

# 2015-16 Proposed Fee Schedule

	Amended 2014-15	Proposed 2015-16	Change
--	--------------------	---------------------	--------

**Austin Water Utility**

**Addition to System Fee**

Water tap fees for all second connections, increases to the existing installed meter, and/or water meters larger than two inches (2") are calculated on the total labor costs, transportation and equipment costs, materials and supply costs, plus indirect and overhead costs for the connection.

Wastewater tap fees for all second connections and/or wastewater connections larger than six inches (6") are calculated on the total labor costs, transportation and equipment costs, materials and supplies costs, plus indirect and overhead costs for the connection.

If the facility requiring wastewater service consist of more than fifteen living units (including, but not limited to apartments, motels, hotels, nursing homes, hospitals, etc.) or is of a commercial and/or industrial nature in excess of 4,000 square feet, a review by the Utility will be conducted to determine the need for a manhole in the sewer line. In the event that a manhole is required, the charge shall be calculated on a cost basis.

**Auxiliary Water Fee for Lake or Natural Auxiliary Water Sources Only**

\$60.00

\$60.00

Annual fee charged to AWU customers with an active lake or other natural water auxiliary water source. Fee will be used to recoup some of the costs incurred to implement, manage, and enforce this program that is designed to ensure that the public water supply is adequately protected and, if applicable, alternate wastewater billing is applied according to approved standards. The fee is per AWU customer site with an active lake or other natural auxiliary water source. This fee does not apply to AWU customer sites where the only auxiliary water source is from a rainwater harvesting system or AWU-provided reclaim water. This fee is charged on a monthly basis at 1/12 of the annual fee during the month(s) the customer's account is active.

**Backflow Prevention Compliance Fee**

\$30.60

\$31.20

\$0.60

Annual fee the Austin Water Utility (AWU) charges to its potable and reclaimed water high hazard customers or fire sprinkler systems that have backflow prevention assemblies on their plumbing systems that are required by the State of Texas or by City of Austin regulations to be tested and the results of the tests reported back to the AWU on at least an annual basis to help the utility ensure that its customers are protected from possible contamination or pollution due to a backflow event. Fee is per backflow assembly and is charged on a monthly basis at 1/12 of the annual fee during the month(s) the customer's account is active.

## Austin Water Utility

### Evaporative Loss Credit Application and Processing Fee

Non-refundable application and processing fee; customer is responsible for reporting timely and accurate meter readings each month. If customer reports an erroneous meter read or fails to meet the monthly reporting deadline, the Utility can waive the deadline for one instance in a twelve month period.

	\$185.00	\$187.50	\$2.50

### Fire Hydrant Meter Fees

Water meters are installed on fire hydrants for construction purposes on a temporary basis. Costs associated with fire hydrant meters include an initiation fee, a non-compliance removal fee, and a refundable equipment deposit for the meter and equipment. The initiation fee covers administrative costs in setting up the account on the billing system. The installation fee covers the field costs for installing the meter on the fire hydrant or on a vehicle for use in withdrawing water from a fire hydrant. Backflow prevention assemblies are required to be installed by the contractor and tested by a certified backflow technician and the test report faxed or delivered to Special Services within 48 hours of the meter installation. The non-compliance removal fee is charged when a fire hydrant meter is removed by the City of Austin due to either an ordinance violation or the contractor failing to have a backflow prevention assembly tested and the test report faxed or delivered to Special Services within the required time period. The meter and equipment deposits are to help insure the return of the meter and equipment upon completion of use by the contractor. The equipment deposit does not earn interest, and will be refunded to the customer upon return of the meter and equipment to the Utility, after verification that the meter and equipment is in good working condition, and verification that the utility billing charges have been paid in full. Charges for damages to the meter or equipment will be deducted from the deposit, if applicable. Refer to City Ordinance No. 20051020-005.

