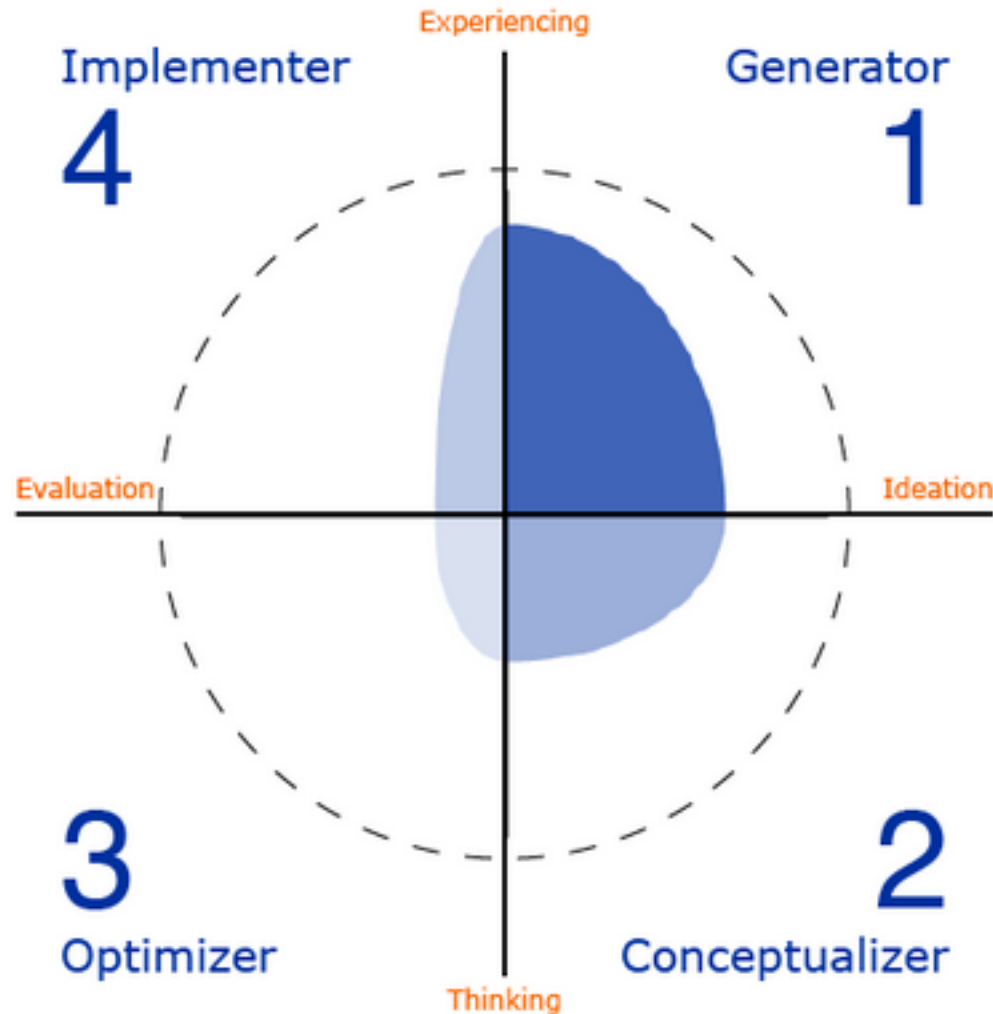

Purpose: Reveal individual creative problem-solving preferences

How it is used: Individuals take a 10-minute profile followed by a short facilitated discussion

Results: Over 200 people trained

Promise: *Enable well-rounded teams to get from forming to performing with less storming*

Problem-Solving Style Preference

<https://www.basadurprofile.com/>

COA Snapshot

Process Co-Creation

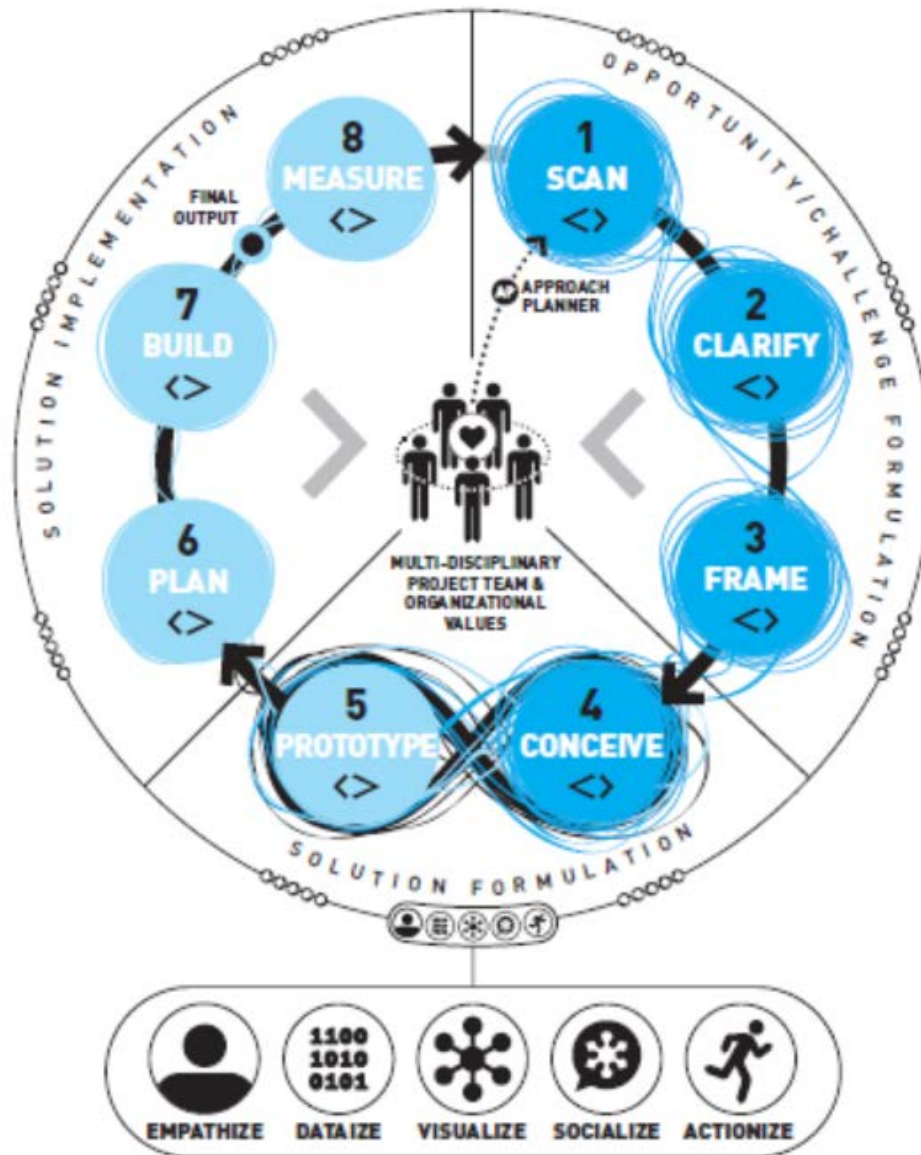

Purpose Help diverse teams to jointly produce a mutually valued innovative outcome