### Private Fire Hydrant (PFH) Fee

\$28.08

\$0.36

Annual fee the Austin Water Utility (AWU) charges to its customers with private fire hydrants (PFHs) for the tracking of locations, testing, inspections, and maintenance of PFHs, as well as the tester's certifications and credentials. The requirement to inspect, test and maintain private hydrants is in Chapter 25-12 of the Austin City Code as described in § 25-12-172 (Local Amendments to International Fire Code - 508.5.3 Private Fire Service mains and water tanks). This annual inspection, testing and maintenance of PFHs must be done in accordance with the National Fire Protection Association (NFPA) 25 and American Water Works Association (AWWA) Manual M-17, Installation, Field Testing and Maintenance of Fire Hydrants. This annual inspection, testing and maintenance ensures PFHs will operate properly in emergency situations, identifies and helps quantify the amount of water lost due to leaking systems and misuse, and improves the City of Austin's mapping systems, assisting both the AWU and the Austin Fire Department (AFD). Fee is per private hydrant and is charged on a monthly basis at 1/12 of the annual fee during the month(s) the customer's account is active.

### Private Wastewater Lateral Evaluation Fee

\$110.00

\$112.00

\$2.00

This fee covers the cost of providing site elevation analysis on City-identified private wastewater laterals that are defective and under enforcement activities by the City.

#### Wastewater Service Rates

For all bills and charges rendered on or after November 1, 2015 these rates are applicable to all service for wastewater treatment to retail customers served by the City of Austin. In the absence of measured sewage volume by a means acceptable to the City, the volume service charge for retail customers will be based on their wastewater average.

#### Wastewater Service Rates for Retail Customers:

Retail Monthly Customer Charges:	\$10.30	\$10.30	
Customer Assistance Program (CAP) customers may qualify for a waiver of the monthly customer charge.			
Customers will be assessed a retail monthly charge for each meter when water consumption has registered, or for service of at least 10 days of the monthly billing period.

Spancion	\$7.51	\$7.95	\$0.44
University of Texas	\$8.82	\$9.08	\$0.26

#### Existing Customers.

- (A) Retail Customers with Water Service. These rates are applicable to all retail customers who have metered water connections. Wastewater billing is based on the average water usage during the designated three (3) month wastewater averaging period; or monthly water consumption, whichever is lower. If there is zero usage during one of the three months in the averaging period, the month with zero usage is eliminated, and the remaining two months are used in the wastewater averaging calculation. If there is zero usage for two or all three months of the averaging period, a default wastewater average of 5,000 gallons will be assigned for residential customers until the next wastewater averaging period. For all other retail customers if there is zero usage for two or all three months of the averaging period, the monthly wastewater volume will be based on actual metered water usage monthly until the next wastewater averaging period.
- (B) Wastewater Billing for Domestic Alternate Water Sources. Wastewater volumes for Single Family Residential customers will be based on a historical wastewater average. In the absence of a historical wastewater average, the City will impute a wastewater average of 5,000 gallons. The customer has the option to install private water metering acceptable to the City to measure alternate water discharged into the sewer system and report meter reads as required. Non-residential customers must install approved private metering acceptable to the City to measure alternate water discharged into the sewer system and report meter reads as required.
- (C) Non-Residential Customers with associated Irrigation Meters. (Multifamily, Commercial, Large Volume and Wholesale) For those non-residential customers that have a separate City of Austin irrigation water meter for irrigation or alternative irrigation water source on the property other than a water meter solely for a City Supported Community Garden or Urban Farm as defined in Chapter 14-7 of the City Code, the City will base wastewater billing for domestic usage on actual monthly water consumption. Any property that has an irrigation meter requirement will base wastewater billing for domestic usage on actual monthly water consumption.
- (D) Non Residential Customers without irrigation needs or requirements on the property will base wastewater billing for domestic usage on actual monthly water consumption.