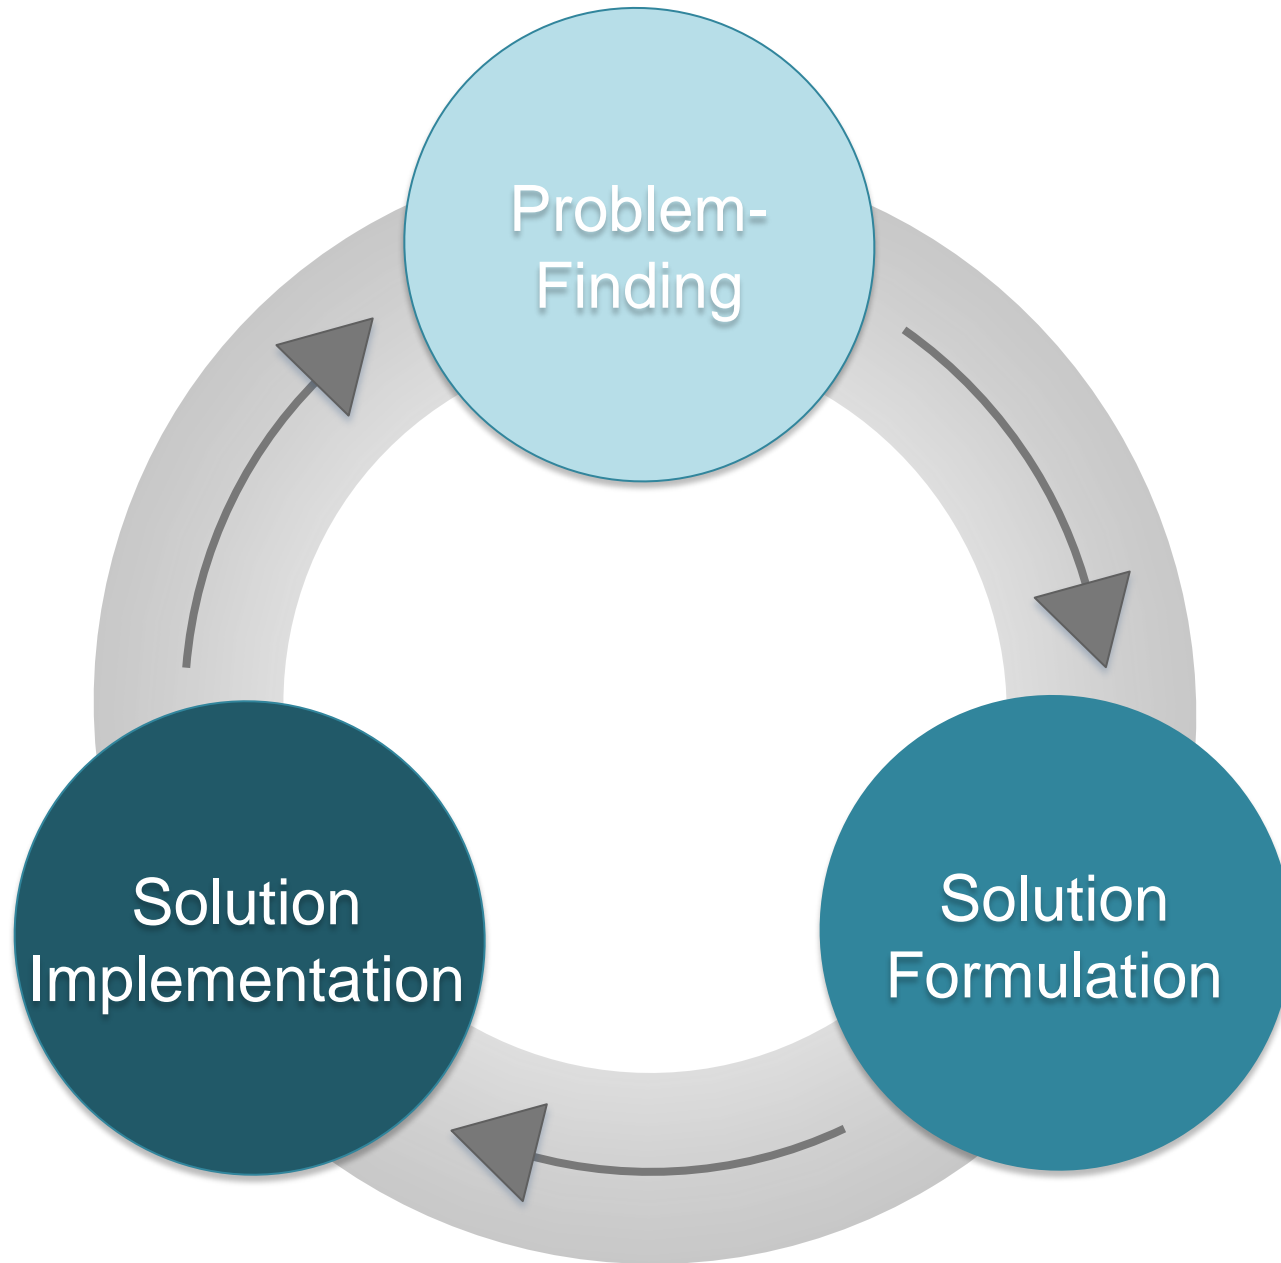

How it is used Facilitated through 3 stages: problem-framing, solution-framing, solution implementation