## 2015-16 Proposed Fee Schedule

	Proposed 2015-16	Change
--	---------------------	--------

### Austin Water Utility

**New Customers.**

- (A) Residential. The City will impute a wastewater average of 5,000 gallons to new residential accounts until they have established a wastewater average. The Director of the Austin Water Utility or the Director's designee has the discretion to adjust the 5,000 gallon average when the customer has had an established wastewater average at another City of Austin service address.
- (B) Non-Residential Customers without irrigation meter(s) (Multifamily, Commercial, Large Volume and Wholesale)
  - (1) Except as provided by subsection (2), if a non-residential customer establishes a new account at a service location where an earlier account established a wastewater average, the City will use the earlier wastewater service billing purposes until the new account establishes its own wastewater average.
  - (2) If in the judgment of the Director of the Austin Water Utility or the Director's designee, the new customer will place a substantially different demand on the wastewater collection and treatment system, the City will bill the new non-residential customer for wastewater service based on actual metered water consumption until the new non-residential customer has established a wastewater average.
- (C) Wastewater Billing for Domestic Alternate Water Sources. Wastewater volumes for Single Family Residential customers will be based on a historical wastewater average. In the absence of a historical wastewater average, the City will impute a wastewater average of 5,000 gallons. The customer has the option to install private water metering acceptable to the City to measure alternate water discharged into the sewer system and report meter reads as required. Non-residential customers must install approved private metering acceptable to the City to measure alternate water discharged into the sewer system and report meter reads as required.
- (D) Non-residential Customers with associated Irrigation Meters. (Multifamily, Commercial, Large Volume and Wholesale) If a new non-residential customer has installed a separate City water irrigation water meter or alternative irrigation source on the property, other than a water meter solely for a City Supported Community Garden or Urban Farm as defined in Chapter 14-7 of the City Code, the City will base the new customer's wastewater billing for domestic usage on actual monthly water consumption.

The criteria and procedures for an existing commercial customer or a new large volume customer to qualify as a large volume customer are as follows:

Existing Commercial Customers:

- (A) Criteria. An existing commercial customer of the Austin Water Utility must purchase more than 85.0 million gallons of water during a fiscal year that is between October 1 and September 30 at a single service address or campus. The Austin Water Utility will annually monitor water consumption to determine if any existing customers have exceeded the 85.0 million gallon level.
- (B) Procedures. On verification of the 85.0 million gallon purchase or consumption requirement in fiscal year one, the Austin Water Utility will include this customer as a large volume customer in its next rate setting cycle. The next rate setting cycle is during fiscal year two, and will set rates that are to be effective November 1 of fiscal year three. The Austin Water Utility will verify the water consumption in fiscal year two, before the rate change on November 1 of fiscal year three, to determine if the commercial customer has maintained the 85.0 million gallon water consumption level for the second consecutive fiscal year. If the commercial customer maintains the 85.0 million level, the City will change the rates for the commercial customer to the large volume customer rates on November 1 of fiscal year three. The City will bill the commercial customer for water consumption after the November 1 rate change at the new large volume rate. The City will give no credit for water consumption in the qualifying fiscal years before the November 1 rate change. If the customer does not maintain the 85.0 million gallon level in the second fiscal year, the customer will remain at commercial class rates.

## Austin Water Utility

### Wastewater Service Rates (continued)

The criteria and procedures for an existing large volume customer to continue to qualify as a large volume customer are as follows:  
Existing Large Volume Customers with Reduced Volume:

- (A) Criteria: Existing large volume customers of the Austin Water Utility must purchase 85.0 million gallons of water during a fiscal year that is between October 1 and September 30 at a single service address or campus. The Austin Water Utility will annually monitor water consumption for all existing large volume customers to determine whether the minimum 85.0 million gallon level has been met.
- (B) Procedures: On verification of fiscal year water use below the 85.0 million gallon consumption requirement the Strategic Resource Services Division of the Austin Water Utility will notify the customer in writing of the shortfall. If the customer falls below the 85.0 million gallon level for a second consecutive year, a second notice will be sent notifying the customer that they will be converted to the commercial class during the November billing cycle of that same year. Once a customer has lost industrial status, the criteria and procedures for an existing commercial customer to qualify as a large volume/industrial customer will be followed.
- (C) Procedures: Large volume customers that have implemented an Austin Water Utility approved conservation initiative that causes the water consumption to fall below the 85 million gallons threshold may continue to receive the large volume rate provided that the annual water consumption remains above 65 million gallons and the reduced usage does not create a peaking factor that would be greater than the commercial class peaking factor.

Existing Large Volume Customers with Major Process Changes:  
(A) Criteria: An existing large volume customer of the Austin Water Utility who has major process changes (e.g. sells off parts of the company, business changes with lower use projections, etc.) and the original business plans to purchase less than 85.0 million gallons of the water during a fiscal year that is between October 1 and September 30 at a single service address or campus.

- (B) Procedures: Upon notification of a major process change that reduces water use projections below the 85.0 million gallon consumption requirement to maintain large volume customer status, the Strategic Resources Services Division of the Austin Water Utility will notify the customer in writing that they will be converted to the commercial class on the billing cycle following the verification of the actual process change in which water use is reduced.

### New Large Volume Customers:

- (A) Criteria: New large volume customers that have requested connection to the water and wastewater system must submit water use projections to the Austin Water Utility as part of the service extension process. The Austin Water Utility will review the water use projections to verify that the customer would consume more than 85.0 million gallons within a fiscal year at a single service address or campus.
- (B) Procedures: After the customer has provided the Austin Water Utility with water use projections, the Austin Water Utility will verify and approve the projections. On approval, the City will classify the customer as a large volume customer and charge the appropriate rate on connection to the City's water and wastewater system. If the Austin Water Utility does not approve the customer's water use projections as being above the 85.0 million gallon level, the City will classify the customer appropriately.

### Wastewater Service Rates for Wholesale Customers:

Wholesale Monthly Customer Charge: \$10.30 \$10.30

Customers will be assessed a wholesale monthly charge for each meter when water consumption has registered, or for service of at least 10 days of the monthly billing period.

## Austin Water Utility

### Wastewater Service Rates (continued)

(A) Application. For all bills and charges rendered on or after November 1, 2015, the City will charge the above rates for wholesale customers. These charges are applicable to wholesale wastewater service customers of the City of Austin who are water districts, municipal utility districts, or other utilities which have metered water connections. In the absence of measured sewage volume by a means acceptable to the City, the volume service charge will be based on the average water usage during the designated three (3) month wastewater averaging period, or monthly water consumption, whichever is lower. If there is zero usage during one of the three months in the averaging period, the month with zero usage is eliminated, and the remaining two months are used in the wastewater averaging calculation. For new customers who have not established an average water usage during the December, January, and February billing period, the City will use the actual water consumption figure or the measured sewage volume to establish the wastewater billing.

(B) New Customers. The volume rate for any wholesale customer that is not listed above will be based on a weighted cost of service average of all Wholesale customers. That rate will remain in effect until the new customer establishes a full 12 month's consumption history. After that time, the Austin Water Utility will establish an individual rate and seek approval of that rate by the City Council.

### Watercraft and Marinas Program Fees

**Excursion Boat with Marine Sanitation Device**  
Annual fee the Austin Water Utility (AWU) charges customers with a marine sanitation device on a watercraft operated or intended for operation on the surface waters of the City's water supply. \$24.00

### Boat Pump-Out Facility

Annual permit fee the Austin Water Utility (AWU) charges customers with a boat pump-out facility operated on or adjacent to the surface waters of the City's water supply. This permit is required in accordance with Chapter 6-5, Article 3 (Watercraft and Marinas) of the Austin City Code. \$60.00

### Water Service Rates

For all bills and charges rendered on or after November 1, 2015, these rates are applicable to all sales or service of water to customers served by the City of Austin.

#### Water Service Rates for Retail Customers:

Retail Monthly Meter Equivalent Minimum Charge:

##### Single-Family Residential Monthly Tiered Minimum Charge:

This fee is charged in addition to the Retail Monthly Meter Equivalent Minimum Charge.

The residential monthly tiered minimum charge is applied based on the total billed consumption for the billing period as it falls within a rate block, not as a volumetric charge per 1,000 gallons.

Customer Assistance Program (CAP) customers may qualify for a waiver of the monthly tiered minimum charge.

Residential customers will be assessed a monthly tiered minimum charge for each meter when water consumption has registered, or for service of at least 10 days of the monthly billing period based on billed consumption for the billing period.

**Water Well Fee**

Annual fee the Austin Water Utility (AWU) charges customers with water wells to recoup the costs incurred to implement, manage, and enforce the new Water Well Program that is designed to ensure that the public water supply is adequately protected and, if applicable, alternate wastewater billing is applied according to approved standards. The requirement to register AWU customers with certain types of active water wells is in Chapter 15-12 of the Austin City Code. The fee is per AWU customer site with active water well(s) that are required to be registered under Ch. 15-12. This fee is charged on a monthly basis at 1/12 of the annual fee during the month(s) the customer's account is active.