Results Over 200 people trained

Promise *Don't leave opportunity on the table! More innovative outcomes*

STRATEGIC COCREATION PROCESS

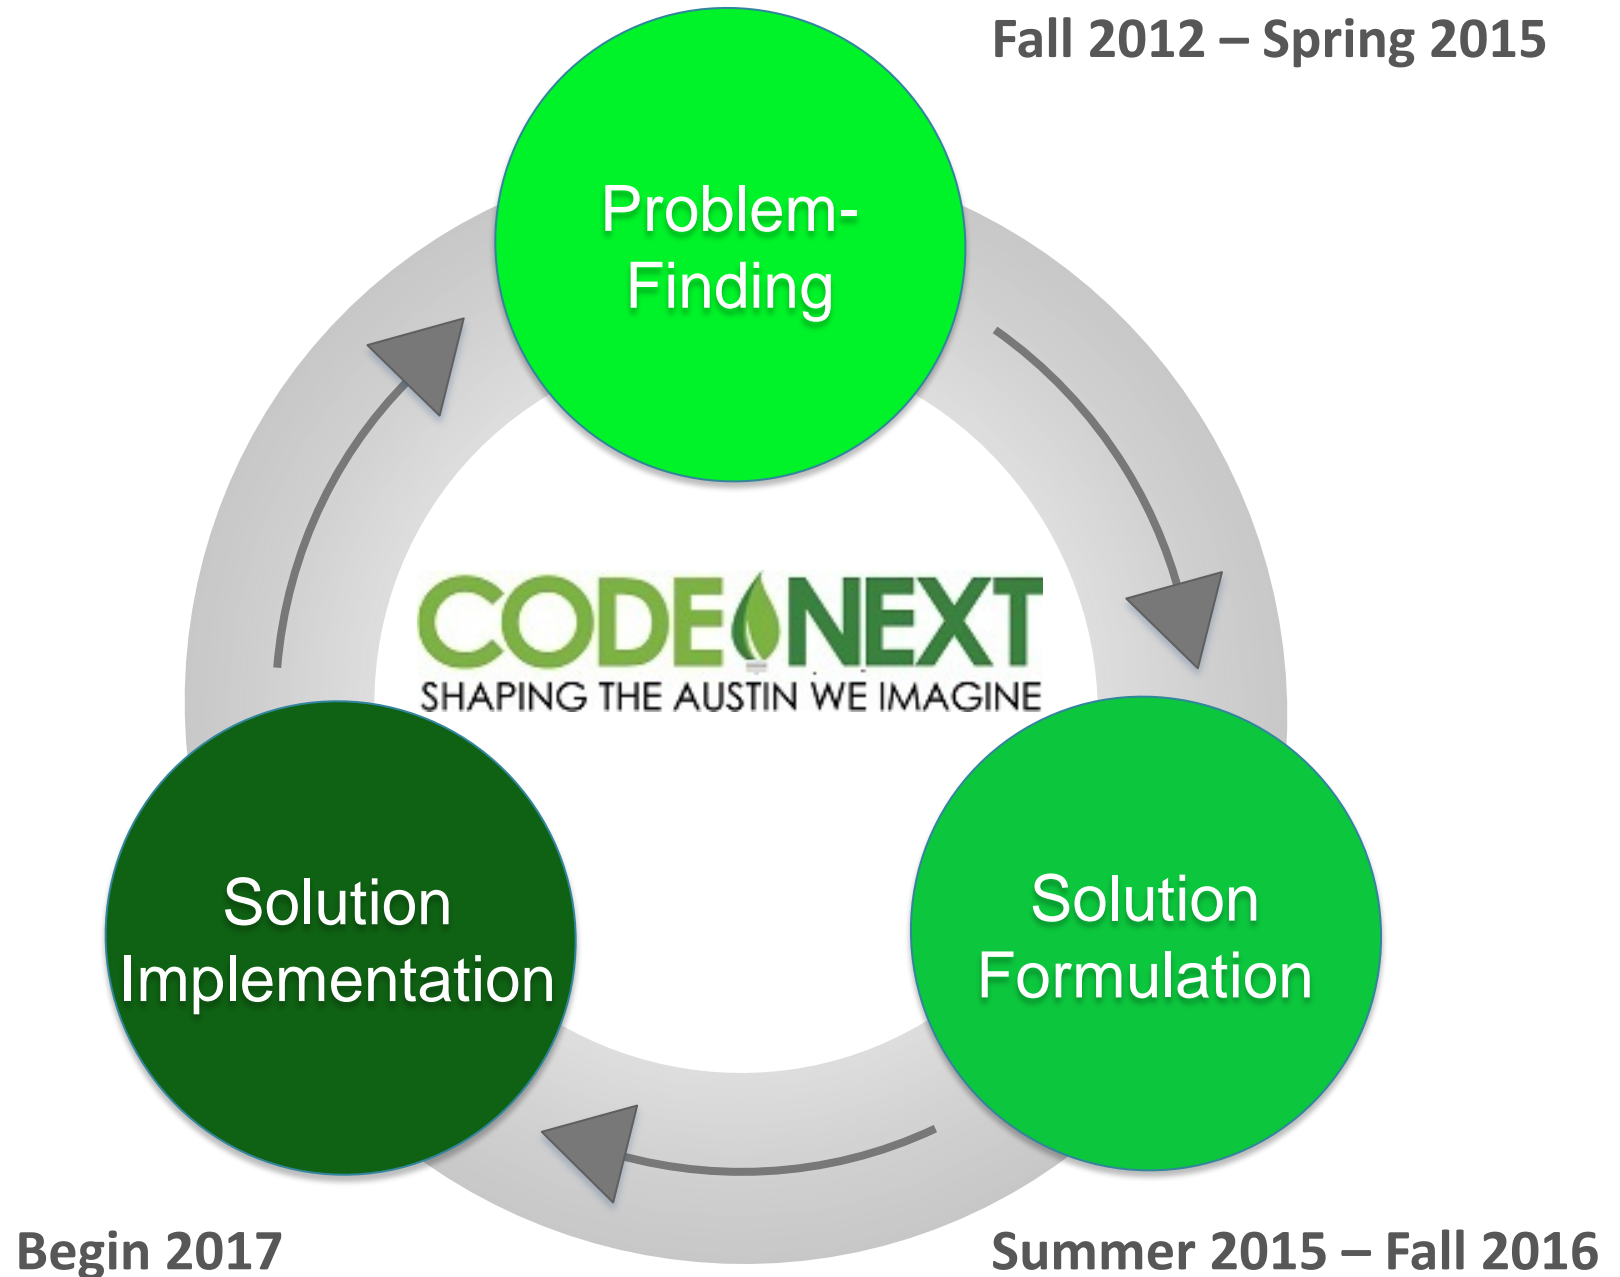

Austin

- 4 months (May-August 2014 – some work previously done)
- Multi-disciplinary steering committee
- Innovation Office + Telecom & Regulatory Affairs facilitation
- Costs: time on task
- Used Strategic Co-Creation method
- 1-year plan set by Problem-Framing
- Unanimous approval by Council
- Implementation under way

Portland

- 22 months process (research + facilitation)
- RFP Process under way
- \$35k plus staff time
- 3-year plan

Fall 2012 – Spring 2015

Working Groups

What was different?

- Framing the entire journey
- < - Diverge = defer judgment = Converge - >
- Synthesis and facilitated transition between meetings
- How might we...?
- Report out is a sortable table of questions, best practices, ideas, insights

CIVIC TECH PROJECT Planning Canvas

Users & Those Impacted

Who will use this app/project/tool?
Create personas or user stories based on archetypes of your target audience.
Who will this project affect and how?
Who is the primary beneficiary?
Where could you encounter users for feedback?

Features & Benefits

What will your app/project/tool do?
What are the core essential features/components required for this project to be successful?
How does each feature address a need or goal in your user stories/personas?
How will it provide benefits?

Key Activities

How will this app/project/tool come to life?
List the tasks required to implement the project's main features.
How will this app/project/tool get to its intended audience?
How will we promote adoption?
How will we maintain momentum for the development of this project?
How will we keep the end product evergreen?

Partners

Who could help us create this project?
What existing organizations can help you obtain Key Resources?
What other existing community groups will have an interest in bringing this project to life?

Project

What will we create for the user?
How is this addressing the Problem Statement and the Users?
What are the goals or metrics for success of this project in the next 3 months, 6 months, 1 year?

The Solution

Key Resources

What resources are needed to complete the Key Activities for this project?
Will you need access to a dataset or subject matter expertise?
Where will you need help?
Start to discuss what types of technologies would be best suited to address the requirements of this project.

The Logistics

what's next?

Work done in 2014 informs future steps.

Check-in Point: CodeNEXT is a multi-year initiative. More than a full year of community conversations and research is informing how the code should be improved. This step sets the stage for future steps.

Revision Work: Focus will include:
• Format and organization
• How code is used to evaluate/approve projects
• Kinds of regulations are applied and how

Aligning to the community report

AUSTIN 311 CHALLENGE

How might we improve our "Other" Mobile App SR process?

The Austin 311 Challenge is a platform for 311 to gather business ideas around the topic of improving the "Other" Mobile App SR process used by Command Center staff and senior ambassadors.

Please share your ideas, vote, comment, and collaborate on everyone's ideas!

[Learn more »](#)

[Submit your idea »](#)

“We're very excited to announce the selection of six ideas to be combined together to create a recommendation on how we can improve the ‘Other’ SR Mobile App process.”

“The was helpful because we are a 24/7 center and it would be impossible to get everyone together. This would have been a nightmare to do in meetings.”

Webstorm Project Plan

ACTION ITEM	OWNER	Begin	Due	Delivered
PROJECT Kick-off (WEEK 1)				
Initial meeting to clarify intent/area of opportunity	Innovation Office/Challenge Sponsor	Week 1		
Second meeting to clarify topic, participants	Innovation Office/Challenge Sponsor	Week 2		
Deliver Project Plan	Innovation Office	Week 1	Week 2	
Challenge Design (WEEK 3)				
Third meeting to frame challenge topic, categories, goals	Innovation Office/Sponsor	Week 3

Assess Time Spent in Activities

Assess Innovation Infrastructure Maturity

“My mind has been going crazy with ideas and thoughts regarding projects we can work on together, challenges we could submit, and just framing and brainstorming discussions we could have.

“My problem: Time is not my friend ...

“My solution: I've asked my team to help me sort out challenge opportunities with you guys and identify how we may work on a project together that is mutually beneficial.”

Hi innovation office gurus!

Our riparian restoration team (in WPD, Surface Water Team), is exploring putting together a business plan for implementing a pilot initiative. The pilot would consist on installing and incentivizing the installation of a large number of small scale green stormwater infrastructure units to counter the effect of impervious cover in a developed watershed.

I would like to know if any in your team can help us by facilitating a meeting to create a conceptual and action map for this initiative.

I would like to explore:

1. What we know
 - a. Effects of impervious cover on streams
 - b. What can we solve or think we can solve with green infrastructure
 - c. Know how on green stormwater infrastructure
 - d. Initial modelling results (soon)
 - e. What has been done in other places (and the results)
2. What we don't now
3. What do we need to create a business plan for the pilot initiative
4. Roadblocks, challenges, opportunities
5. Indicators of success?
6. What tasks need to be assigned to each team member
7. Timeframe for tasks and benchmarks

I hope this does not sound too crazy as an email (maybe it does). I would like to meet with you to explore how to put together that exploratory meeting and better prepare for it. Could the members who have not done so take the Basadur profile? If so, please let me know how. I think it would be very useful.

Next areas of focus:

- 1) Refining the Business Model
- 2) Refine the Project Intake Process
- 3) Continue to build capacity:

Portfolio Management

Network Strength

Space

Team Talent & Capacity
